Contents

1 Introduction 1
- 1.1 Motivation 3
  - 1.1.1 Long term Composed Services 3
  - 1.1.2 Change Management 4
- 1.2 A Travel Scenario 6
- 1.3 Research Issues 8
- 1.4 Summary of Contributions 10
- 1.5 Literature Review 11
  - 1.5.1 Change Management in Web Service Community 11
  - 1.5.2 Adaptive Workflow System 12
  - 1.5.3 Change Management in Traditional Databases 14
  - 1.5.4 Ontologies for Web Services 14
- 1.6 Book Organization 18

2 Semantic Support for Change Management 19
- 2.1 A Tree-Structured Web Service Ontology 20
  - 2.1.1 Service Concepts 20
  - 2.1.2 Service Relationships 24
- 2.2 Heuristic Query Process 26
  - 2.2.1 Query Categories 26
  - 2.2.2 Heuristic Query Process 27

3 A Supporting Infrastructure of a LCS 31
- 3.1 An Overview of a LCS 31
- 3.2 LCS Schema 33
  - 3.2.1 Schema Graph 33
  - 3.2.2 LCS Quality 35
  - 3.2.3 LCS Context 35
- 3.3 Schema Correctness 36
  - 3.3.1 Structural Correctness 36
  - 3.3.2 Semantic Correctness 37

4 Top-down Change Language 39
4.1 Change Taxonomy 39
4.1.1 Functional Changes 40
4.1.2 Non-functional changes 44
4.2 Change Operators 45
4.2.1 Functional Change Operators 46
4.2.2 Non-functional Change Operators 47
4.3 Change Language 47
4.3.1 Create Command 48
4.3.2 Select Command 49
4.3.3 Alter Command 50
4.3.4 Update Command 51
4.3.5 Drop Command 51
4.3.6 Analysis on SCML 51

5 Top-down Change Enactment and Change Optimization .. 53
5.1 Change Enactment 53
5.1.1 Select Service Nodes 54
5.1.2 Update LCS schema Graphs 54
5.1.3 Verify Changes 58
5.1.4 Compile LCS Instances 64
5.2 Change Optimization 65
5.2.1 Phase I: Reputation Based Optimization 66
5.2.2 Phase II: QoWS Based Optimization 68

6 Bottom-up Change Specification and Change Model 71
6.1 Change Specification 71
6.1.1 Taxonomy of Changes 71
6.1.2 Mapping of Changes 83
6.2 Change Model 88
6.2.1 Lewin's Change Model 89
6.2.2 Petri Nets as a Modeling Tool 91
6.2.3 Modeling Triggering Changes with Ordinary PNs 94
6.2.4 Modeling Reactive Changes with Reconfigurable PNs . 96
6.2.5 Concurrent Changes 98
6.2.6 Petri Net Representation 99

7 Bottom-up Change Management 101
7.1 Detecting Triggering Changes 102
7.1.1 Push Based Detection Techniques 103
7.1.2 Petri Net Mapping Rule for Detection 104
7.1.3 Detection Algorithm 106
7.2 Propagating Changes 107
7.2.1 Lazy Propagation of Changes 107
7.2.2 Propagation Algorithm 108

7.3 Reacting to Triggering Changes 108
7.4 Change Management Algorithm 111

8 Performance Study 115
8.1 Ontology Query 115
8.1.1 Constructing the Service Ontology 115
8.1.2 Performance Study 116
8.2 Change Enactment 119
8.2.1 Prototype 119
8.2.2 Change Enactment Performance 131
8.3 Change Optimization Performance 136
8.4 Bottom-up Change Management 139
8.4.1 Extended Example 141
8.4.2 WebBIS 142
8.4.3 Simulation 146

9 Conclusion 153
9.1 Research Summary 153
9.1.1 Top-down Change Management 153
9.1.2 Bottom-up Change Management 154
9.2 Directions for Future Research 155
