

Contents

1	General Questions of the Theory of Impedance Vibrators in the Spatial-Frequency Representation	1
1.1	Problem Formulation and Initial Integral Equations	1
1.2	Green's Function as the Kernel of Integral Equations	4
1.3	Integral Equations for a Current on Thin Impedance Vibrators	7
1.4	Approximate Analytical Methods for the Solution of Integral Equations	9
1.4.1	Series Expansion Technique	10
1.4.2	Successive Iterations Method	13
1.5	Averaging Method	15
	References	19
2	Radiation of Electromagnetic Waves by Impedance Vibrators in Free Space and Material Medium	21
2.1	Asymptotic Solution of Integral Equations for Vibrator Current in Free Space	21
2.2	Vibrator Excitation in the Center by Concentrated EMF	24
2.2.1	Impedance Vibrator with Lumped Load in the Center	37
2.2.2	Surface Impedance of Thin Vibrators	38
2.2.3	Resonant Properties of Impedance Vibrators in Free Space	41
2.3	Impedance Vibrators in an Infinite Homogeneous Lossy Medium	44
2.4	Radiation Fields of Impedance Vibrators in Infinite Medium	47
	References	56
3	Radiation of Electromagnetic Waves by Impedance Vibrators in Material Medium over a Perfectly Conducting Plane	57
3.1	Horizontal Impedance Vibrator in a Semi-infinite Material Medium	58

3.2 Systems of Crossed Impedance Vibrators in a Semi-infinite Material Medium	67
3.2.1 Comparison of Numeric Calculations Obtained by Analytical Solution and the Finite Elements Method	81
3.3 Formation of the Radiation Field with Specified Spatial-Polarization Characteristics by a System of Crossed Impedance Vibrators	85
References	90
4 Electromagnetic Waves Scattering by Irregular Impedance Vibrators in Free Space	93
4.1 Impedance Vibrators with Variable Radius	93
4.2 Vibrators with Variable Surface Impedance	100
4.2.1 Solution of the Equation for Current by the Averaging Method	100
4.2.2 Solution of the Equation for Current by the Induced EMF Method	102
4.2.3 Choice of the Approximating Functions for the Vibrator Current	108
References	111
5 Generalized Method of Induced EMF for Investigation of the Characteristics of Impedance Vibrators	113
5.1 Problem Formulation and Solution	113
5.2 Impedance Vibrators with Arbitrary Excitation Point	116
5.3 Vibrator with Symmetric and Antisymmetric Components of Surface Impedance in Free Space	133
5.4 System of Impedance Vibrators in Free Space	138
References	154
6 Radiation of Electromagnetic Waves by Radial Impedance Vibrators on a Perfectly Conducting Sphere	155
6.1 Problem Formulation and Initial Integral Equations	156
6.2 Solution of the Equation for Current by the Successive Iterations Method	157
6.3 Radiation Fields of the Radial Impedance Vibrator on a Perfectly Conducting Sphere	162
6.4 Numerical Results	164
References	167
7 Electromagnetic Waves Scattering by Impedance Vibrators in a Rectangular Waveguide	169
7.1 Vibrators with Constant Surface Impedance in Single-Mode and Below-Cutoff Rectangular Waveguides	169

7.1.1	Problem Formulation and Solution by the Averaging Method	169
7.1.2	Current Distribution and Scattering Fields of Impedance Vibrators in a Waveguide	171
7.1.3	Resonant Properties of Impedance Vibrators in Single-Mode and Below-Cutoff Waveguides	177
7.2	Vibrators with Variable Surface Impedance in a Rectangular Waveguide	184
7.2.1	Problem Formulation and Solution by the Method of Induced EMF	185
7.2.2	Numerical Results	188
7.3	Impedance Vibrators of Variable Radius in a Rectangular Waveguide	188
7.3.1	Problem Formulation and Solution by the Method of Induced EMF	192
7.3.2	Numerical Results	194
7.4	Original Aspects of Experimental Investigations	195
	References	198
	Conclusion	199
Appendix A	Electric Dyadic Green's Functions of the Considered Electrodynamic Volumes	201
Appendix B	Basics of the Method of Moments	205
Appendix C	Generalized Integral Functions	209
Appendix D	Series Summation in the Function of the Self-Field of a Vibrator in a Rectangular Waveguide	213
Appendix E	Electromagnetic Values in the CGS and SI Systems of Units	217
	Index	221

Thin Impedance Vibrators

Theory and Applications

Nesterenko, M.V.; Katrich, V.A.; Penkin, Y.M.; Dakhov,
V.M.; Berdnik, S.L.

2011, XIII, 107 p., Hardcover

ISBN: 978-1-4419-7849-3
