

Contents

1	High Frequency Optimisation of an Aerospace Structure Through Sensitivity to SEA Parameters	1
	A. Culla, Università di Roma 'La Sapienza'; W. D'Ambrogio, Università dell'Aquila; A. Fregolent, Università di Roma 'La Sapienza'	
2	Benefit of Acoustic Particle Velocity Based Reverberant Room Testing of Spacecraft	15
	E.H.G. Tijs, Microflown Technologies; J.J. Wijker, Dutch Space BV; A. Grillenbeck, IABG mbH	
3	Ultrasonic Vibration Modal Analysis Technique (UMAT) for Defect Detection	25
	J.L. Rose, Pennsylvania State University/FBS, Inc.; F. Yan, FBS, Inc.; C. Borigo, Y. Liang, Pennsylvania State University	
4	Acoustic Testing and Response Prediction of the CASSIOPE Spacecraft	33
	V. Wickramasinghe, A. Grewal, D. Zimcik, National Research Council Canada, Institute for Aerospace Research; A. Woronko, P. Le Rossignol, V-O. Philie, MDA Space Missions; M. O'Grady, R. Singhal, Canadian Space Agency	
5	Force Limited Vibration Testing Applied to the JWST FGS OA	45
	Y. Soucy, Canadian Space Agency; P. Klimas, COM DEV Canada	
6	On Force Limited Vibration for Testing Space Hardware	63
	Y. Soucy, Canadian Space Agency	
7	Calculation of Rigid Body Mass Properties of Flexible Structures	73
	K. Napolitano, M. Schlosser, ATA Engineering, Inc.	
8	Simulating Base-shake Environmental Testing	95
	J. Steedman, NAVCON Engineering Network; B. Schwarz, M. Richardson, Vibrant Technology, Inc.	
9	Geometry-based Updating of 3D Solid Finite Element Models	103
	T. Lauwagie, E. Dascotte, Dynamic Design Solutions	
10	A PZT-based Technique for SHM Using the Coherence Function	111
	J. Vieira Filho, F.G. Baptista, Sao Paulo State University; D.J. Inman, Virginia Polytechnic Institute and State University	
11	The Best Force Design of Pure Modal Test Based Upon a Singular Value Decomposition Approach	119
	J.M. Liu, Tsinghua University/China Orient Institute of Noise & Vibration; Q.H. Lu, Tsinghua University; H.Q. Ying, China Orient Institute of Noise & Vibration	

12	Modal Identification and Model Updating of Pleiades F. Buffe, CNES; N. Roy, TOP MODAL; S. Cogan, FEMTO-ST Institute	131
13	Aircraft GVT Advances and Application – Gulfstream G650 R. Brillhart, K. Napolitano, ATA Engineering, Inc.; L. Morgan, R. LeBlanc, Gulfstream Aerospace Corporation	145
14	Aircraft Dynamics and Payload Interaction – SOFIA Telescope R. Brillhart, K. Napolitano, ATA Engineering, Inc., T. Duvall, L-3 Communications, Integrated Systems	159
15	Application of Modal Analysis for Evaluation of the Impact Resistance of Aerospace Sandwich Materials A. Shahdin, J. Morlier, G. Michon, L. Mezeix, C. Bouvet, Y. Gourinat, Université de Toulouse	171
16	An Integrated Procedure for Estimating Modal Parameters During Flight Testing W. Fladung, G. Hoople, ATA Engineering, Inc.	179
17	Multiple-site Damage Location Using Single-site Training Data R.J. Barthorpe, K. Worden, The University of Sheffield	195
18	Assessment of Nonlinear System Identification Methods Using the SmallSat Spacecraft Structure G. Kerschen, University of Lige; L. Soula, J.B. Vergniaud, Astrium Satellites; A. Newerla, European Space Agency (ESTEC)	203
19	Ground Vibration Testing Master Class: Modern Testing and Analysis Concepts Applied to an F-16 Aircraft J. Lau, B. Peeters, J. Debillé, Q. Guzek, W. Flynn, LMS International; D.S. Lange, Air Force Flight Test Center; T. Kahlmann, AICON 3D Systems GmbH	221
20	Advanced Shaker Excitation Signals for Aerospace Testing B. Peeters, J. Lau, LMS International; A. Carrella, University of Bristol; M. Gatto, G. Coppotelli, Università di Roma “La Sapienza”	229
21	System and Method for Compensating Structural Vibrations of an Aircraft Caused by Outside Disturbances W. Lubert, J. Becker, CASSIDIAN - Air Systems	243
22	Operational Modal Analysis on a Modified Helicopter E. Camargo, D. Strafacci, Centro Técnico Aeroespacial; N-J. Jacobsen, Brüel & Kjær Sound & Vibration Measurement A/S	265
23	Development of New Discrete Wavelet Families for Structural Dynamic Analysis J.R. Foley, J.C. Dodson, U.S. Air Force Research Laboratory; A.J. Dick, Q.M. Phan, P.D. Spanos, Rice University; J.C. Van Karsen, Michigan Technological University; G.L. Falbo, LMS Americas, Inc.	275
24	Model Updating With Neural Networks and Genetic Optimization M.E. Yumer, E. Cigeroglu, H.N. Özgüven, Middle East Technical University	285
25	A Piezoelectric Actuated Stabilization Mount for Payloads Onboard Small UAS K.J. Stuckel, W.H. Semke, University of North Dakota	295

26	Extraction of Modal Parameters From Spacecraft Flight Data	307
	G.H. James, T.T. Cao, V.A. Fogt, R.L. Wilson, NASA Johnson Space Center; T.J. Bartkowicz, The Boeing Company	
27	Dynamic Characterization of Satellite Components Through Non-invasive Methods	321
	D. Macknelly, Imperial College London; J. Mullins, Vanderbilt University; H. Wiest, Rose-Hulman Institute of Technology; D. Mascarenas, G. Park, Los Alamos National Laboratory	
28	An Inertially Referenced Non-contact Sensor for Ground Vibration Tests	339
	B. Allen, Moog CSA Engineering; C. Harris, D. Lange, Edwards Flight Test Center	
29	Reliability of Experimental Modal Data Determined on Large Spaceflight Structures	351
	A. Grillenbeck, S. Dillinger, IABG mbH	
30	Operational Modal Analysis of a Spacecraft Vibration Test	363
	M. O'Grady, R. Singhal, Canadian Space Agency	

Advanced Aerospace Applications, Volume 1
Proceedings of the 29th IMAC, A Conference on
Structural Dynamics, 2011

Proulx, T. (Ed.)

2011, IX, 368 p., Hardcover

ISBN: 978-1-4419-9301-4
