Part I The Theory of Computation

1	Everything Begins with Computation	3
1.1	Computational Barrier	3
1.2	Propriety of Computational Models	8
1.3	Using this Book Efficiently	11
2	Preliminaries to the Theory of Computation	13
2.1	Set	13
2.2	Strings and Languages	15
2.3	Functions and Problems	16
2.4	Relations and Graphs	18
2.5	Boolean Operations and Boolean Formulas	22
2.6	Propositions and Proofs	24
2.7	Descriptions of Algorithms	28
2.8	Problems	31

Part II Automata and Languages

3	Finite Automata	35
3.1	Modeling by Automata	35
3.2	Nondeterministic Finite Automaton	44
3.3	Regular Expression	57
3.4	Properties of Regular Languages	71
3.5	Problems	77
4	Context-Free Languages	81
4.1	Context-Free Grammar	81
4.2	Generating and Accepting	89
4.3	Chomsky Normal Form	92
4.4	Limitation on Generating Power of Context-Free Grammars	96
4.5	Membership Problem for Context-Free Languages	100
4.6	Problems	103
5	Pushdown Automata	107
5.1	Pushdown Automaton	107

5.2	Equivalence of Pushdown Automaton and Context-Free Grammar	117
5.3	Problems	128

Part III Computability

6	Turing Machine	133
6.1	Turing Machine	133
6.2	Variants of Turing Machines	147
6.3	Nondeterministic Turing Machines	152
6.4	Church–Turing Thesis	156
6.5	Problems	157
7	Universality of Turing Machine and Its Limitations	161
7.1	Universal Turing Machine	161
7.2	Undecidability of the Halting Problem	167
7.3	Reduction	171
7.4	Undecidability of Post Correspondence Problem	174
7.5	Problems	180

Part IV Complexity of Computation

8	Computational Complexity Based on Turing Machines	185
8.1	Time Complexity	185
8.2	Problems that Are Solvable in Polynomial Time and those that Have not Been Solved in Polynomial Time	191
8.3	P and NP	196
8.4	Problems	199
9	Computational Complexity Based on Boolean Circuits	201
9.1	Boolean Functions and Boolean Circuits	201
9.2	Finite Functions and Finite Circuits	205
9.3	Boolean Circuit Family to Simulate Deterministic Turing Machine	207
9.4	Finite Circuit Family to Simulate Nondeterministic Turing Machine	214
9.5	Satisfiability Problems	216
9.6	Reducing Circuit Satisfiability Problem to Formula Satisfiability Problem	219
9.7	Problems	224
10	NP-Completeness	227
10.1	NP-Completeness	227
10.2	NP-Complete Problems	228
10.3	Problems	237

Part V Conclusions and Exercise Solutions

11 Solutions 241

 11.1 Chapter 2 241

 11.2 Chapter 3 242

 11.3 Chapter 4 247

 11.4 Chapter 5 255

 11.5 Chapter 6 258

 11.6 Chapter 7 261

 11.7 Chapter 8 262

 11.8 Chapter 9 265

 11.9 Chapter 10 266

12 Concluding Remarks 271

Bibliography 273

References 275
