

Contents

1	Silicon Nitride Ceramics	1
1.1	Introduction	1
1.2	Overview of Previous Studies on Si_3N_4	2
1.3	Overview of the Present Study	3
	References	5
2	Theoretical Methods and Approximations	11
2.1	Born Oppenheimer Approximation	11
2.2	Density Functional Theory	12
2.3	Approximations for the Exchange-Correlation Energy Functional	14
2.4	Periodic Systems: Bloch's Theorem	15
2.5	k-Point Sampling	16
2.6	Plane Waves, Pseudopotentials, and the Projector Augmented Wave Method	17
2.7	Aperiodic Structures	18
2.8	DFT+U	19
	References	20
3	Overview of Experimental Tools	23
3.1	Conventional Transmission Electron Microscope	23
3.2	High-Resolution TEM	24
3.3	Image Simulations	26
3.4	Z-contrast Imaging in STEM	27
3.5	Annular Bright-Field Imaging in STEM	29
3.6	Probe Formation	29
3.7	Electron Energy-Loss Spectroscopy/Energy-Filtered STEM	33
3.8	Aberration Correctors	36
3.9	Microscopes Used	38
3.10	Multivariate Statistical Analysis	39
	References	40

4	Structural Energetics of β-Si₃N₄(10$\bar{1}$0) Surfaces	45
4.1	Introduction	45
4.2	Computational Methods and Parameters	46
4.3	Silicon Nitride in the Presence of Oxygen	47
4.3.1	$\Theta = \frac{1}{4}$ ML Coverage	49
4.3.2	$\Theta = \frac{1}{2}$ ML Coverage	50
4.3.3	$\Theta = \frac{3}{4}$ ML Coverage	53
4.3.4	$\Theta = 1$ ML Coverage	55
4.3.5	Phase Diagram of β -Si ₃ N ₄ (10 $\bar{1}$ 0) Surface	56
4.3.6	Summary	59
4.4	Silicon Nitride in the Presence of Cerium	60
4.5	Silicon Nitride in the Presence of Oxygen and Rare-Earth Elements	62
4.5.1	Summary	64
	References	64
5	Atomic-Resolution Study of the Interfacial Bonding at Si₃N₄/CeO_{2-δ} Grain Boundaries	67
5.1	Experimental Setup	67
5.2	Z-contrast Images of Si ₃ N ₄ /CeO _{2-δ} Interfaces	68
5.3	EELS Experiments	70
5.4	Summary	72
	References	73
6	Atomic-Resolution Study of β-Si₃N₄/SiO₂ Interfaces	75
6.1	Introduction	75
6.2	Methods	76
6.3	Imaging of the Si ₃ N ₄ /SiO ₂ Interface	76
6.3.1	Spectroscopy	79
6.4	Thicker Intergranular Films	85
6.5	Discussion of the Results and Conclusions	87
	References	88
7	Imaging Bulk α-Si₃N₄	91
7.1	Introduction	91
7.2	Experimental Setup	92
7.2.1	Imaging α -Si ₃ N ₄	92
7.2.2	DFT Calculations	93
7.2.3	EELS Experiments	95
7.3	Summary	95
	References	96
8	Conclusions and Future Work	97
	References	100

Contents	xiii
Appendix A: Projector Augmented Wave Method	101
Appendix B: Incoherent Imaging	105
Index	107

Atomic Scale Characterization and First-Principles
Studies of Si_3N_4 Interfaces

Walkosz, W.

2011, XIV, 110 p., Hardcover

ISBN: 978-1-4419-7816-5
