<b>1</b>	<b>Introduction . . . . .</b>	<b>1</b>
1.1	Introduction . . . . .	1
1.2	Feedback Control . . . . .	2
1.2.1	Information Structure . . . . .	3
1.2.2	System Representation . . . . .	4
1.2.3	Team Problems . . . . .	5
1.2.4	General Methodologies . . . . .	6
1.2.5	Hierarchical Systems . . . . .	6
1.3	Outline of the Book . . . . .	7
1.3.1	Methodology . . . . .	8
1.3.2	Book Organization . . . . .	8
	References . . . . .	9
<b>2</b>	<b>Decentralized Control of Nonlinear Systems I . . . . .</b>	<b>11</b>
2.1	Classes of Nonlinear Interconnected Systems . . . . .	11
2.1.1	Class I . . . . .	12
2.1.2	Class II . . . . .	14
2.1.3	Class III . . . . .	17
2.2	Dynamic Output Feedback: Class I . . . . .	18
2.2.1	Observer-Based Control Design . . . . .	19
2.2.2	Simulation Example 2.1 . . . . .	28
2.2.3	Simulation Example 2.2 . . . . .	29
2.2.4	Simulation Example 2.3 . . . . .	31
2.2.5	Dynamic Control Design . . . . .	32
2.2.6	Robust Decentralized Design . . . . .	34
2.2.7	Simulation Example 2.4 . . . . .	39
2.3	Robust Control Design: Class II . . . . .	40
2.3.1	Construction Procedure . . . . .	40
2.3.2	Recursive Design . . . . .	43
2.3.3	Simulation Example 2.5 . . . . .	50

2.4	Decentralized Tracking: Class III . . . . .	52
2.4.1	Partially Decentralized Observer . . . . .	54
2.4.2	Design Procedure . . . . .	56
2.4.3	Design Results . . . . .	62
2.5	Decentralized Guaranteed Cost Control . . . . .	65
2.5.1	Analysis of Robust Performance . . . . .	66
2.5.2	Including Input Delays . . . . .	70
2.5.3	Decentralized Design Results . . . . .	71
2.6	Global Robust Stabilization . . . . .	78
2.6.1	Introduction . . . . .	78
2.6.2	Problem Formulation and Assumptions . . . . .	79
2.6.3	Robust Control Design . . . . .	82
2.6.4	Simulation Example 2.7 . . . . .	86
2.6.5	Proof of Lemma 2.8 . . . . .	90
2.7	Notes and References . . . . .	90
	References . . . . .	91
<b>3</b>	<b>Decentralized Control of Nonlinear Systems II . . . . .</b>	<b>95</b>
3.1	Introduction . . . . .	95
3.1.1	System Description . . . . .	96
3.1.2	Robust Control Design . . . . .	98
3.1.3	Recursive Method . . . . .	101
3.1.4	Simulation Example 3.1 . . . . .	109
3.2	Global Almost Disturbance Decoupling . . . . .	112
3.2.1	Introduction . . . . .	112
3.3	Decentralized $\mathcal{H}_\infty$ Control . . . . .	113
3.3.1	The Local Disturbance Problem . . . . .	117
3.3.2	Results for Non-minimum Phase Systems . . . . .	119
3.4	Global Inverse Control of Nonlinear Systems . . . . .	123
3.4.1	Disturbance Attenuating Trackers . . . . .	127
3.4.2	System Description . . . . .	128
3.4.3	Output Feedback Tracking . . . . .	129
3.4.4	Partially Decentralized Observer . . . . .	130
3.4.5	Controller Design Procedure . . . . .	131
3.4.6	Control Design Results . . . . .	137
3.4.7	$\mathcal{L}_2$ -Gain Disturbance Attenuation . . . . .	139
3.5	Application to Power Systems . . . . .	140
3.5.1	Power System Model . . . . .	141
3.5.2	Robust Stabilization . . . . .	143
3.5.3	Simulation Results . . . . .	149
3.6	Decentralized Control with Guaranteed Performance . . . . .	156
3.6.1	Introduction . . . . .	156
3.6.2	Dynamical Model of Multimachine Power System . . . . .	157
3.6.3	Guaranteed Cost Controller Design . . . . .	161
3.6.4	Robust Performance Analysis . . . . .	161

