Foreword	v
Preface	vii
Acknowledgments	xi
List of Illustrations	xix
1. Historical Perspectives	1
1.1. Perspectives of Ancient Astronomy	1
1.2. Archaeological, Anthropological, and Historical Contexts	2
Part I. Astronomical Background	
2. Principal Features of the Sky	9
2.1. Star Patterns: Asterisms and Constellations	9
2.1.1. Stellar Pattern Recognition	9
2.1.2. Star Charts	10
2.1.3. Modern Nomenclature	10
2.2. The Sphere of the Sky	13
2.2.1. Daily Sky Motions	13
2.2.2. The Horizon or “Arabic” System	14
2.2.3. The Equatorial or “Chinese” System	16
2.2.4. Transformations Between Horizon and Equatorial Systems	18
2.3. Basic Motions of the Sun and Moon	20
2.3.1. The Sun, the Year, and the Seasons	20
2.3.2. The Zodiac	26
2.3.3. The Ecliptic or “Greek” System	28
2.3.4. The Motions of the Moon	29
2.3.5. Orbital Elements and the Lunar Orbit	30
2.4. The Planets	36
2.4.1. Wanderers	36
2.4.2. Morning and Evening Stars	37
2.4.3. Planetary Phenomena	39
2.4.4. Periodicities, Cycles, and Interrelationships	42
3. Observational Methods and Problems	49
3.1. Visibility of Phenomena	49
3.1.1. Climate and Weather Conditions	49
3.1.2. Brightness and Color of Astronomical Objects	50
3.1.2.1. Magnitudes and Color Indices	51
3.1.2.2. Correction for Atmospheric Extinction	53
3.1.2.3. Standardization	55
3.1.2.4. Modern Star Data	55
3.1.2.5. Sky Brightness and Visibility	56

3.1.3.	Effects of Refraction, Dip, and Parallax	61
3.1.4.	Limitations of Vision	64
3.1.4.1.	The Sensitivity and Acuity of the Eye	64
3.1.4.2.	Color Sensitivity of the Eye	65
3.1.5.	Visibility of Planetary Phenomena	65
3.1.6.	Effects of Precession	66
3.1.7.	Stellar Proper Motions	67
3.2.	Types of Ancient Observations	71
3.2.1.	Solar and Lunar Observations	71
3.2.2.	Planet and Star Observations	75
3.3.	Instruments and Observatories	76
3.4.	Possibilities of Optical Aids	82
4.	Time and the Calendar	85
4.1.	The Perception and Measurement of Time	85
4.1.1.	Time and Time Intervals	86
4.1.1.1.	Sundials	86
4.1.1.2.	Types of Solar Time	91
4.1.1.3.	Mechanical Devices	94
4.1.1.4.	Uniform Time Intervals	94
4.1.2.	Solar Date Determination	94
4.1.3.	The Days and Length of the Week	96
4.1.4.	The Month	96
4.1.5.	Era Bases and Day Numbers	97
4.2.	The Bases and Functions of Calendars	99
4.2.1.	The Reconciliation of Solar and Lunar Calendars	99
4.2.2.	The Julian Calendar Reform	100
4.2.3.	The Gregorian Calendar Reform	100
4.2.4.	A Calendar Problem: The Date of Easter	100
4.2.5.	A Pseudo-Problem: The Date of the Millennium	101
4.2.6.	Year Lengths and the Earth's Orbit	101
4.3.	Chronology	101
4.4.	Astronomical Dating of Artifacts and Cultures	103
4.5.	Causes and Effects of Secular Variation	104
4.5.1.	The Slowing of the Earth's Rotation	104
4.5.2.	Solar and Lunar Tides	104
4.5.3.	The Effects of Tidal Friction	104
4.5.4.	The Effects on Ancient Observations	105
5.	Transient Phenomena	109
5.1.	Atmospheric Phenomena	109
5.1.1.	Auroras	109
5.1.2.	The Green Flash	111
5.1.3.	Rainbows and Mists	111
5.1.4.	Halos	112
5.1.5.	Precipitation	114
5.2.	Solar and Lunar Eclipses	114
5.2.1.	Eclipse Phenomena	114
5.2.1.1.	Solar Eclipses	115
5.2.1.2.	Lunar Eclipses	117
5.2.1.3.	Modern Uses of Ancient Eclipse Observations	120
5.2.2.	Predictability and Eclipse Warnings	123
5.2.3.	Cultural Perceptions and Uses of Eclipses	127
5.3.	Other Solar and Lunar Phenomena	128
5.3.1.	Sunspots and Related Phenomena	128
5.3.2.	Transient Events on the Moon	129
5.3.3.	Lunar Occultations	130
5.4.	Planetary Phenomena	131
5.5.	Comets	131

