

# Contents

<b>I</b>	<b>Fundamental Concepts</b>	1
I.1	Topology	1
I.1.1	Topological Spaces	1
I.1.2	Connectedness	9
I.1.3	Compactness	16
I.1.4	Function Spaces	22
I.1.5	Lebesgue Number	24
I.2	Categories	27
I.2.1	General Ideas on Categories	27
I.2.2	Pushouts	33
I.3	Group Actions	39
<b>II</b>	<b>The Category of Simplicial Complexes</b>	43
II.1	Euclidean Simplicial Complexes	43
II.2	Abstract Simplicial Complexes	46
II.2.1	The Geometric Realization Functor	48
II.2.2	Simplicial Complexes and Immersions	56
II.2.3	The Homology Functor	59
II.3	Introduction to Homological Algebra	65
II.4	Simplicial Homology	75
II.4.1	Reduced Homology	87
II.5	Homology with Coefficients	88
<b>III</b>	<b>Homology of Polyhedra</b>	99
III.1	The Category of Polyhedra	99
III.2	Homology of Polyhedra	108
III.3	Some Applications	117
III.4	Relative Homology for Polyhedra	125
III.5	Homology of Real Projective Spaces	128
III.5.1	Block Homology	131
III.5.2	Homology of $\mathbb{R}P^n$ , with $n \geq 4$	138

III.6 Homology of the Product of Two Polyhedra .....	140
III.6.1 Acyclic Models Theorem .....	140
III.6.2 Homology of the Product of Two Polyhedra .....	147
<b>IV Cohomology</b> .....	151
IV.1 Cohomology with Coefficients in $G$ .....	151
IV.1.1 Cohomology of Polyhedra .....	158
IV.2 The Cohomology Ring .....	160
IV.3 The Cap Product .....	166
<b>V Triangulable Manifolds</b> .....	171
V.1 Topological Manifolds .....	171
V.1.1 Triangulable Manifolds .....	173
V.2 Closed Surfaces .....	176
V.3 Poincaré Duality .....	189
<b>VI Homotopy Groups</b> .....	195
VI.1 Fundamental Group .....	195
VI.1.1 Fundamental Groups of Polyhedra .....	199
VI.1.2 Polyhedra with a Given Fundamental Group .....	207
VI.2 Fundamental Group and Homology .....	210
VI.3 Homotopy Groups .....	213
VI.3.1 Action of the Fundamental Group on the Higher Homotopy Groups .....	221
VI.3.2 On the Homotopy Groups of Spheres .....	225
VI.3.3 Another Approach to Homotopy Groups .....	227
VI.4 Obstruction Theory .....	232
<b>References</b> .....	239
<b>Index</b> .....	241

Simplicial Structures in Topology

Ferrario, D.L.; Piccinini, R.A.

2011, XVI, 243 p., Hardcover

ISBN: 978-1-4419-7235-4
