# Contents

<b>Foreword by Preda Mihăilescu</b> .....	ix
<b>Acknowledgments</b> .....	xv
<b>1 Introduction</b> .....	1
1.1 Basic notions .....	1
1.2 Basic methods to compute the greatest common divisor .....	4
1.2.1 The Euclidean algorithm .....	5
1.2.2 Blankinship's method .....	5
1.3 The fundamental theorem of arithmetic .....	6
1.4 Rational and irrational numbers .....	8
<b>2 Arithmetic functions</b> .....	15
2.1 Basic definitions .....	15
2.2 The Möbius function .....	16
2.3 The Euler function .....	20
2.4 The $\tau$ -function .....	24
2.5 The generalized $\sigma$ -function .....	26
<b>3 Perfect numbers, Fermat numbers</b> .....	29
3.1 Perfect numbers .....	29
3.1.1 Related open problems .....	31
3.2 Fermat numbers .....	32
3.2.1 Some basic properties .....	32
<b>4 Congruences</b> .....	37
4.1 Basic theorems .....	37
<b>5 Quadratic residues</b> .....	51
5.1 Introduction .....	51

5.2	Legendre's symbol .....	56
5.2.1	The law of quadratic reciprocity .....	62
5.3	Jacobi's symbol .....	70
5.3.1	An application of the Jacobi symbol to cryptography ..	77
<b>6</b>	<b>The <math>\pi</math>- and li-functions</b> .....	79
6.1	Basic notions and historical remarks .....	79
6.2	Open problems concerning prime numbers .....	82
<b>7</b>	<b>The Riemann zeta function</b> .....	83
7.1	Definition and Riemann's paper .....	83
7.2	Some basic properties of the $\zeta$ -function .....	84
7.2.1	Applications .....	95
<b>8</b>	<b>Dirichlet series</b> .....	99
8.1	Basic notions .....	99
<b>9</b>	<b>Special topics</b> .....	103
9.1	The harmonic series of prime numbers .....	103
9.2	Lagrange's four-square theorem .....	112
9.3	Bertrand's postulate .....	120
9.4	An inequality for the $\pi$ -function .....	129
9.5	Some diophantine equations .....	137
9.6	Fermat's two-square theorem .....	143
<b>10</b>	<b>Problems</b> .....	147
<b>11</b>	<b>Solutions</b> .....	163
<b>12</b>	<b>Appendix</b> .....	291
12.1	Prime number theorem .....	291
12.2	A brief history of Fermat's last theorem .....	306
12.3	Catalan's conjecture .....	310
	<b>References</b> .....	317
	<b>Index of Symbols</b> .....	321
	<b>Index</b> .....	323

Problem-Solving and Selected Topics in Number Theory  
In the Spirit of the Mathematical Olympiads

Rassias, M.T.

2011, XIV, 324 p.,

ISBN: 978-1-4419-0495-9
