

Contents

Part I Methodologies

1 Tools to Study Signaling	3
Introduction	3
Molecular Biology Methodology	3
PTMs/PPIs and Functional Proteomics	3
Molecular Cloning	4
DNA Libraries	5
Polymerase Chain Reaction	6
Separation of Nucleic Acids	6
Identification of RNA/DNA Fragments	7
Microarrays	7
Molecular Genetics. Genetic Engineering Techniques	8
Mutagenesis	8
Genetically Engineered Animal Models	8
RNA Interference Methods	10
Proteomics	10
Identification of Proteins/Determination of Level of Expression	11
Posttranslational Modifications	12
Protein–Protein Interaction (Interactional Proteomics)	13
Microproteome Analysis	15
Imaging	15
Conclusions	16
Summary	16
References	17

Part II Normal Signaling Processes

2 Cell-Cycle Signaling, Epigenetics, and Nuclear Function	21
Introduction	21
Regulators of Cell Cycle: Cyclin-Related Mechanism	21
Phosphatases Cdc25	23
Proliferation of Embryonic Myocytes	23
Nonproliferating Adult Cardiomyocytes	23
Proliferating Vascular Cells	24
Regulators of Cell Cycle: Sirtuins	24
Regulators of Cell Cycle: Telomerase	25
Regulators of Cell Cycle: Redox Signaling	26
Regulators of Cell Cycle: MicroRNAs	27
Epigenetic Component of Cell Inheritance	27
Conclusions	28
Summary	28
References	29

3 Signaling in the Endothelium	31
Introduction	31
NO Production	31
Distribution of NO Synthases	31
Regulation of NOS Activity	31
eNOS Phosphorylation	32
eNOS Nitrosylation	32
eNOS and Protein–Protein Interactions	33
Other Endothelial Pathways	36
Prostanoids (Prostaglandins and Prostacyclin)	36
Function of Prostanoids	36
Protein Kinases	43
Conclusions	44
Summary	44
References	45
4 Rapid Signaling Pathways	49
Introduction	49
Neurohormonal Signaling	50
Biogenic Amines	50
Neuropeptides	55
Purinerbic Receptors	57
Peptide Hormones	58
Ca ²⁺ as a Signaling Molecule	60
Conclusions	63
Summary	64
References	65
5 Growth Factors Signaling	69
Introduction	69
Protein Tyrosine Kinase Receptors	69
Fibroblast Growth Factor Family	70
Vascular Endothelial Growth Factor	70
Platelet-Derived Growth Factor	70
Epidermal Growth Factor Family	71
Insulin-Like Growth Factor	72
Insulin	74
Protein Serine/Threonine Kinase Receptors	74
Transforming Growth Factor- β Superfamily	74
G Protein-Coupled Receptors	75
Urocortin	75
Adrenomedullin	75
GFs and Development	75
GFs and Myocardium Pathophysiology: Cardioprotection	77
GFs and Myocardial Pathophysiology: Cardiac Hypertrophy	78
GFs and Myocardium Pathophysiology: Atherosclerosis	78
GFs and Myocardial Pathophysiology: Cardiac Fibrosis	79
GFs and Endothelium: Angiogenesis	79
Conclusions	80
Summary	80
References	81
6 Ion Signaling and Electrophysiological Function	87
Introduction	87
Cardiac Action Potential	87

General Properties of Ion Channels	88
Na ⁺ Channels.....	89
K ⁺ Channels	90
Hyperpolarization-Activated Cyclic Nucleotide-Gated Channels	91
Cl ⁻ Channels.....	93
Conclusions and Future Perspectives.....	95
Summary.....	95
References.....	96
7 Lipid Signaling Pathways in the Heart	99
Introduction.....	99
Phosphoinositide Signaling in the Heart.....	99
PIP ₂ Signaling Associated with Dysrhythmias	100
Ins(1,4,5)P ₃ Signaling in the Heart	102
Cardiac Phosphoinositide 3-Kinases and Phosphatase and Tensin Homolog	103
PI3K Family.....	103
PTEN.....	104
PI3K α Signaling and Myocardial Hypertrophy.....	104
PI3K γ Signaling: Myocardial Contractility and β -Adrenergic Signaling.....	105
Sphingolipid Signaling in Cardiomyocytes	107
Sphingomyelinases and Their Role in the Heart.....	107
Sphingosine Kinases	108
Cardiac S1P Receptor Signaling.....	110
Eicosanoid Signaling in Cardiomyocytes	112
Phospholipases.....	113
Cardiac Cyclooxygenases	113
Cardiac Lipoxygenases	113
Cytochrome P450 Monooxygenases.....	114
Conclusions.....	114
Summary.....	114
References.....	116