3.6.5	Guaranteed Cost Controller Design . . . . .	167
3.6.6	Simulation Results . . . . .	171
3.7	Notes and References . . . . .	178
	References . . . . .	178
<b>4</b>	<b>Decentralized Systems with Multi-controllers . . . . .</b>	<b>183</b>
4.1	Introduction . . . . .	183
4.2	Decentralized Stabilization of Multi-channel Systems . . . . .	184
4.2.1	Introduction . . . . .	184
4.2.2	Problem Statement . . . . .	185
4.2.3	Decentralized Stabilization . . . . .	188
4.2.4	Simulation Example 4.1 . . . . .	191
4.3	Resilient Stabilization of Interconnected Networked Systems . . . . .	192
4.3.1	Introduction . . . . .	193
4.3.2	Problem Formulation . . . . .	194
4.3.3	Resilient Observer-Based Control . . . . .	196
4.3.4	Augmented Closed-Loop System . . . . .	198
4.3.5	Delay-Dependent Subsystem Stability . . . . .	199
4.3.6	Simulation Example 4.2 . . . . .	206
4.4	Control of Discrete-Time Systems with Input Saturation . . . . .	208
4.4.1	Introduction . . . . .	208
4.4.2	Problem Formulation . . . . .	209
4.4.3	Review Results . . . . .	210
4.4.4	Main Results . . . . .	212
4.5	Notes and References . . . . .	221
	References . . . . .	221
<b>5</b>	<b>Decentralized Quantized Control . . . . .</b>	<b>227</b>
5.1	Decentralized Quantized Control I: Continuous Systems . . . . .	227
5.1.1	Problem Statement . . . . .	228
5.1.2	Local Quantizer Description . . . . .	229
5.1.3	Static Output-Feedback Design . . . . .	230
5.1.4	Quantized Output-Feedback Design . . . . .	236
5.1.5	Simulation Example 5.1 . . . . .	239
5.1.6	Polytopic Systems . . . . .	240
5.1.7	Delay-Free Systems . . . . .	242
5.2	Decentralized Quantized Control II: Continuous Systems . . . . .	243
5.2.1	Problem Statement . . . . .	244
5.2.2	A Class of Local Quantizers . . . . .	246
5.2.3	Quantized Output-Feedback Design . . . . .	247
5.2.4	Special Cases . . . . .	252
5.2.5	Simulation Example 5.2 . . . . .	255
5.3	Decentralized Quantized Control I: Discrete Systems . . . . .	259
5.3.1	Introduction . . . . .	259
5.3.2	Problem Description . . . . .	260
5.3.3	Local Quantizers . . . . .	261

5.3.4	Static Output-Feedback Design . . . . .	262
5.3.5	Quantized Output-Feedback Design . . . . .	265
5.3.6	Special Cases . . . . .	269
5.3.7	Simulation Example 5.3 . . . . .	272
5.3.8	Simulation Example 5.4 . . . . .	274
5.4	Decentralized Quantized Control II: Discrete Systems . . . . .	275
5.4.1	Introduction . . . . .	276
5.4.2	Problem Statement . . . . .	277
5.4.3	A Class of Local Quantizers . . . . .	277
5.4.4	Quantized Feedback Design . . . . .	278
5.4.5	Special Cases . . . . .	282
5.4.6	Simulation Example 5.5 . . . . .	284
5.5	Interconnected Discrete Systems with Overflow Nonlinearities . . . . .	287
5.5.1	Introduction . . . . .	287
5.5.2	Problem Statement . . . . .	290
5.5.3	Local Static Control Function . . . . .	290
5.5.4	Closed-Loop Stabilization . . . . .	291
5.5.5	Local Dynamic Control Function . . . . .	294
5.5.6	Simulation Example 5.6 . . . . .	295
5.6	Notes and References . . . . .	299
	References . . . . .	300
<b>6</b>	<b>Decentralized Control of Traffic Networks . . . . .</b>	<b>303</b>
6.1	Introduction . . . . .	303
6.2	A Model of Communication Networks . . . . .	305
6.3	Problem Formulation . . . . .	306
6.3.1	A Network Example . . . . .	307
6.4	Centralized Routing Controller . . . . .	308
6.4.1	Delay-Dependent $\mathcal{H}_\infty$ Unconstrained Control Design . . . . .	308
6.4.2	Delay-Dependent $\mathcal{H}_\infty$ Design . . . . .	309
6.5	Decentralized Traffic Routing Control . . . . .	310
6.5.1	Decentralized Dynamic Model . . . . .	310
6.5.2	Decentralized Robust Routing Controller: Unconstrained Case . . . . .	311
6.5.3	Decentralized Robust Routing Controller: Constrained Case . . . . .	314
6.6	Simulation Results . . . . .	315
6.6.1	Simulation Example 6.1 . . . . .	315
6.6.2	Simulation Example 6.2 . . . . .	318
6.7	Proofs . . . . .	320
6.7.1	Proof of Theorem 6.1 . . . . .	320
6.7.2	Proof of Theorem 6.2 . . . . .	322
6.7.3	Proof of Theorem 6.3 . . . . .	323
6.7.4	Proof of Theorem 6.4 . . . . .	327
6.8	Discrete-Time Dynamic Routing . . . . .	328
6.8.1	Routing Algorithms . . . . .	328
6.8.2	Network Dynamics and Assumptions . . . . .	330

