

Contents

1	Complete and Exact Peptide Sequence Analysis Based on Propositional Logic	1
	Renato Bruni	
2	Divide and Conquer Strategies for Protein Structure Prediction	23
	Pietro Di Lena, Piero Fariselli, Luciano Margara, Marco Vassura, and Rita Casadio	
3	Secondary Structure Classification of Isoform Protein Markers in Oncology	47
	Gregorio Patrizi, Claudio Cifarelli, Valentina Losacco, and Giacomo Patrizi	
4	Protein Fold Recognition Using Markov Logic Networks	69
	Marenglen Biba, Stefano Ferilli, and Floriana Esposito	
5	Mining Spatial Association Rules for Composite Motif Discovery	87
	Michelangelo Ceci, Corrado Loglisci, Eliana Salvemini, Domenica D’Elia, and Donato Malerba	
6	Modeling Biochemical Pathways	111
	Ettore Mosca and Luciano Milanesi	
7	Haplotype Inference Using Propositional Satisfiability	127
	Ana Graça, João Marques-Silva, and Inês Lynce	
8	Estimating Phylogenies from Molecular Data	149
	Daniele Catanzaro	

9	Population Stratification Analysis in Genome-Wide Association Studies	177
	Erika Salvi, Alessandro Orro, Guia Guffanti, Sara Lupoli, Federica Torri, Cristina Barlassina, Steven Potkin, Daniele Cusi, Fabio Macciardi, and Luciano Milanese	
10	Predicting and Measuring the Sequence Distribution of Addition Polymers	197
	Maurizio S. Montaudou	
11	Predicting and Measuring the Sequence Distribution of Condensation Polymers	227
	Maurizio S. Montaudou	
	Index	247

Mathematical Approaches to Polymer Sequence
Analysis and Related Problems

Bruni, R. (Ed.)

2011, X, 248 p., Hardcover

ISBN: 978-1-4419-6799-2
