

Contents

1	Introduction to the Neurobiology of Actin	1
	Gianluca Gallo	
2	The Neuronal Actin Cytoskeleton and the Protrusion of Lamellipodia and Filopodia	7
	Gianluca Gallo	
3	Regulation of Actin Filaments During Neurite Extension and Guidance	23
	Paul Letourneau	
4	Functions of Myosin Motor Proteins in the Nervous System	45
	Daniel M. Suter	
5	Microtubule–Actin Interactions During Neuronal Development . .	73
	Kenneth A. Myers and Peter W. Baas	
6	Working with Actin: Methodological Approaches for the Study of Actin in Neurons	97
	Erik W. Dent	
7	Functions of the Actin Cytoskeleton in the Early Embryology of the Nervous System	115
	Jeffrey D. Hildebrand	
8	Actin Cytoskeletal Regulation in Neuronal Migration	139
	M. Elizabeth Ross and Stanislav Kholmanskikh	
9	Actin and Neuronal Polarity	161
	Annette Gärtner and Carlos G. Dotti	
10	Actin at the Synapse: Contribution to Pre- and Postsynaptic Functions	177
	Dezhi Liao	
11	Actin and Diseases of the Nervous System	201
	Barbara W. Bernstein, Michael T. Maloney, and James R. Bamburg	

12 Signal Transduction Pathways: From Receptor to the Actin Cytoskeleton 235
Catherine Irene Dubreuil and David L. Van Vactor

Index 265

Neurobiology of Actin

From Neurulation to Synaptic Function

Gallo, G.; Lanier, L.M. (Eds.)

2011, VIII, 282 p., Hardcover

ISBN: 978-1-4419-7367-2