6.8.3	Routing Control Algorithm . . . . .	334
6.8.4	Selection of the Feedback Matrix . . . . .	341
6.8.5	Some Properties . . . . .	345
6.8.6	Simulation Examples . . . . .	353
6.9	Notes and References . . . . .	363
	References . . . . .	363
<b>7</b>	<b>Decentralized Control of Markovian Jump Systems . . . . .</b>	<b>365</b>
7.1	Control for Markovian Jump Systems . . . . .	365
7.1.1	Introduction . . . . .	366
7.1.2	Problem Statement . . . . .	366
7.1.3	$\mathcal{H}_\infty$ -State Feedback Controller . . . . .	373
7.1.4	Robust $\mathcal{H}_\infty$ -Control Results . . . . .	378
7.2	Mode-Dependent Decentralized Stability and Stabilization . . . . .	386
7.2.1	Introduction . . . . .	386
7.2.2	Problem Statement . . . . .	386
7.2.3	Local Subsystem Stability . . . . .	388
7.2.4	$\mathcal{H}_\infty$ State-Feedback Synthesis . . . . .	393
7.2.5	Dynamic Output-Feedback Control . . . . .	395
7.2.6	Simulation Example 7.1 . . . . .	399
7.3	$\mathcal{H}_\infty$ Control by Averaging and Aggregation . . . . .	403
7.3.1	Introduction . . . . .	404
7.3.2	Problem Formulation . . . . .	405
7.3.3	Results in the Infinite-Horizon Case . . . . .	410
7.3.4	Results in the Finite Horizon Case . . . . .	420
7.3.5	Simulation Example 7.2 . . . . .	425
7.3.6	Appendix . . . . .	428
7.4	Notes and References . . . . .	429
	References . . . . .	430
<b>8</b>	<b>Decentralized Adaptive Control . . . . .</b>	<b>433</b>
8.1	Introduction . . . . .	434
8.2	System Formulation . . . . .	434
8.2.1	Decentralized Feedback Control for Nonlinear Systems . . . . .	437
8.3	Application to Decentralized Control . . . . .	440
8.3.1	Simulation Example 8.1 . . . . .	443
8.3.2	Simulation Example 8.2 . . . . .	446
8.4	Adaptive Techniques for Interconnected Nonlinear Systems . . . . .	448
8.4.1	A Class of Interconnected Nonlinear Systems . . . . .	449
8.4.2	Decentralized Adaptive Design . . . . .	451
8.4.3	Simulation Example 8.3 . . . . .	468
8.4.4	Simulation Example 8.4 . . . . .	471
8.4.5	Simulation Example 8.5 . . . . .	472
8.4.6	Tracking Behavior . . . . .	474
8.4.7	Simulation Example 8.6 . . . . .	479

8.5	Proofs	483
8.5.1	Proof of Theorem 2.1	483
8.5.2	Proof of Proposition 8.1	484
8.6	Decentralized Adaptive Tracker	486
8.6.1	Introduction	486
8.6.2	The Decentralized Adaptive Control Design	487
8.6.3	The Decentralized Adaptive Problem	487
8.7	The Digital Redesign of the Decentralized Adaptive Control System	493
8.7.1	The Digital Redesign Methodology	493
8.7.2	An Improved Redesign Adaptive Controller	495
8.7.3	Incorporating Optimal Tracker	498
8.7.4	Simulation Example 8.7	500
8.8	Notes and References	504
	References	507
<b>9</b>	<b>Mathematical Tools</b>	<b>511</b>
9.1	Finite Dimensional Spaces	511
9.1.1	Vector Spaces	511
9.1.2	Norms of Vectors	512
9.1.3	Some Basic Topology	513
9.1.4	Convex Sets	514
