

Contents

1. What Is Enumeration?	1
1.1 Bijections, Permutations and Sequences	1
1.1.1 Exercises	6
1.2 The Pigeonhole Principle	6
1.2.1 Exercises	7
1.3 The Principle of Inclusion and Exclusion	7
1.3.1 Exercises	13
1.4 The Principle of Exhaustion	13
1.4.1 Exercises	14
2. Generating Functions Count	17
2.1 Counting – from Polynomials to Power Series	17
2.1.1 Exercises	23
2.2 Recurrence Relations and Enumeration	24
2.2.1 Exercises	32
2.3 Sequence to Generating Function	33
2.3.1 Sequence to Generating Function	33
2.3.2 Recurrence to Generating Function	34
2.3.3 Exercises	38
2.4 Miscellaneous Exercises	38
3. Working with Generating Functions	41
3.1 Expanding Generating Functions	41
3.1.1 Exercises	46
3.2 It's the Denominator that Counts	47
3.2.1 Exercises	52

3.3	Solving Linear Homogeneous Recurrences of Degree 2	53
3.3.1	Exercises	56
3.4	Miscellaneous Exercises	57
4.	Permutation Groups	59
4.1	Introduction to Groups	59
4.1.1	Exercises	60
4.2	The Symmetric Group	61
4.2.1	Exercises	68
4.3	Group Actions	69
4.3.1	Exercises	72
4.4	Counting Subgroups	73
4.4.1	Exercises	77
4.5	Miscellaneous Exercises	77
5.	Matrices, Sequences and Sums	79
5.1	Pascal's Triangle and Enumeration	79
5.1.1	Exercises	81
5.2	The Push-Button Lock Sequence	82
5.2.1	Exercises	83
5.3	Pascal's Triangle as a Matrix	84
5.3.1	Exercises	90
5.4	Operations on Generating Functions	91
5.4.1	Multiplication by z^k	91
5.4.2	The Product of Two Generating Functions	92
5.4.3	Partial Sums of a Sequence	93
5.4.4	The $zD \equiv z \frac{d}{dz}$ Operation	95
5.4.5	Exercises	103
5.5	Miscellaneous Exercises	104
6.	Group Actions and Counting	107
6.1	The First Steps	107
6.1.1	Exercises	111
6.2	Colourings and the Cycle Index	112
6.2.1	Exercises	116
6.3	Polya's Theorem	117
6.3.1	Exercises	120
6.4	Miscellaneous Exercises	120

7. Exponential Generating Functions	123
7.1 Another Generating Function	123
7.1.1 Exercises	126
7.2 Recurrence to <i>egf</i>	127
7.2.1 Exercises	129
7.3 Operations on <i>egfs</i>	129
7.3.1 Differentiation	129
7.3.2 Products of Exponential Generating Functions	131
7.3.3 Expanding <i>egfs</i>	133
7.3.4 Exercises	134
7.4 Counting Fixed Points in Permutations	135
7.5 Counting more Permutations	140
7.5.1 Counting Involutions	141
7.5.2 Counting Zig-Zag Permutations	145
7.5.3 Exercises	148
7.6 Miscellaneous Exercises	148
8. Graphs	151
8.1 Introduction to Graphs	151
8.1.1 Exercises	157
8.2 Connectivity	158
8.2.1 Exercises	162
8.3 Counting Graphs and Trees	163
8.3.1 Counting Labelled Graphs and Trees	163
8.3.2 Counting Unlabelled Graphs	167
8.3.3 Exercises	172
8.4 Planarity	172
8.4.1 Exercises	174
8.5 Miscellaneous Exercises	175
9. Partitions and Paths	177
9.1 Introducing Partitions	177
9.1.1 Unrestricted Partitions	181
9.1.2 Distinct Partitions	182
9.1.3 Odd Partitions	183
9.1.4 Relations Between Different Partitions	183
9.1.5 Ferrers Diagram	185
9.1.6 Partition Recurrences	186
9.1.7 Exercises	189
9.2 Triangular Partitions of a Polygon	191
9.2.1 Exercises	194
9.3 Paths in a Lattice Plane	194

9.3.1	Central Binomial Coefficients	197
9.3.2	Catalan Numbers	198
9.3.3	Exercises	201
9.4	Miscellaneous Exercises	202
A.	Library	205
	Solutions	209
	Bibliography	231
	Index	233

An Introduction to Enumeration

Camina, A.; Lewis, B.

2011, XII, 232 p. 62 illus., Softcover

ISBN: 978-0-85729-599-6
