

# Contents

<b>1 Introduction</b>	1
Introduction	2
Identity Verification in Animals and Humans	2
The Use of Biometrics by Ancient Civilisations	4
Early Pioneers in Anatomical Measurement	5
Franz Joseph Gall (1758–1828)	5
Cesare Lombroso (1836–1909)	6
Adolphe Quetelet (1796–1874)	7
Alphonse Bertillon (1853–1914)	8
Jan Evangelista Purkyne (1787–1868)	9
Juan Vucetich (1858–1925)	10
Francis Galton (1822–1911)	10
Modern Times	12
Review Questions	13
<b>2 Biometrics Revisited</b>	15
Biometrics Defined	15
Assumptions	17
Biometric Methodologies	18
Hand Geometry	19
Voice Verification	19
Signature Verification	19
Keystroke Dynamics	20
Fingerprint Recognition	20
Retinal Scanning	21
Iris Recognition	21
Face Recognition	22
Gait Recognition	23
Vein Scanning	23
Other Techniques	23
Which Biometric Is Best?	24
Physical Access Control	24
Time and Attendance Monitoring	25

Logical Access Control.....	25
On-line Transactions.....	26
Portable Device Access .....	26
National Identity Documentation.....	27
Border Control .....	27
Benefit Claims.....	28
Industrial Processes.....	28
Other Applications.....	28
Considerations Around DNA.....	29
Review Questions.....	30
<b>3 Biometric Systems Defined .....</b>	<b>31</b>
Introduction .....	31
Early Days.....	32
Rudimentary Integration .....	33
System Components.....	34
Peripheral Architectures.....	35
Review Questions.....	37
<b>4 Identity Management.....</b>	<b>39</b>
What Is an Identity? .....	39
The Concept of Identity Management Within Systems .....	40
Identity Credentials .....	41
The Alignment of Credentials with User Profiles .....	42
Data Management .....	44
Role-Based Identity Management.....	46
Review Questions.....	48
<b>5 True Systems Integration.....</b>	<b>49</b>
Systems Definition .....	50
Pertinent Systems Components.....	52
The Registration Process .....	52
The Operational Process .....	53
Biometric Credential Storage.....	55
Portable Media.....	55
Portable Devices .....	56
Remote Databases.....	56
Biometric Matching Process .....	57
Systems and Data Security.....	59
Infrastructure Security .....	59
Data Security.....	60
Biometric Sub-system Security .....	61
Scalability.....	62
Audit Logging .....	63
Data Synchronisation .....	64
System Interfaces .....	65

Network Considerations.....	66
Systems Testing.....	67
Software.....	67
Third Party Software.....	68
Hardware.....	68
Operational Process.....	69
End-to-End Testing.....	69
Conclusion.....	70
Review Questions.....	71
<b>6 Performance Issues.....</b>	<b>73</b>
Introduction.....	74
Defining Performance.....	74
Measuring Performance.....	75
Biometric Capture.....	75
The Biometric Matching Process.....	75
Integration of the Biometric Transaction.....	77
Database Performance.....	79
Network Performance.....	81
Operator Performance.....	83
System Throughput.....	83
Documenting Performance.....	84
System Variables.....	85
User Variables.....	86
Usability.....	86
Familiarity.....	87
Competence.....	87
Attitude.....	88
External Influence.....	89
Disabilities.....	89
Language.....	90
Age.....	91
Ethnicity.....	92
Well-being.....	92
Systems Configuration.....	93
Total Systems Performance.....	94
Review Questions.....	95
<b>7 Equivalence of Performance.....</b>	<b>97</b>
Defining Equivalence of Performance.....	98
Why Equivalence of Performance Is Important.....	98
From the Operator's Perspective.....	98
From the User's Perspective.....	99
Facilitating Equivalence of Performance.....	100
Managing Equivalence of Performance.....	106
Security Considerations.....	106

Systems Integration .....	107
Reporting on Equivalence of Performance .....	108
Architecture .....	108
Individual Node Performance .....	108
System-Wide Performance .....	109
Alerts.....	109
Configuration .....	109
Next Steps .....	110
Review Questions.....	111
 <b>8 Aligning Biometrics with Data .....</b>	 113
Introduction .....	114
What Does a Biometric Check Prove?.....	114
The Registration Process.....	115
Associated Data Records.....	118
Access to Information .....	120
Verifying Information.....	121
Information Security .....	122
Data Protection and Privacy.....	124
Review Questions.....	125
 <b>9 The Mobile World .....</b>	 127
Introduction .....	127
A Technology Explosion.....	128
Functionality .....	129
Personal Identification.....	130
Application Catch-Up .....	131
Mobile Futures .....	132
Review Questions.....	132
 <b>10 Human Factors .....</b>	 133
Introduction .....	134
User Psychology.....	134
Age.....	135
Ethnicity .....	137
Health .....	138
Disabilities.....	139
Variability.....	140
Human Factors and Operational Performance .....	141
Shyness and the Self-conscious User.....	142
The Under Protest User.....	142
The Technical Sceptic User .....	143
The Late Arrival User .....	144
The Tired User .....	144
The User on Medication .....	145

The Angry User .....	146
The User with Something to Hide .....	147
The Disabled User .....	147
Inherited Behaviour.....	148
Human Rights Issues.....	149
A Biometric Constitution .....	150
The Biometric Constitution: A First Draft.....	150
Conclusion.....	155
Review Questions.....	155
<b>11 The Politics.....</b>	<b>157</b>
Introduction .....	157
Politics and Technology .....	158
The Supply Chain.....	158
Roles and Responsibilities .....	159
Law Enforcement .....	161
Terrorism and Serious Crime .....	163
Scope Creep .....	166
Societal Development .....	167
Review Questions.....	168
<b>12 The Future .....</b>	<b>169</b>
Introduction .....	170
Trends.....	170
Intelligence and Identity Management .....	170
Virtualisation and the Cloud .....	172
Online Services .....	174
Mobile Technology .....	176
Service Industries.....	177
Systems Design .....	179
Technology Usage.....	181
Challenges.....	182
Complexity.....	183
Security.....	184
Ownership.....	185
Verification and Trust.....	186
Identity Theft .....	187
Review Questions.....	188
<b>13 Epilogue.....</b>	<b>189</b>
<b>Index.....</b>	<b>193</b>

Guide to Biometrics for Large-Scale Systems  
Technological, Operational, and User-Related Factors

Ashbourn, J.

2011, XIII, 201 p., Hardcover

ISBN: 978-0-85729-466-1
