

Contents

1	Introduction	1
1.1	Rotation Transforms	1
1.2	The Reader	1
1.3	Aims and Objectives of This Book	1
1.4	Mathematical Techniques	2
1.5	Assumptions Made in This Book	2
2	Number Sets and Algebra	3
2.1	Introduction	3
2.2	Number Sets	3
2.2.1	Natural Numbers	3
2.2.2	Real Numbers	3
2.2.3	Integers	4
2.2.4	Rational Numbers	4
2.3	Arithmetic Operations	4
2.4	Axioms	5
2.5	Expressions	6
2.6	Equations	7
2.7	Ordered Pairs	7
2.8	Groups, Rings and Fields	8
2.8.1	Groups	8
2.8.2	Abelian Group	10
2.8.3	Rings	10
2.8.4	Fields	10
2.8.5	Division Ring	11
2.9	Summary	11
2.9.1	Summary of Definitions	11
3	Complex Numbers	13
3.1	Introduction	13
3.2	Imaginary Numbers	13
3.3	Powers of i	13

3.4	Complex Numbers	15
3.5	Adding and Subtracting Complex Numbers	16
3.6	Multiplying a Complex Number by a Scalar	16
3.7	Complex Number Products	16
3.7.1	Square of a Complex Number	17
3.8	Norm of a Complex Number	17
3.9	Complex Conjugate	18
3.10	Quotient of Two Complex Numbers	18
3.11	Inverse of a Complex Number	19
3.12	Square-Root of i	19
3.13	Field Structure	21
3.14	Ordered Pairs	21
3.14.1	Multiplying by a Scalar	22
3.14.2	Complex Conjugate	23
3.14.3	Quotient	23
3.14.4	Inverse	23
3.15	Matrix Representation of a Complex Number	24
3.15.1	Adding and Subtracting	25
3.15.2	The Product	25
3.15.3	The Square of the Norm	25
3.15.4	The Complex Conjugate	25
3.15.5	The Inverse	26
3.15.6	Quotient	26
3.16	Summary	27
3.16.1	Summary of Operations	27
3.17	Worked Examples	29
4	The Complex Plane	33
4.1	Introduction	33
4.2	Some History	33
4.3	The Complex Plane	34
4.4	Polar Representation	37
4.5	Rotors	41
4.6	Summary	42
4.6.1	Summary of Operations	42
4.7	Worked Examples	43
5	Quaternion Algebra	47
5.1	Introduction	47
5.2	Some History	49
5.3	Defining a Quaternion	53
5.3.1	The Quaternion Units	55
5.3.2	Example of Quaternion Products	56
5.4	Algebraic Definition	56
5.5	Adding and Subtracting Quaternions	57
5.6	Real Quaternion	57

5.7	Multiplying a Quaternion by a Scalar	57
5.8	Pure Quaternion	58
5.9	Unit Quaternion	59
5.10	Additive Form of a Quaternion	60
5.11	Binary Form of a Quaternion	60
5.12	The Conjugate	61
5.13	Norm of a Quaternion	62
5.14	Normalised Quaternion	62
5.15	Quaternion Products	63
5.15.1	Product of Pure Quaternions	63
5.15.2	Product of Two Unit-Norm Quaternions	63
5.15.3	Square of a Quaternion	64
5.15.4	Norm of the Quaternion Product	65
5.16	Inverse Quaternion	65
5.17	Matrices	67
5.17.1	Orthogonal Matrix	67
5.18	Quaternion Algebra	68
5.19	Summary	68
5.19.1	Summary of Operations	69
5.20	Worked Examples	70
6	3D Rotation Transforms	73
6.1	Introduction	73
6.2	3D Rotation Transforms	73
6.3	Rotating About a Cartesian Axis	73
6.4	Rotate About an Off-Set Axis	74
6.5	Composite Rotations	75
6.6	Rotating About an Arbitrary Axis	78
6.6.1	Matrices	78
6.6.2	Vectors	80
6.7	Summary	83
6.7.1	Summary of Transforms	83
6.8	Worked Examples	84
7	Quaternions in Space	89
7.1	Introduction	89
7.2	Some History	90
7.2.1	Composition Algebras	91
7.3	Quaternion Products	93
7.3.1	Special Case	93
7.3.2	General Case	97
7.4	Quaternions in Matrix Form	101
7.4.1	Vector Method	101
7.4.2	Matrix Method	103
7.4.3	Geometric Verification	106
7.5	Multiple Rotations	108

7.6	Eigenvalue and Eigenvector	110
7.7	Rotating About an Off-Set Axis	111
7.8	Frames of Reference	113
7.9	Interpolating Quaternions	114
7.10	Converting a Rotation Matrix to a Quaternion	118
7.11	Euler Angles to Quaternion	120
7.12	Summary	123
7.12.1	Summary of Operations	123
7.13	Worked Examples	125
8	Conclusion	131
	Appendix. Eigenvectors and Eigenvalues	133
	References	137
	Index	139

Quaternions for Computer Graphics

Vince, J.

2011, XIV, 140 p., Hardcover

ISBN: 978-0-85729-759-4
