

Contents

1 Preliminaries	1
1.1 Deterministic Demand	1
1.2 Periodic Review Versus Continuous Review	2
1.3 Periodic Review Preliminaries	3
1.4 A One Period Newsvendor Perishable Inventory Model	6
2 The Basic Multiperiod Dynamic Model	9
2.1 The Functional Equations for the General Dynamic Problem	10
3 Extensions of the Basic Multiperiod Dynamic Model	15
3.1 Random Lifetime	15
3.2 Inclusion of a Set-Up Cost	19
3.3 Multiproduct Models of Perishables	20
4 Continuous Review Perishable Inventory Models	25
4.1 One for One ($S-1, S$) Policies	26
4.2 Continuous Review Models with Zero Lead Time	29
4.3 Optimal (Q, r) Policies with Positive Lead Time	29
4.4 An Alternative Approach	31
5 Approximate Order Policies	33
5.1 Forms of Approximate Policies	33
5.2 S Policy Approximations	34
5.3 Higher Order Approximations	38
5.4 Fixed Order Quantity Approximation	39
6 Inventory Depletion Management	41
6.1 Preliminaries	41
6.2 Deterministic Field Life Functions	42
6.3 Stochastic Field Life Functions	47

7	Deterministic Models	49
7.1	The Basic EOQ Model with Perishability	49
7.2	Dynamic Deterministic Model with Perishability	50
8	Decaying Inventories	55
8.1	EOQ Models with Decay	56
8.2	Uncertain Demand	59
9	Queues with Impatient Customers	61
10	Blood Bank Inventory Control	65
11	Afterword	71
	References	73
	About the Author	77
	Index	79
