
Contents

Part I Genes and the Heart

Johann Gregor Mendel: “Father of Modern Genetics”	3
Pavel Braveny	
Gene Therapy: Hopes and Problems	7
Vladimír Vonka	

Part II Development and Gender

VEGFS, FGFS, and PDGF Coordinate Embryonic Coronary Vascularization	21
Robert J. Tomanek and Lance P. Christensen	
The E2F Pathway in Cardiac Development and Disease	29
Jennifer Rueger and Balwant S. Tuana	
Cardiac Sodium–Calcium Exchanger Expression	43
Cecilia Hurtado, Thane G. Maddaford, and Grant N. Pierce	
Scleraxis: A New Regulator of Extracellular Matrix Formation	57
Rushita A. Bagchi and Michael P. Czubryt	
Gender Impact on Pathophysiology of the Heart	67
Jane-Lise Samuel, Claude Delcayre, and Bernard Swynghedauw	

Part III Mitochondrial Diseases

Mitochondrial DNA and Heart Disease	79
Chihiro Shikata, Masami Nemoto, Takanori Ebisawa, Akihiro Nishiyama, and Nobuakira Takeda	
A Novel Algorithm from Personal Genome to the Pathogenic Mutant Causing Mitochondrial Cardiomyopathy	85
Teruhiko Toyo-oka, Toshihiro Tanaka, Licht Toyo-oka, and Katsushi Tokunaga	

MELAS Syndrome: Mediated by Impaired Taurinomethyluridine Synthesis.....	93
Stephen W. Schaffer and Chian Ju Jong	

Part IV Ischemic Heart Disease

Genetics of Myocardial Infarction.....	103
Rudolf Poledne and Jaroslav A. Hubacek	
Genetic Background of Myocardial Infarction	113
Kouichi Ozaki and Toshihiro Tanaka	
Angiotensin Converting Enzyme I/D Polymorphism and Cardiovascular Risk: Disclosed Story	121
Anna Vasku, Jiri Blahak, Daniel Baumgartner, and Julie Bienertova-Vasku	
PPARs and Myocardial Response to Ischemia in Normal and Diseased Heart	135
Tana Ravingerova, Adriana Adameova, Slavka Carnicka, Tara Kelly, Martina Nemcekova, Jana Matejikova, and Antigone Lazou	
Genes and Plasma Lipids in Czech Slavic Population.....	149
Jaroslav A. Hubacek and Rudolf Poledne	

Part V Hypertension and Arrhythmias

Genetic Basis of Salt-Sensitive Hypertension in Humans	161
Frans H.H. Leenen, Md. Shahrier Amin, Alexandre F.R. Stewart, and Frederique Tesson	
Gene–Environment Interactions: Their Role in Hypertension Development	177
Jaroslav Kunes, Michaela Kadlecova, and Josef Zicha	
Phenotypic Overlap of Lethal Arrhythmias Associated with Cardiac Sodium Mutations: Individual-Specific or Mutation-Specific?	185
Naomasa Makita	

Part VI Hypertrophy and Failure

CLP-1-Mediated Transcriptional Control of Hypertrophic Gene Programs Underlying Cardiac Hypertrophy	199
M.A.Q. Siddiqui, Michael Wagner, Jorge Espinoza-Derout, Facan Huang, Daniel Beckles, and Eduardo Mascareno	
Molecular Mechanisms of Subcellular Remodeling in Congestive Heart Failure	213
Andrea P. Babick, Alison L. Müller, and Naranjan S. Dhalla	

Cardiomyopathy, Sarcomeropathy, and Z-diskopathy.....	225
Akinori Kimura	
Left Ventricular Assist Device: Morphological, Molecular, and Genetic Changes After Mechanical Support	235
Hideo A. Baba, Atsushi Takeda, Nobuakira Takeda, and Jeremias Wohlschlaeger	
Vascular Ehlers–Danlos Syndrome: A Good Experimental Model Is Needed for Development of Treatment Strategies	241
Wilfried Briest and Mark I. Talan	
Multi-scale, Multi-physics Heart Simulator as a Tool to Link Bench and Bedside.....	253
S. Sugiura, T. Washio, J. Okada, H. Watanabe, and T. Hisada	
Index.....	261