5.6.	Meteors and Meteorites	135
5.7.	Zodiacal Light	138
5.8.	Variable Stars	138
5.8.1.	Eclipsing and Pulsating Stars	140
5.8.2.	Irregular Variables	141
5.8.3.	The Lost Pleiad	141
5.8.4.	Variation Due to Evolution and a Sirius Mystery	143
5.8.5.	Novae and Supernovae	144
5.8.6.	Mutability of the Heavens and the 1054 Supernova	148

Part II. Astronomy in Cultures

6.	Paleolithic and Neolithic Cultures	157
6.1.	Paleolithic Cultures	157
6.2.	Megalithic Cultures	158
6.2.1.	The Megalithic World: Cultural Description	158
6.2.2.	Engineering and Astronomy	160
6.2.3.	Megalithic Mensuration	162
6.2.4.	Horizon Astronomy	165
6.2.5.	Brittany	167
6.2.6.	Brugh na Boinne	168
6.2.7.	The Cumbrian Circles	178
6.2.8.	Callanish: The White Cow	183
6.2.9.	Brogar, Stenness, and Maes Howe	185
6.2.10.	Stonehenge	187
6.2.11.	Mull and Argyll: A Test of Precision	193
6.2.12.	Ballochroy and Kintraw: Controversial Sites	194
6.2.13.	Merrivale Stone Rows	195
6.2.14.	Temple Wood: Clear Evidence of High-Precision Measurements?	195
6.2.15.	Caithness Sites and a Potential Observing Method	196
6.2.16.	Stone Rows at Carnac: Accidental Alignments?	200
6.2.17.	Megalithic Sites in Central Europe	200
6.2.18.	Mediterranean and North African Megalithic Sites	201
6.2.18.1.	Malta	201
6.2.18.2.	Iberia	203
6.2.18.3.	Balearic Islands, Sardinia, and Pantelleria	203
6.2.18.4.	Northern Africa	204
6.2.19.	Megalithic Summary	204
6.3.	New World Medicine Wheels	205
6.3.1.	Majorville, Moose Mountain, and Big Horn	206
6.3.1.1.	Majorville	206
6.3.1.2.	Moose Mountain	206
6.3.1.3.	Big Horn	208
6.3.2.	Other Medicine Wheels	209
6.3.3.	Astronomical Meaning of the Medicine Wheels	209
7.	Antecedents of the Western Tradition	211
7.1.	Mesopotamian Civilization	211
7.1.1.	Methodology and Iconography	213
7.1.1.1.	Iconographic Representations on Cylinder Seals	213
7.1.1.2.	Inanna as Venus	216
7.1.1.3.	Rujm el-Hiri	216
7.1.2.	Marduk and the Frame of Heaven	217
7.1.2.1.	The 360-Day/Degree Year and the Months	217
7.1.2.2.	Babylonian and Hebraic Calendars	219
7.1.2.3.	Origin of the Constellations	220
7.1.3.	Chronology	222
7.1.3.1.	Records of Lunar Eclipses	223

