<b>Preface</b> .....	V	
<b>1</b>	<b>Introduction and Overview</b> .....	1
	1.1 How to Define $\int_a^b f \, dg$ ? .....	2
	1.2 Some Integral and Differential Equations .....	7
	1.3 Basic Assumptions .....	9
	1.4 Notation and Elementary Notions .....	10
<b>2</b>	<b>Definitions and Basic Properties of Extended Riemann–Stieltjes Integrals</b> .....	17
	2.1 Regulated and Interval Functions .....	17
	2.2 Riemann–Stieltjes Integrals .....	24
	2.3 The Refinement Young–Stieltjes and Kolmogorov Integrals .....	29
	2.4 Relations between $RS$ , $RRS$ , and $RYS$ Integrals .....	46
	2.5 The Central Young Integral .....	51
	2.6 The Henstock–Kurzweil Integral .....	56
	*2.7 Ward–Perron–Stieltjes and Henstock–Kurzweil Integrals .....	62
	2.8 Properties of Integrals .....	71
	2.9 Relations between Integrals .....	87
	2.10 Banach-Valued Contour Integrals and Cauchy Formulas .....	90
	2.11 Notes .....	98
<b>3</b>	<b><math>\Phi</math>-variation and <math>p</math>-variation; Inequalities for Integrals</b> .....	103
	3.1 $\Phi$ -variation .....	103
	3.2 Interval Functions, $\Phi$ -variation, and $p$ -variation .....	116
	3.3 Elementary Properties .....	127
	*3.4 A Necessary and Sufficient Condition for Integral Duality .....	148
	3.5 Sufficient Conditions for Integrability .....	168
	3.6 Love–Young Inequalities .....	173

3.7	Existence of Extended Riemann–Stieltjes Integrals . . . .	191
3.8	Convolution and Related Integral Transforms . . . . .	196
3.9	Notes . . . . .	211
<b>4</b>	<b>Banach Algebras . . . . .</b>	<b>215</b>
4.1	Ideals and Normed Algebras . . . . .	216
4.2	The Spectral Radius . . . . .	219
4.3	Characters . . . . .	222
4.4	Holomorphic Functions of Banach Algebra Elements . .	225
4.5	Complexification of Real Banach Algebras . . . . .	231
4.6	A Substitution Rule for the Kolmogorov Integral . . . .	233
4.7	Notes . . . . .	234
<b>5</b>	<b>Derivatives and Analyticity in Normed Spaces . . . .</b>	<b>237</b>
5.1	Polynomials and Power Series . . . . .	239
5.2	Higher Order Derivatives and Taylor Series . . . . .	251
5.3	Taylor’s Formulas . . . . .	264
5.4	Tensor Products of Banach Spaces . . . . .	269
5.5	Notes . . . . .	270
<b>6</b>	<b>Nemytskii Operators on Some Function Spaces . . . .</b>	<b>273</b>
6.1	Overview . . . . .	273
6.2	Remainders in Differentiability . . . . .	274
6.3	Higher Order Differentiability and Analyticity . . . . .	276
6.4	Autonomous Nemytskii Operators on $\mathcal{W}_p$ Spaces . . . .	293
6.5	Nemytskii Operators on $\mathcal{W}_p$ Spaces . . . . .	300
6.6	Higher Order Differentiability and Analyticity on $\mathcal{W}_p$ Spaces . . . . .	323
6.7	Notes . . . . .	333
<b>7</b>	<b>Nemytskii Operators on <math>L^p</math> Spaces . . . . .</b>	<b>335</b>
7.1	Acting, Boundedness, and Continuity Conditions . . . .	335
7.2	Hölder Properties . . . . .	347
7.3	Differentiability . . . . .	354
7.4	Higher Order Differentiability and Finite Taylor Series .	368
7.5	Examples where $N_F$ Is Differentiable and $F$ Is Not . . .	378
7.6	Notes . . . . .	390
<b>8</b>	<b>Two-Function Composition . . . . .</b>	<b>393</b>
8.1	Overview; General Remarks . . . . .	393
8.2	Differentiability of Two-Function Composition in General . . . . .	394
8.3	Measure Space Domains . . . . .	397
8.4	Spaces with Norms Stronger than Supremum Norms . .	401
8.5	Two-Function Composition on $\mathcal{W}_p$ Spaces . . . . .	404

8.6	Notes .....	405
<b>9</b>	<b>Product Integration</b> .....	407
9.1	Multiplicative Interval Functions and $\Phi$ -Variation .....	408
9.2	Product Integrals for Real-Valued Interval Functions ..	415
9.3	Nonexistence for $p > 2$ .....	424
9.4	Inequalities for Finite Products .....	425
9.5	The Product Integral .....	430
9.6	The Strict Product Integral .....	432
9.7	Commutative Banach Algebras .....	438
9.8	Integrals with Two Integrands .....	442
9.9	Duhamel's Formula .....	451
9.10	Smoothness of the Product Integral Operator .....	457
9.11	Linear Integral Equations .....	474
9.12	Integral Equations for Banach-Space-Valued Functions	494
9.13	Notes .....	499
<b>10</b>	<b>Nonlinear Differential and Integral Equations</b> .....	505
10.1	Classical Picard Iteration .....	505
10.2	Picard's Method in $p$ -Variation Norm, $1 \leq p < 2$ .....	506
10.3	Existence and Uniqueness .....	513
10.4	Boundedness and Convergence of Picard Iterates .....	527
10.5	Continuity of the Solution Mappings .....	536
10.6	Notes .....	549
<b>11</b>	<b>Fourier Series</b> .....	551
11.1	On the Order of Decrease of Fourier Coefficients .....	551
11.2	Uniform Convergence .....	554
11.3	Notes .....	568
<b>12</b>	<b>Stochastic Processes and <math>\Phi</math>-Variation</b> .....	571
12.1	Processes with Regulated Sample Functions .....	571
12.2	Brownian Motion .....	575
12.3	Martingales .....	576
12.4	Gaussian Stochastic Processes .....	579
12.5	Markov Processes .....	600
12.6	Lévy Processes .....	611
12.7	Empirical Processes .....	615
12.8	Differentiability of Operators on Processes .....	628
12.9	Integration .....	629
12.10	Notes .....	640
	<b>Appendix Nonatomic Measure Spaces</b> .....	645
	<b>References</b> .....	649

**Subject Index** ..... 661

**Author Index** ..... 665

**Index of Notation** ..... 669

Concrete Functional Calculus

Dudley, R.M.; Norvaiša, R.

2011, XII, 671 p., Hardcover

ISBN: 978-1-4419-6949-1
