

Contents

1	Classical Device Modeling	1
	Thomas Windbacher, Viktor Sverdlov, and Siegfried Selberherr	
2	Quantum and Coulomb Effects in Nano Devices	97
	Dragica Vasileska, Hasanur Rahman Khan, Shaikh Shahid Ahmed, Gokula Kannan, and Christian Ringhofer	
3	Semiclassical and Quantum Electronic Transport in Nanometer-Scale Structures: Empirical Pseudopotential Band Structure, Monte Carlo Simulations and Pauli Master Equation	183
	Massimo V. Fischetti, Bo Fu, Sudarshan Narayanan, and Jiseok Kim	
4	Quantum Master Equations in Electronic Transport	249
	B. Novakovic and I. Knezevic	
5	Wigner Function Approach	289
	M. Nedjalkov, D. Querlioz, P. Dollfus, and H. Kosina	
6	Simulating Transport in Nanodevices Using the Usuki Method	359
	Richard Akis, Matthew Gilbert, Gil Speyer, Aron Cummings, and David Ferry	
7	Quantum Atomistic Simulations of Nanoelectronic Devices Using QuADS	405
	Shaikh Ahmed, Krishnakumari Yalavarthi, Vamsi Gaddipati, Abdussamad Muntahi, Sasi Sundaresan, Shareef Mohammed, Sharnali Islam, Ramya Hindupur, Ky Merrill, Dylan John, and Joshua Ogden	

Nano-Electronic Devices

Semiclassical and Quantum Transport Modeling

Vasileska, D.; Goodnick, S. (Eds.)

2011, XI, 441 p., Hardcover

ISBN: 978-1-4419-8839-3