	7.1.3.2.	Venus and Eclipse Observations and Chronology	225
	7.1.3.3.	Astronomy and Boundary-Stone Markers	227
	7.1.4.	Mathematical Astronomy	228
	7.1.4.1.	The Step and Zigzag Functions	229
	7.1.4.2.	System A	230
	7.1.4.3.	System B	233
	7.1.4.4.	Planetary Tables	235
	7.1.5.	Relation to Greek Astronomy	238
7.2.		Hellenic Civilization and Its Precursors	239
	7.2.1.	Early Groups	239
	7.2.2.	Alignments and Astronomical Measurement	240
	7.2.3.	Concentric Spheres	241
	7.2.4.	Classical Cosmologies	242
7.3.		Astronomy in the Hellenistic and Roman Periods	244
	7.3.1.	Establishing Scale: Aristarchos and Eratosthenes	244
	7.3.2.	The Canonical Geocentric System: Hipparchos and Ptolemy	245
	7.3.3.	Astronomy and Religion in Late Antiquity	248
7.4.		Arabic Culture and Islamic Astronomy	251
7.5.		Late Indian Astronomy	252
7.6.		Astronomy of Medieval Europe	253
7.7.		Post-Renaissance Astronomy	255
8.		African Cultures	259
	8.1.	Egypt and Nubia	259
	8.1.1.	Egyptian Astronomy and Its Role in Religion	260
	8.1.2.	The Pyramids and the Myth of Osiris	261
	8.1.3.	Planets	262
	8.1.4.	The Calendar	263
	8.1.5.	Alignments	267
	8.1.6.	Egyptian Asterisms	269
	8.2.	Ethiopia	272
	8.3.	North Africa	273
	8.4.	The Dogons	273
	8.5.	Other African Cultures	277
9.		Indo-Iranian Cultures	279
	9.1.	India	279
	9.1.1.	Historical and Cultural Background	279
	9.1.1.1.	Jainist Cosmology	282
	9.1.1.2.	Buddhist Cosmology	282
	9.1.2.	The Cosmographic Role of the Temple	283
	9.1.2.1.	The Hindu Temple	283
	9.1.2.2.	The Buddhist Temple	290
	9.1.3.	Development of Indian Astronomy	291
	9.1.4.	Indian Constellations and Asterisms	294
	9.1.5.	Astronomical Instruments	294
	9.1.6.	Astronomical Units of Measure and Era Bases	294
	9.1.7.	Eclipse Prediction and Tamil Astronomy	296
	9.2.	Persia	298
	9.3.	Southeast Asia	300
	9.3.1.	Angkor Wat	301
	9.3.2.	Other Temples in Southeast Asia	302
	9.3.3.	Constellations, Calendars, and Cosmology in Southeast Asia	303
	9.4.	Tibet	308
10.		China, Korea, and Japan	313
	10.1.	China	313
	10.1.1.	Archaeological and Historical Background	313

10.1.2.	Early Astronomy	314
10.1.2.1.	Evidence of Early Use of the Lunar Mansions	316
10.1.2.2.	Eclipses from the Shang and Later Dynasties	319
10.1.2.3.	Chinese Constellations and Asterisms	322
10.1.3.	Chinese Chronology	326
10.1.4.	The Purposes of Chinese Astronomy	327
10.1.4.1.	Chinese Time-Keeping and Calendar	327
10.1.4.2.	Lunar and Planetary Observation	327
10.1.5.	Associations with Heaven and Earth	328
10.1.6.	The Role of Buddhism	329
10.1.7.	Instructions for New Emperors	331
10.1.8.	Chinese Records of “Guest Stars” and Comets	331
10.1.9.	Other Records of Transient Phenomena	333
10.2.	Korea	333
10.3.	Japan	334
11.	Oceanic Cultures	337
11.1.	Australia	337
11.2.	Melanesia, Micronesia, and Polynesia	338
11.3.	Oceanic Seafaring: Techniques and Instruments	341
11.4.	Islander Mythology and Astronomy	347
12.	Mesoamerica	353
12.1.	Introduction	353
12.2.	Structure of the Calendar and the Mayan Number System	355
12.3.	The Correlation Problem	359
12.4.	The Old Ball Game at Yaxchilan	360
12.5.	Planetary Glyphs from Pacal’s Coffin	362
12.6.	Calendar Names of Gods and Planetary Identities	363
12.7.	The <i>Dresden</i> Codex Venus Table	369
12.8.	Venus, Star Wars, and the Rain and Corn Complex	370
12.9.	The <i>Dresden</i> Codex Mars Table	372
12.10.	<i>Dresden</i> Codex Ring Numbers	373
12.11.	The <i>Dresden</i> Codex Eclipse Table	374
12.12.	Calendar Names of Eclipse Deities	379
12.13.	Eclipse References on Maya Pottery	380
12.14.	New Fire Ceremonies in the <i>Vienna</i> Codex	382
12.15.	The <i>Borgia</i> Codex and Eclipses	384
12.16.	The Birth of a God on a Maya Vase: Jaguar Baby	390
12.17.	The Lords of Palenque	391
12.18.	The Tropical Year in Mesoamerica	391
12.19.	The War Between the Gods: Calendar Reform	394
12.20.	<i>Dresden</i> Codex Serpent Numbers	396
12.21.	Caracol Stela 3	399
12.22.	Asterisms	400
12.23.	Mesoamerican Alignments	403
13.	America North of Mexico	411
13.1.	The Southwest	411
13.2.	California and Baja California	418
13.3.	Plains Indians	421
13.3.1.	Caddoan Groups (Pawnee, Arikara, Caddo, and Wichita)	421
13.3.2.	Siouans	425
13.3.3.	Hopewell, Cahokia, and Other Mound Builders	426
13.3.4.	Colorado Area Sites	427

