Part I Dynamic Spectrum Access

1	Distributed Consensus-Based Cooperative Spectrum Sensing in Cognitive Radio Mobile Ad Hoc Networks	3
	F. Richard Yu, Helen Tang, Minyi Huang, Peter Mason, and Zhiqiang Li	
1.1	Introduction	3
1.2	Background	5
1.2.1	Introduction of Spectrum Sensing in Cognitive Radio	5
1.2.2	Mobile Ad Hoc Networks	9
1.2.3	Distributed Consensus-Based Cooperative Spectrum Sensing Scheme	10
1.3	Secondary Users Network Modeling	11
1.3.1	Network Topology in Distributed Consensus-Based Cooperative Spectrum Sensing	11
1.3.2	The Spectrum Sensing Model	12
1.3.3	The Network Model and Consensus Notions	15
1.4	Distributed Consensus-Based Cooperative Spectrum Sensing in Fixed Graphs	16
1.4.1	The Consensus Algorithm	16
1.4.2	Performance of the Consensus Algorithm	18
1.5	Distributed Consensus-Based Cooperative Spectrum Sensing in Random Graphs	19
1.5.1	Random Graph Modeling of the Network Topology	19
1.5.2	The Algorithm with Random Graphs	19
1.6	Simulation Results and Discussions	22
1.6.1	Distributed Consensus-Based Cooperative Spectrum Sensing	22
1.6.2	Scenario Two	27
1.7	Conclusion	33
	References	34

2	On the Spectrum Handoff for Cognitive Radio Ad Hoc Networks Without Common Control Channel	37
	Yi Song and Jiang Xie	
2.1	Introduction	38
2.1.1	Spectrum Handoff in Cognitive Radio Networks	38
2.1.2	Common Control Channel in Cognitive Radio Networks	39
2.1.3	Channel Selection in Cognitive Radio Networks	40
2.1.4	Analytical Model for Spectrum Handoff in Cognitive Radio Networks	40
2.1.5	Contributions	41
2.1.6	Organization	42
2.2	Network Coordination and Assumptions	42
2.2.1	Single Rendezvous Coordination Scheme	42
2.2.2	Multiple Rendezvous Coordination Scheme	43
2.2.3	Network Assumptions	44
2.3	Proactive Spectrum Handoff Protocol	45
2.3.1	Proposed Spectrum Handoff Criteria and Policies	45
2.3.2	Proposed Spectrum Handoff Protocol Details	46
2.4	Distributed Channel Selection Algorithm	49
2.4.1	Procedure of the Proposed Channel Selection Algorithm	49
2.4.2	Fairness and Scalability of the Proposed Channel Selection Scheme	51
2.5	Performance Evaluation of the Proposed Proactive Spectrum Handoff Framework	52
2.5.1	Simulation Setup	52
2.5.2	The Proposed Proactive Spectrum Handoff Scheme	54
2.5.3	The Proposed Distributed Channel Selection Scheme	60
2.6	The Proposed Three Dimensional Discrete-time Markov Model	63
2.6.1	The Proposed Markov Model	63
2.6.2	Derivation of Steady-State Probabilities	64
2.6.3	The Probability That at Least One Channel Is Idle	68
2.6.4	Results Validation	69
2.6.5	The Impact of Spectrum Sensing Delay	70
2.7	Conclusion	72
	References	72
3	Environment–Mobility Interaction Mapping for Cognitive MANETs	75
	Irene Macaluso, Timothy K. Forde, Oliver Holland, and Keith E. Nolan	
3.1	Introduction	75
3.2	The MANET as a Cognitive Network	76
3.3	Mobility Perturbs the MANET	79

3.4	MANET Planning In Spite of Mobility	81
3.5	Environment–Mobility Interaction Mapping	84
3.6	Concluding Discussion	87
	References	88
4	Spectrum Sharing in DS-CDMA/OFDM	
	Wireless Mobile Networks	91
	Keivan Navaie, Halim Yanikomeroglu, Mohammad G. Khoshkholgh, Ahmad R. Sharafat, and Hamidreza Nikoofar	
4.1	Introduction	91
4.2	System Model	93
4.3	Impact of Primary Service Activity	95
4.4	Opportunistic Spectrum Sharing in DS-CDMA/OFDM Systems: Basic Definitions	100
4.5	Single Secondary Service User	103
	4.5.1 Uniform Sub-channel Selection	103
	4.5.2 Non-uniform Sub-channel Selection	106
4.6	Multiple Secondary Service Users	115
	4.6.1 Uniform Sub-channel Selection	115
	4.6.2 Non-uniform Sub-channel Selection	116
	4.6.3 Impact of Intersecondary Service Interference	116
	4.6.4 Multiple Sub-channel Selection	117
4.7	Numerical Studies	119
	4.7.1 Comparing Sub-channel Selection Policies	119
	4.7.2 Impact of Multiple Secondary Users	122
4.8	Conclusions	124
	References	124

