

Table of Contents

1	Introduction	1
1.1	The Supply Chain and Logistics Domains	1
1.2	Logistics Planning and Decisions Support	9
1.3	Summary and Conclusions	13
1.4	Exercises	13
	References	14
2	Engineering Planning and Design	15
2.1	Engineering Design and Design Process	15
2.2	Modeling	20
2.3	Algorithms	49
2.4	Summary and Conclusions	57
2.5	Exercises	57
	References	58
3	Forecasting	61
3.1	Introduction	61
3.2	Classification of Forecasting Methods	64
3.3	Forecast Quality and Performance Measures	67
3.4	Forecasting Software	72
3.5	Summary	72
3.6	Exercises	73
	References	73
4	Time Series Analysis	75
4.1	Time Series Characteristics	75
4.2	Constant Data Pattern	77
4.3	Trend Data Pattern	87
4.4	Seasonal Data Pattern	97
4.5	Summary	120
4.6	Exercises	120
	References	126

5	Transportation Systems	127
5.1	Introduction	127
5.2	Transportation Modes and Infrastructure	133
5.3	Transportation Documents and Contract Terms	150
5.4	Exercises	152
	References	153
6	Single Flow Routing Through a Network	155
6.1	Vehicle Routing Systems Classification	155
6.2	Single Vehicle Origin–Destination Routing	156
6.3	Exercises	178
	References	180
7	Routing Multiple Flows Through a Network	181
7.1	Introduction	181
7.2	Network Variants and Applications	184
7.3	Network Solution Algorithms	188
7.4	Minimum Cost Network Flow Formulation	207
7.5	Exercises	211
	References	212
8	Single-Vehicle Roundtrip Routing	213
8.1	Introduction	213
8.2	Simple TSP Heuristics	224
8.3	Optimization Based Heuristics	251
8.4	Tours Software Illustration	260
8.5	Exercises	260
	References	268
9	Vehicle Routing and Scheduling	271
9.1	Introduction	271
9.2	Classic Vehicle Routing (VRP)	274
9.3	Vehicle Routing with Backhauling (VRPB)	332
9.4	Vehicle Routing Problem with Time Windows (VRPTW)	365
9.5	Fleet Sizing and Fleet Mix	368
9.6	Exercises	373
	Appendix A Extended VRP Example (VRP16)	382
	References	429
10	Inventory Systems	431
10.1	Introduction	431
10.2	Independent Demand Systems	442
10.3	Dependent Demand Systems	480
10.4	Exercises	483
	Appendix A Expected Lost Sales for Discrete Distribution Function	488

Appendix B Optimal (s,Q) Policy for Service Level 2	490
References	493
11 Supply Chain Systems	495
11.1 Introduction	495
11.2 Supply Chain Design Objectives	497
11.3 Supply Chain Objects and their Characteristics	503
11.4 Information Technology	516
11.5 Exercises	519
References	520
12 Supply Chain Models	521
12.1 Introduction	521
12.2 Distribution Channel Selection	529
12.3 Tactical Supply Chain Planning	540
12.4 Continuous Location Model	547
12.5 Discrete Supply Chain Models	556
12.6 Geoffrion and Graves Distribution Model	569
12.7 Multi-Echelon Supply Chain Model	571
12.8 Conclusions	576
12.9 Exercises	577
Appendix 12.A Continuous Point Location Based on the Euclidean Distance Norm	587
Appendix 12.B AMPL Model for the WLP	603
Appendix 12.C AMPL Implementation of the G&G Model	605
Appendix 12.D AMPL Implementation of the Multi-Echelon Model ...	607
References	611
13 Advanced Supply Chain Models	615
13.1 Introduction	615
13.2 Strategic Single-Country Supply Chain Design	617
13.3 Strategic Global Supply Chain Design	634
13.4 Strategic Robust Supply Chain Design Incorporating Uncertainty	642
13.5 Conclusions	663
13.6 Exercises	664
References	668
Appendix A Standard Distributions	671
A.1 Cumulative Normal Distribution	671
A.2 Unit Loss Function	673
Index	675
