

Contents

Preface	v
1 Basic Notions of Topology and Function Spaces	1
1.1 Topologies, Separation Axioms and a Glance at $C_p(X)$	2
1.2 Products, Cardinal Functions and Convergence	12
1.3 Metrizability and Completeness	24
1.4 Compactness Type Properties in Function Spaces	35
1.5 More on Completeness: Realcompact Spaces	42
1.6 Bibliographic Notes	49
2 Solutions of Problems 001–500	51
3 Bonus Results: Some Hidden Statements	435
3.1 Standard Spaces	436
3.2 Metrizable Spaces and Compact Spaces	437
3.3 Properties of Continuous Maps	439
3.4 Covering Properties, Normality and Open Families	441
3.5 Product Spaces and Cardinal Invariants	443
3.6 Raznoie (Unclassified Results)	444
4 Open Problems	445
4.1 Local Properties	447
4.2 Discreteness of X and Completeness of $C_p(X)$	448
4.3 Dense Subspaces	450
4.4 The Lindelöf Property in X and $C_p(X)$	451
4.5 Other Covering Properties	453
4.6 Mappings Which Involve C_p -spaces	456
4.7 Very General Questions	458
4.8 Fuzzy Questions	459
4.9 Naïve Questions	461
4.10 Raznoie (Unclassified Questions)	462