Part II Medium Access Control

5	CREAM-MAC: Cognitive Radio-Enabled Multi-channel MAC	
	for Wireless Networks	129
	Xi Zhang and Hang Su	
5.1	Introduction	129
5.2	Related Works	131
5.3	The System Models	132
	5.3.1 Primary Users' Behaviors	132
	5.3.2 The Spectrum Sensing Model	133
	5.3.3 Channel Aggregating Technique	134
5.4	The Proposed CREAM-MAC Protocol	134
	5.4.1 Protocol Overview	134
	5.4.2 The Maximum Allowable Transmission Duration for SUs	137
	5.4.3 The Selection of Licensed Channels	137

5.4.4	Channel Contention	138
5.4.5	Channel Negotiation	138
5.4.6	Data Transmissions	139
5.4.7	The Distributed Spectrum Sensing Scheme	140
5.5	Throughput Analysis for the Saturation Network Case	143
5.5.1	The Analysis for the Licensed Data Channels	143
5.5.2	The Analysis for the Control Channels	144
5.5.3	The Aggregate Throughput	146
5.6	Performance Analysis for the Special Non-saturation Network Case	148
5.7	Performance Evaluations	152
5.8	Conclusions	156
	References	157
6	Cognitive MAC Protocol with Transmission Tax: Probabilistic Analysis and Performance Improvements	159
	Vojislav B. Mišić and Jelena Mišić	
6.1	Introduction	159
6.2	The Transmission Tax-Based Protocol	162
6.3	Modeling the Protocol	164
6.4	Packet Service Cycle and Access Delay	166
6.5	Model of the Sensing Process	167
6.6	Performance of the Original Protocol	170
6.7	Can Channel Ordering Improve Sensing Accuracy?	174
6.8	Adapting the Transmission Tax	175
6.9	Conclusion	178
	References	179

Part III Topology Control and Routing

8 Topology Control and Routing in Cognitive Radio Mobile

Ad Hoc Networks	209	
Quansheng Guan, F. Richard Yu, and Shengming Jiang		
8.1	Introduction	209
8.2	Topology Control and Routing	210
8.2.1	Topology Control	210
8.2.2	Routing	212
8.2.3	Discussions	213
8.3	A Prediction-Based Cognitive Topology Control in CR-MANETs	214
8.3.1	Cognitive Link Availability Prediction	215
8.3.2	Cognitive Topology Control and Routing	216
8.3.3	Results and Discussions	219
8.4	Conclusions	221
References	222

Part V Applications of Cognitive Radio Mobile Ad Hoc Networks

12 An Adaptive WiFi/WiMAX Networking Platform for Cognitive Vehicular Networks 311

Dusit Niyato, Ekram Hossain, and Teerawat Issariyakul

12.1 Introduction 311

12.1.1 Wireless Technologies 312

12.1.2 Transmission Strategies 313

12.1.3	Medium Access Control Protocols	313
12.1.4	Distributed Decision-Making Framework	314
12.2	Cognitive Vehicular Networks: Related Work	315
12.3	Distributed Decision Making	317
12.3.1	Evolutionary Game Theory	317
12.3.2	Reinforcement Learning	319
12.3.3	Reinforcement Learning and Evolutionary Game Theory	320
12.4	Adaptive WiFi/WiMAX Networking Platform	321
12.4.1	Network Model	321
12.4.2	Decision-Making Framework	322
12.5	Hierarchical Game Formulation for Distributed Decision Making Framework	323
12.5.1	Gateway Selection by Client Nodes	324
12.5.2	Price Competition Among Gateway Nodes	324
12.5.3	Role Selection by Vehicular Nodes	326
12.6	Performance Evaluation	327
12.6.1	Gateway Selection	327
12.6.2	Gateway Selection and Price Competition	328
12.6.3	Individual Net Utility of Gateway and Client	329
12.6.4	Total Net Utility and Total End-to-End Bandwidth	330
12.6.5	Number of Gateways Under Different Vehicle Speeds	331
12.7	Conclusion	332
