<b>Preface</b> .....	VII
<b>1 Introduction</b> .....	1
<b>2 Fundamental Order-Theoretic Principles</b> .....	23
2.1 Recursions and Iterations in Posets .....	23
2.2 Fixed Point Results in Posets .....	26
2.2.1 Fixed Points for Set-Valued Functions.....	26
2.2.2 Fixed Points for Single-Valued Functions .....	30
2.2.3 Comparison and Existence Results.....	32
2.2.4 Algorithmic Methods .....	34
2.3 Solvability of Operator Equations and Inclusions .....	36
2.3.1 Inclusion Problems .....	37
2.3.2 Single-Valued Problems .....	38
2.4 Special Cases .....	41
2.4.1 Fixed Point Results in Ordered Topological Spaces ....	41
2.4.2 Equations and Inclusions in Ordered Normed Spaces ...	44
2.5 Fixed Point Results for Maximalizing Functions .....	49
2.5.1 Preliminaries .....	49
2.5.2 Main Results .....	51
2.5.3 Examples and Remarks .....	52
2.6 Notes and Comments .....	55
<b>3 Multi-Valued Variational Inequalities</b> .....	57
3.1 Introductory Example.....	57
3.2 Multi-Valued Elliptic Variational Inequalities .....	62
3.2.1 The Sub-Supersolution Method .....	66
3.2.2 Directedness of Solution Set .....	77
3.2.3 Extremal Solutions .....	85
3.2.4 Equivalence to Variational-Hemivariational Inequality ..	88
3.3 Multi-Valued Parabolic Variational Inequalities.....	92

3.3.1	Notion of Sub-Supersolution .....	98
3.3.2	Multi-Valued Parabolic Equation .....	101
3.3.3	Parabolic Variational Inequality .....	117
3.4	Notes and Comments .....	128
<b>4</b>	<b>Discontinuous Multi-Valued Elliptic Problems .....</b>	<b>131</b>
4.1	Nonlocal and Discontinuous Elliptic Inclusions .....	131
4.1.1	Hypotheses, Main Result, and Preliminaries .....	132
4.1.2	Proof of Theorem 4.1 .....	141
4.1.3	Extremal Solutions .....	145
4.1.4	Application: Difference of Clarke's Gradient and Subdifferential .....	148
4.2	State-Dependent Clarke's Gradient Inclusion .....	152
4.2.1	Statement of the Problem .....	152
4.2.2	Notions, Hypotheses, and Preliminaries .....	155
4.2.3	Existence and Comparison Result .....	159
4.2.4	Application: Multiplicity Results .....	163
4.3	Discontinuous Elliptic Problems via Fixed Points for Multifunctions .....	166
4.3.1	Abstract Fixed Point Theorems for Multi-Functions ..	166
4.3.2	Discontinuous Elliptic Functional Equations .....	168
4.3.3	Implicit Discontinuous Elliptic Functional Equations ..	172
4.4	Notes and Comments .....	178
<b>5</b>	<b>Discontinuous Multi-Valued Evolutionary Problems .....</b>	<b>179</b>
5.1	Discontinuous Parabolic Inclusions with Clarke's Gradient ...	179
5.2	Implicit Functional Evolution Equations .....	184
5.2.1	Preliminaries .....	185
5.2.2	Main Result .....	188
5.2.3	Generalization and Special Cases .....	190
5.2.4	Application .....	192
5.3	Notes and Comments .....	194
<b>6</b>	<b>Banach-Valued Ordinary Differential Equations .....</b>	<b>197</b>
6.1	Cauchy Problems .....	198
6.1.1	Preliminaries .....	198
6.1.2	A Uniqueness Theorem of Nagumo Type .....	198
6.1.3	Existence Results .....	200
6.1.4	Existence and Uniqueness Results .....	205
6.1.5	Dependence on the Initial Value .....	209
6.1.6	Well-Posedness of a Semilinear Cauchy Problem .....	210
6.2	Nonlocal Semilinear Differential Equations .....	212
6.2.1	Existence and Comparison Results .....	213
6.2.2	Applications to Multipoint Initial Value Problems ....	218
6.3	Higher Order Differential Equations .....	219

