

Contents

Contributing Authors	vii
Preface	xi
Foreword	xiii
 Genetic Programming Theory and Practice 2010: An Introduction <i>Trent McConaghy, Ekaterina Vladislavleva and Rick Riolo</i>	 xvii
1	
FINCH: A System for Evolving Java (Bytecode) <i>Michael Orlov and Moshe Sipper</i>	1
2	
Towards Practical Autoconstructive Evolution: Self-Evolution of Problem-Solving Genetic Programming Systems <i>Lee Spector</i>	17
3	
The Rubik Cube and GP Temporal Sequence Learning: An Initial Study <i>Peter Lichodziejewski and Malcolm Heywood</i>	35
4	
Ensemble Classifiers: AdaBoost and Orthogonal Evolution of Teams <i>Terence Soule, Robert B. Heckendorn, Brian Dyre, and Roger Lew</i>	55
5	
Covariant Tarpeian Method for Bloat Control in Genetic Programming <i>Riccardo Poli</i>	71
6	
A Survey of Self Modifying Cartesian Genetic Programming <i>Simon Harding, Wolfgang Banzhaf and Julian F. Miller</i>	91

7

Abstract Expression Grammar Symbolic Regression	109
<i>Michael F. Korns</i>	

8

Age-Fitness Pareto Optimization	129
<i>Michael Schmidt and Hod Lipson</i>	

9

Scalable Symbolic Regression by Continuous Evolution with Very Small Populations	147
<i>Guido F. Smits, Ekaterina Vladislavleva and Mark E. Kotanchek</i>	

10

Symbolic Density Models of One-in-a-Billion Statistical Tails via Importance Sampling and Genetic Programming	161
<i>Trent McConaghy</i>	

11

Genetic Programming Transforms in Linear Regression Situations	175
<i>Flor Castillo, Arthur Kordon and Carlos Villa</i>	

12

Exploiting Expert Knowledge of Protein-Protein Interactions in a Computational Evolution System for Detecting Epistasis	195
<i>Kristine A. Pattin, Joshua L. Payne, Douglas P. Hill, Thomas Caldwell, Jonathan M. Fisher, and Jason H. Moore</i>	

13

Composition of Music and Financial Strategies via Genetic Programming	211
<i>Hitoshi Iba and Claus Aranha</i>	

14

Evolutionary Art Using Summed Multi-Objective Ranks	227
<i>Steven Bergen and Brian J. Ross</i>	

Index	245
