Author's preface	xix
Acknowledgements	xxiii
Foreword	xxv
1 Apollo: an extraordinary adventure	1
The meaning of Apollo	1
Dreaming of the Moon	5
The Apollo spaceship	8
Which way?	9
Lunar orbit rendezvous	11
Equipment	12
Swords to ploughshares: von Braun's rockets	19
2 The Apollo flights: a brief history	29
An alphabet of missions	29
Failure of imagination	30
Back in the saddle: Apollo 4	32
The lunar module flies: Apollo 5	33
The Saturn balks: Apollo 6	34
Testing the Block II: Apollo 7	35
Gutsy decisions: Apollo 8	36
A complete system test: Apollo 9	39
A dress rehearsal: Apollo 10	41
Task accomplished: Apollo 11	42
Lightning strikes: Apollo 12	45
The successful failure: Apollo 13	46
Try again: Apollo 14	49
Exploration at its greatest: Apollo 15	50
New knowledge: Apollo 16	53
The last hurrah: Apollo 17	54
Goodbye Apollo	58

3	Launch: a fiery departure	59
	Preparations for launch	59
	Lift-off	71
	Getting through the atmosphere	83
	Second stage	91
	Third stage	105
4	Earth orbit and TLI	107
	Settling into orbit	107
	Around the world in 90 minutes	108
	Coasting around Earth	114
	The route to the Moon	123
5	Retrieving the lander	131
	Leaving Earth	131
	Transposition, docking and extraction	133
	“No latch, Houston.”	142
	The fate of the S-IVB	147
6	Navigating to the Moon	151
	Crossing cislunar space	151
	Ground-based tracking	156
	Navigation from the spacecraft	159
	The guidance and navigation system	165
7	Coasting to the Moon	181
	Three men in a submarine	181
	Sustaining life	184
	The personal bit	187
	Cool air	201
	PTC: spacecraft on a spit	207
	Stirring the tanks: genesis of a failure	208
	Communications	211
	Telly from the Moon	215
	Checking the lunar module	221
8	Entering lunar orbit: the LOI manoeuvre	225
	The service module	225
	How not to crash into the Moon	229
	Lunar encounter	231
	The LOI PAD: it isn’t magic	234
	The black void	241
	Luna close up: burning LOI	245

9	Preparations for landing	249
	Overjoyed	249
	The second arrival burn	251
	How not to crash into the Moon	251
	The joys of lunar orbit	252
	In the descent orbit	257
	Entering the lunar module	261
	Continuing preparations	271
	Undocking	273
10	Next stop: the Moon	285
	“Go for the Pro”: the landing begins	285
	Slowing down: P63	289
	“Hey, there it is!”: pitchover and P64	294
	“Picking up some dust”: P66	302
11	Down in the dust	309
	Postlanding	309
	Suiting up	317
	Going for a walk	326
	The lonely world of the CMP	336
12	Exploration at its greatest	343
	Luna cognita	343
	Unmanned probes	347
	Apollo reaches the Moon	351
	Science on the Moon	352
	Surface experiments	364
	Science station in lunar orbit	380
	The Moon after Apollo	393
13	Rendezvous and docking	395
	Orbital mechanics	396
	We have lift-off... from the Moon!	399
	Rendezvous techniques	405
	Braking and station-keeping	412
	A long day	418
	The role of mission control	422
	Epitaph for the lunar module	427
14	Heading for home	429
	Mission accomplished... nearly	429
	Trans-Earth injection	429
	Subsatellite	431
	The TEI PAD: a worked example	435

Counting down to the burn	438
Final AOS	441
The long fall to Earth	444
A walk outside: EVA	456
15 Re-entry	465
A fiery return	465
In we come: entry from start to finish	469
The entry PAD: a worked example	470
Final four hours	475
Last hour	479
Human shooting star: P63	483
Ensuring capture: P64	485
Aiming for the ships: P67	489
Splashdown	496
Epilogue	505
Glossary	507
Appendix 1: Computer programs	515
Appendix 2: Mission data	521
Further reading	525
Index	529
