

1	Introduction	1
	Tools	3
	Absolutely Necessary	3
	Very Helpful or Necessary for Particular Tasks	3
	Nice to Have	3
	Ergonomics	5
	What's Not Included in this Book	5
	General Advice	6
	Safety Tips	6
2	To Buy or Build a Telescope	9
3	Telescope Types and Designs	19
	Telescope Types	19
	Reflector Telescopes	19
	Refractor Telescopes	21
	Telescope Design Considerations	22
	A Real Simple Telescope	27
4	Build a Good Copyscope	33
	The Small Copyscope	33
	Optical Parts	33
	Mechanical Parts	34
	The Medium Copyscope	35
	Optical Parts	35
	Mechanical Parts	35
	The Large Copyscope	36
	Optical Parts	36

Mechanical Parts	38
How to Make Your Copyscope	38
Focal Length	38
Alignment	40
Mounting a Copyscope	42
5 The 80 mm Refractor	45
Telescope Description and Capabilities	45
Specifications and Components	46
6 Newtonian Telescopes	57
Typical Newtonian Telescopes	57
The Objective Mirror	59
Mirror Mounting	64
A Spider in Your Telescope	65
Mirror Cells	68
Simple Collimation	70
7 The F17 4-Inch Refractor	73
The Rotating Star Diagonal	74
The Back Two Bulkheads	75
The Diagonal Mirror	77
Mounting the Refractor Using a Cradle	81
8 Focusers, Eyepieces, Barlows, and Finders	83
Focusers	83
Telescoping Tubes	84
Rack and Pinion Design	85
Helical Design	85
Crayford Design	86
Eyepieces	87
Eye Relief	87
Exit Pupil	88
Achromats	89
Very Modern Wide Angle Eyepieces	90
Compound Projection and Camera Lenses	91
Barlow Lenses	92
Image Inverter (Erecting Lens)	93
Finders	93
Requirements for a Workable Finder Scope	94
Satisfying the Finder Requirements	95
Peep Sight Finder	98
Laser Pointer as a Finder	99
9 Tubes	101
Closed Tube Approaches	102
Wooden Tubes	103

Getting Started	103
Assembly of the Tube	106
Using Gussets	107
Wood Tubes Without Gussets	110
Open Tubes	111
Truss Tubes	112
10 Building a 12.5-Inch Newtonian with Rotating Cage	113
Dimensions of the Tube (Box)	114
Diagonal	119
Spider	120
Upper Tube Rotation	121
Doughnuts to Preserve Alignment	121
Stabilizers	123
Mounting	124
11 Ergonomic Mounts	127
Mounting Types	127
Supports	128
Balance and Moment	129
Wedges	132
An Ergonomic Altazimuth Mount	133
12 Evaluation, Quality Testing, and Optical Aberrations	137
How Good Does It Need to Be?	137
Common Faults	138
Focal Length	139
Quality Testing	139
Possible Construction Problems	140
Lenses	140
Mirrors	141
Mirror Reflective Coatings	142
Optical Quality Terminology	142
Wavelength-Based Measurements	143
Rays and Waves	143
Scratch and Dig Optical Surface Specifications	146
Scatter (Spot) Diagrams	146
Strehl Ratio	146
Quality of “Flat” Mirrors	148
Testing a Flat	148
Optical Aberrations	149
Quick and Easy Tests	152
13 Junk Collecting and Working with Modern Materials	153
Junk Collection (Creative Cross Utilization)	153
Lens Restoration/Used Lenses	155
Lens Cementing	155

Getting a Lens Apart	156
Polishing and Coating Ideas	157
No Drag, No Progress	158
How Long Will It Take?	158
Lap Making	160
Working with PVC Pipe	161
PVC Eyepiece Canisters	163
For N Canisters	163
Other Uses for PVC	163
Aligning Parts	163
Telescope Mounts	165
Lens Cells	165
Retaining Rings	165
Floor Underlay	166
Glues and Cements	166
Appendix I Web Suppliers of Telescope Building Parts	
and Materials	169
Alphabetical Listing of Suppliers	170
Products	186
Supplier Codes by Product	188
Appendix II Telescope-Building Books and Websites	193
Book Must-Haves	193
Magazines	194
Websites	194
Appendix III Polishing Log	197
Appendix IV Units and Conversions	199
General Conversions	199
Wood Stock and Hardware Conversions	199
European Plywood Standards	199
Timber	200
Hardware	200
Index	201