13.4.	The Northwest	427
13.4.1.	The Columbia Plateau Region	427
13.4.2.	The Pacific Northwest	427
13.5.	The Northeast	428
13.6.	The Arctic	429
14.	South American Cultures	431
14.1.	The Chibchan Groups of Colombia	431
14.2.	Andean Civilization	438
14.2.1.	Early Sites	438
14.2.2.	Moche (Mochica)	441
14.2.3.	Nazca and the Geoglyphs	453
14.2.4.	Tiahuanaco (Tiwanaku)	460
14.2.5.	The Incas	462
14.3.	Other South American Cultures	467
14.4.	Caribbean Archaeoastronomy	470
15.	The Descent of the Gods and the Purposes of Ancient Astronomy	473
15.1.	Cultural Suppositions Regarding Life on Other Worlds	473
15.2.	Astronomy in Mythology and Ancient Religion	474
15.2.1.	Conjunctions of Planetary Gods and Deified Kings	478
15.2.2.	The Star of Bethlehem	482
15.3.	Cosmogonies and Cosmologies	486
15.3.1.	Indian Cosmology	486
15.3.2.	Cosmic Comparisons	487
15.3.2.1.	The Cosmic Turtle	487
15.3.2.2.	Celestial Watercraft	494
15.3.2.3.	Celestial Deer and Sheep	494
15.4.	Calendars and the Spread of Astronomical Ideas	494
15.4.1.	The Lunar Mansions: Africa and Eurasia	495
15.4.2.	The Lunar Mansions: Two Disputed Extensions	498
15.4.3.	The Zodiac and Its Symbols	498
15.4.4.	Old World and North American Parallels	498
15.4.5.	The Seven- and Nine-Day Planetary Weeks	499
15.4.6.	The Animal Cycles	499
15.5.	Comparative Navigational Practices	500
15.6.	Astrology and the Purposes of Archaeoastronomy	500

Appendices

A.	Archaeoastronomy Tools	505
A.1.	Introduction	505
A.2.	Spherical Astronomy Aids	505
A.3.	Computational and Sky Simulation Software	505
A.4.	Planetary Positions	506
A.5.	Miscellaneous Tables	507
B.	Modern Star Charts	509
C.	Sample Exercises and Problems	513
D.	Mayan Calendar Progression: A Sample	515
	References and Bibliography	525
	Index	579

Exploring Ancient Skies

A Survey of Ancient and Cultural Astronomy

Kelley, D.H.; Milone, E.F.

2011, XXV, 614 p. 400 illus., 8 illus. in color., Softcover

ISBN: 978-1-4419-7623-9