6.3.1	Well-Posedness Results	219
6.3.2	Semilinear Problem	220
6.3.3	Extremal Solutions	222
6.4	Singular Differential Equations	225
6.4.1	First Order Explicit Initial Value Problems	225
6.4.2	First Order Implicit Initial Value Problems	230
6.4.3	Second Order Initial Value Problems	235
6.4.4	Second Order Boundary Value Problems	242
6.5	Functional Differential Equations Containing Bochner Integrable Functions	249
6.5.1	Hypotheses and Preliminaries	250
6.5.2	Existence and Comparison Results	254
6.6	Notes and Comments	259
<b>7</b>	<b>Banach-Valued Integral Equations</b>	<b>261</b>
7.1	Integral Equations in HL-Spaces	262
7.1.1	Fredholm Integral Equations	262
7.1.2	Volterra Integral Equations	268
7.1.3	Application to Impulsive IVP	272
7.1.4	A Volterra Equation Containing HL Integrable Functions	278
7.2	Integral Equations in $L^p$ -Spaces	280
7.2.1	Preliminaries	280
7.2.2	Urysohn Equations	281
7.2.3	Fredholm Integral Equations	284
7.2.4	Volterra Integral Equations	292
7.2.5	Application to Impulsive IVP	296
7.3	Evolution Equations	298
7.3.1	Well-Posedness Results	298
7.3.2	Existence and Uniqueness Result	300
7.3.3	Continuous Dependence on $x_0$	302
7.3.4	Special Cases	304
7.3.5	Application to a Cauchy Problem	305
7.3.6	Extremal Solutions of Evolution Equations	305
7.3.7	Evolution Equations Containing Bochner Integrable Functions	309
7.3.8	Application	313
7.4	Notes and Comments	315
<b>8</b>	<b>Game Theory</b>	<b>317</b>
8.1	Pure Nash Equilibria for Finite Simple Normal-Form Games	319
8.1.1	Preliminaries	319
8.1.2	Existence and Comparison Results	320
8.1.3	An Application to a Pricing Game	323

8.2	Pure and Mixed Nash Equilibria for Finite Normal-Form Games .....	325
8.2.1	Preliminaries .....	326
8.2.2	Existence Result for the Greatest Nash Equilibrium....	326
8.2.3	Comparison Result for Utilities .....	329
8.2.4	Dual Results .....	330
8.2.5	Applications to Finite Supermodular Games .....	331
8.2.6	Application to a Multiproduct Pricing Game.....	336
8.3	Pure Nash Equilibria for Normal-Form Games .....	338
8.3.1	Extreme Value Results .....	339
8.3.2	Smallest and Greatest Pure Nash Equilibria .....	343
8.3.3	Special Cases .....	349
8.3.4	Applications to a Multiproduct Pricing Game .....	355
8.3.5	Minimal and Maximal Pure Nash Equilibria .....	359
8.4	Pure and Mixed Nash Equilibria of Normal-Form Games ....	364
8.4.1	Definitions and Auxiliary Results .....	365
8.4.2	Existence and Comparison Results .....	369
8.4.3	Applications to Supermodular Games .....	373
8.5	Undominated and Weakly Dominating Strategies and Weakly Dominating Pure Nash Equilibria for Normal-Form Games ...	379
8.5.1	Existence of Undominated Strategies.....	379
8.5.2	Existence of Weakly Dominating Strategies and Pure Nash Equilibria .....	382
8.5.3	Examples .....	384
8.6	Pursuit and Evasion Game .....	386
8.6.1	Preliminaries .....	386
8.6.2	Winning Strategy .....	387
8.6.3	Applications and Special Cases .....	393
8.7	Notes and Comments .....	399
9	<b>Appendix</b> .....	401
9.1	Analysis of Vector-Valued Functions .....	401
9.1.1	$\mu$ -Measurability and $\mu$ -Integrability of Banach-Valued Functions .....	401
9.1.2	HL Integrability .....	405
9.1.3	Integrals of Derivatives of Vector-Valued Functions ....	412
9.1.4	Convergence Theorems for HL Integrable Functions....	416
9.1.5	Ordered Normed Spaces of HL Integrable Functions ...	419
9.2	Chains in Ordered Function Spaces .....	421
9.2.1	Chains in $L^p$ -Spaces .....	421
9.2.2	Chains of Locally Bochner Integrable Functions .....	424
9.2.3	Chains of HL Integrable and Locally HL Integrable Functions .....	426
9.2.4	Chains of Continuous Functions .....	429
9.2.5	Chains of Random Variables .....	432

9.2.6	Properties of Order Intervals and Balls in Ordered Function Spaces .....	433
9.3	Sobolev Spaces .....	436
9.3.1	Definition of Sobolev Spaces .....	436
9.3.2	Chain Rule and Lattice Structure .....	438
9.4	Operators of Monotone Type .....	440
9.4.1	Main Theorem on Pseudomonotone Operators .....	440
9.4.2	Leray–Lions Operators .....	442
9.4.3	Multi-Valued Pseudomonotone Operators .....	443
9.5	First Order Evolution Equations .....	447
9.5.1	Evolution Triple and Generalized Derivative .....	447
9.5.2	Existence Results for Evolution Equations .....	451
9.6	Calculus of Clarke’s Generalized Gradient .....	452
<b>List of Symbols</b> .....		459
<b>References</b> .....		463
<b>Index</b> .....		475

Fixed Point Theory in Ordered Sets and Applications  
From Differential and Integral Equations to Game  
Theory

Carl, S.; Heikkilä, S.

2011, XIII, 477 p., Hardcover

ISBN: 978-1-4419-7584-3
