

Contents

1	Transparent Conductors	1
	David S. Ginley and John D. Perkins	
2	Electronic Structure of Transparent Conducting Oxides	27
	J. Robertson and B. Falabretti	
3	Modeling, Characterization, and Properties of Transparent Conducting Oxides	51
	Timothy J. Coutts, David L. Young, and Timothy A. Gessert	
4	Characterization of TCO Materials	111
	David C. Paine, Burag Yaglioglu, and Joseph Berry	
5	In Based TCOs	149
	Yuzo Shigesato	
6	Transparent Conducting Oxides Based on Tin Oxide	171
	Robert Kykyneshi, Jin Zeng, and David P. Cann	
7	Transparent Conductive Zinc Oxide and Its Derivatives	193
	Klaus Ellmer	
8	Ternary and Multinary Materials: Crystal/Defect Structure–Property Relationships	265
	Thomas O. Mason, Steven P. Harvey, and Kenneth R. Poeppelmeier	
9	Chemistry of Band Structure Engineering	295
	Art Sleight	

10	Non-conventional Materials	313
	Hideo Hosono	
11	Applications of Transparent Conductors to Solar Energy and Energy Efficiency	353
	Claes G. Granqvist	
12	Nanostructured TCOs (ZnO, TiO₂, and Beyond)	425
	Dana C. Olson and David S. Ginley	
13	Transparent Amorphous Oxide Semiconductors for Flexible Electronics	459
	Hideo Hosono	
14	Junctions	489
	Hiromichi Ohta	
15	Process Technology and Industrial Processes	507
	Mamoru Mizuhashi	
Index	527

Handbook of Transparent Conductors

Ginley, D.; Hosono, H.; Paine, D.C. (Eds.)

2011, XIV, 534 p. 107 illus. in color., Hardcover

ISBN: 978-1-4419-1637-2
