# Contents

<b>1 Prelude</b>	1
The Seminal Influence of Johann Wolfgang von Goethe [1749–1832]	1
Goethe’s Influence on Alexander and Wilhelm von Humboldt	4
Goethe’s Influence on Johannes Peter Müller	4
The Influence of Alexander von Humboldt on Johannes Peter Müller	5
The Influence of Alexander von Humboldt on Charles Robert Darwin [1809–1882]	6
The Influence of Wilhelm von Humboldt on German University Education	8
The Influence of Johannes Peter Müller [1801–1858] on Rokitansky	10
A Brief Digression into the History of Embryology	11
<b>2 Intellectual Development of Carl Von Rokitansky</b>	13
Emergence of the First Full-Time Anatomical Pathologist	13
Rokitansky’s Research Program – Second Vienna Medical School	19
Deficiency of Müllerian Tissue (1838)	20
Rokitansky’s Autopsy Experience (1828–1844)	23
Rokitansky’s Handbook of Pathological Anatomy	27
Rokitansky’s Historic Trip to Paris in 1842	27
Full Professor at the Height of His Fame	29
Rokitansky’s Handbook of Pathological Anatomy	29
<b>3 Microscopy and the Discovery of Endometriosis and Adenomyosis</b>	39
Emergence of Microscopy in Rokitansky’s Department	39
1860: Discovery of Two New Diseases – Endometriosis and Adenomyosis	44
Two New Diseases with Descriptive Names	49
<b>4 From von Rokitansky to von Recklinghausen to Cullen</b>	57
Rokitansky’s Interest in Developmental Pathology	57
Rokitansky’s Legacy	59
Nosographic Classification of Human Disease Based on Pathologic Anatomy	59

Developmental Pathology to Evolutionary Developmental Biology . . . . .	62
Mayer-Rokitansky-Küster-Hauser Syndrome and Developmental Pathology . . . . .	62
From Rokitansky to von Recklinghausen . . . . .	63
From von Recklinghausen to Cullen . . . . .	70
Robert Meyer Disproves von Recklinghausen's Wolffian Theory . . . . .	80
<b>5 Cullen's Research at Johns Hopkins Hospital. . . . .</b>	<b>87</b>
Cullen's Research at Johns Hopkins Hospital 1898–1906 . . . . .	87
The Mutual Legacy of Friedrich von Recklinghausen and Thomas Cullen . . . . .	92
Uterine Cancer to Flexner Report to Cancer Prevention . . . . .	96
<b>6 Adenomyomas of Vagina, Rectum, Sigmoid Colon, and Ovary . . . . .</b>	<b>103</b>
Extrauterine Adenomyomas. . . . .	103
Adenomyomas of the Ovary . . . . .	123
Casler's Menstruating Ovarian-Uterus. . . . .	124
<b>7 Distribution of Pelvic and Abdominal Adenomyomas . . . . .</b>	<b>127</b>
The Distribution of Adenomyomas Containing Uterine Mucosa . . . . .	127
Uterus. . . . .	130
Rectovaginal Septum . . . . .	131
Uterosacral Ligament. . . . .	134
Sigmoid Colon . . . . .	135
Rectus Muscle . . . . .	136
Ovary . . . . .	137
<b>8 Sampson's Theory of Implantation Endometriosis . . . . .</b>	<b>143</b>
From Cullen to Sampson Via Casler . . . . .	143
A Historical Note by Sampson . . . . .	156
A Historical Announcement by Sampson . . . . .	156
Explication of Sampson's Second Theory . . . . .	158
Implantation Adenomas of Endometrial Type. . . . .	158
Endometrial Hematomas of the Ovary. . . . .	159
Intestinal Adenomas of Endometrial Type. . . . .	162
<b>9 Life History of Ovarian Endometriomas . . . . .</b>	<b>169</b>
Life History of Ovarian Hematomas of Endometrial Type . . . . .	169
President's Address: An Autobiographical Essay . . . . .	177
<b>10 Explication and Defense of Sampson's Theory of Pathogenesis . . . . .</b>	<b>179</b>
Peritoneal Endometriosis Due to Menstrual Dissemination . . . . .	179
Sampson's Implantation Theory . . . . .	189
<b>11 Scientific Objectivity . . . . .</b>	<b>195</b>
The Philosophy of Kant . . . . .	195

---

<b>12 Epilogue</b> .....	201
The Foundational History of Endometriosis .....	201
<b>Appendix I: Glossary of Terms, Definitions and Theories</b> .....	203
<b>Appendix II: English Translations of Carl Rokitansky’s Ueber</b>	
<b>Uterusdrusen-Neubildung in Uterus-und Ovarial Sarcomen</b> .....	209
<b>Bibliography</b> .....	213
<b>Index</b> .....	221
