

Contents

- 1 Machine Vision Systems 1**
- 2 Optical Flow Estimation 5**
 - 2.1 Optical Flow and Optical Aperture 5
 - 2.2 Feature-Based Optical Flow Approaches 7
 - 2.2.1 Census Based Optical Flow 8
 - 2.2.2 The Optical Flow Constraint 9
 - 2.2.3 Lucas–Kanade Method 10
 - 2.3 Variational Methods 11
 - 2.3.1 Total Variation Optical Flow 13
 - 2.3.2 Quadratic Relaxation 14
 - 2.3.3 Large Displacement Flow: Novel Algorithmic Approaches 15
 - 2.3.4 Other Optical Flow Approaches 17
 - 2.4 The Flow Refinement Framework 17
 - 2.4.1 Data Term Optimization 18
 - 2.4.2 Smoothness Term Evaluation 24
 - 2.4.3 Implementation Details 30
- 3 Residual Images and Optical Flow Results 35**
 - 3.1 Increasing Robustness to Illumination Changes 35
 - 3.2 Quantitative Evaluation of the Refinement Optical Flow 38
 - 3.2.1 Performance 38
 - 3.2.2 Smoothness Filters 42
 - 3.2.3 Accuracy 44
 - 3.3 Results for Traffic Scenes 45
 - 3.4 Conclusion 48
- 4 Scene Flow 51**
 - 4.1 Visual Kinesthesia 51
 - 4.1.1 Related Work 53
 - 4.1.2 A Decoupled Approach for Scene Flow 53

4.2	Formulation and Solving of the Constraint Equations	55
4.2.1	Stereo Computation	55
4.2.2	Scene Flow Motion Constraints	57
4.2.3	Solving the Scene Flow Equations	59
4.2.4	Evaluation with Different Stereo Inputs	59
4.3	From Image Scene Flow to 3D World Scene Flow	61
5	Motion Metrics for Scene Flow	65
5.1	Ground Truth vs. Reality	65
5.2	Derivation of a Pixel-Wise Accuracy Measure	66
5.2.1	A Quality Measure for the Disparity	67
5.2.2	A Quality Measure for the Scene Flow	73
5.2.3	Estimating Scene Flow Standard Deviations	74
5.3	Residual Motion Likelihood	75
5.4	Speed Likelihood	77
6	Extensions of Scene Flow	81
6.1	Flow Cut—Moving Object Segmentation	81
6.1.1	Segmentation Algorithm	83
6.1.2	Deriving the Motion Likelihoods	85
6.1.3	Experimental Results and Discussion	88
6.2	Kalman Filters for Scene Flow Vectors	92
6.2.1	Filtered Flow and Stereo: 6D-Vision	92
6.2.2	Filtered Dense Optical Flow and Stereo: Dense-6D	94
6.2.3	Filtered Variational Scene Flow: Variational-6D	95
6.2.4	Evaluation with Ground Truth Information	96
6.2.5	Real-World Results	98
7	Conclusion and Outlook	99
8	Appendix: Data Terms and Quadratic Optimization	101
8.1	Optical Flow Constraint Data Term	101
8.2	Adaptive Fundamental Matrix Constraint	101
8.3	Quadratic Optimization via Thresholding	103
8.3.1	Karush–Kuhn–Tucker (KKT) Conditions	103
8.3.2	Single Data Term	104
8.3.3	Two Data Terms	106
9	Appendix: Scene Flow Implementation Using Euler–Lagrange Equations	111
9.1	Minimization of the Scene Flow Energy	111
9.2	Implementation of Scene Flow	113
	Glossary	119
	References	121

Stereo Scene Flow for 3D Motion Analysis

Wedel, A.; Cremers, D.

2011, IX, 128 p. 74 illus., 60 illus. in color., Hardcover

ISBN: 978-0-85729-964-2