Part III Mitochondria

8 Heart Mitochondria: A Receiver and Integrator of Signals	125
Introduction.....	125
Mitochondria Signaling	125
Mitochondrial Bioenergetics.....	126
Mitochondrial Biogenesis	126
Signaling at the Mitochondria.....	126
ROS Generation and Signaling.....	126
Negative Effects of ROS	127
Role of ROS in Cell Signaling.....	129
Mitochondrial K _{ATP} Channel	129
Mitochondrial Permeability Transition Pore.....	130
Mitochondrial Kinases	130
Mitochondrial-related Translocations	131
Mitochondrial Retrograde Signaling.....	131
Endoplasmic Reticulum	132
Mitochondria and Apoptosis Pathways.....	132
Mitochondrial Signaling Defects and Cardiomyopathies	135
Mitochondrial Signaling in Myocardial Ischemia and Cardioprotection	135
Mitochondrial Signaling and Myocardial Hypertrophy.....	137
Key Players in Mitochondrial Signaling	138

Nuclear Gene Activation.....	138
Protein Kinases	138
Calcium Signaling.....	139
Mitochondrial Receptors.....	140
Signals of Survival and Stress Impact Heart Mitochondria	140
Survival Signals/Apoptosis	141
Stress Signals	142
Metabolic Signals and UCPs	142
Future Prospects: Therapeutic Targets and Directions.....	144
Conclusions.....	145
Summary.....	145
References.....	146

Part IV Pediatric Cardiology

9 Signaling Pathways in Cardiovascular Development	155
Introduction.....	155
Cardiac Development and Gene Expression.....	155
Signaling During Cardiac Development	156
Signaling the Cardiomyocyte During Physiological Growth.....	157
Cell Differentiation and Mesoderm Development.....	158
Cardiac Precursors Differentiation.....	160
Migration of the Cardiac Precursors	162
Coordination of Signaling Pathways and Progenitor Cells Functionality in Cardiogenesis	163
Proliferation of Progenitor Cardiac Cells in Cardiac Development	164
Tube Looping and Segmentation	164
Other T-Box Factors.....	167
MEF2C and HAND Proteins	167
Generation of Left–Right Identity	169
Proepicardium	170
Chamber Growth and Maturation	171
Nuclear Regulators of Chamber Growth and Maturation	171
Chamber Septation.....	172
Atrioventricular Junction and Formation of the Atrioventricular Cushions	172
Formation of the AV Valves.....	173
Extracardiac Contribution to Normal and Abnormal Cardiac Development.....	178
Epicardium-Derived Cells.....	178
ErbB: Integration of Extracellular Matrix Signals.....	179
Formation of Aortic and Pulmonic Valves.....	182
Cardiac Conduction System.....	183
Formation of the Cardiac Conduction System.....	183
Connexins and CCS	184
Other Signaling Pathways and Transcriptional Regulators.....	184
Epigenetic Factors and CCS	185
Endothelin-1/Neuregulin and CCS	185
Markers of CCS Development.....	186
Generation of the CCS	186
Conclusions.....	187
Summary.....	187
References.....	188
10 Signaling in Congenital Heart Disease	197
Introduction.....	197
Etiology of CHD.....	197

Molecular Mechanisms of CHD	198
Alterations of Signaling Pathways Associated with Valve Abnormalities	200
Noonan Syndrome	200
LEOPARD Syndrome	200
Costello and Cardio-Facio-Cutaneous Syndromes	201
NOTCH Signaling Pathway in CHD	201
Conotruncal and Outflow Tract Defects	202
DiGeorge Syndrome	202
Williams Syndrome.....	202
CHARGE Syndrome.....	202
Jacobsen Syndrome.....	202
Cardiac Septation Abnormalities	203
Holt–Oram Syndrome.....	203
Okihiro and Townes–Brocks Syndromes.....	203
ErbB Signaling in CHD	204
NODAL Signaling Pathway.....	205
Marfan and Marfan-Like Syndromes.....	206
CHD-Causing Genes with Elusive Molecular Mechanism(s)	206
<i>CRELD1</i> Gene Mutations	206
<i>FLNA</i> Gene Mutations.....	206
Mutations in Other Genes	207
CHD Associated with MicroRNA Dysregulation.....	207
Gene Expression Profiling in CHD.....	207
Conclusions and Future Progress.....	208
Summary.....	210
References.....	212

Part V Aging

11 Signaling in the Aging Heart.....	221
Introduction.....	221
Animal Studies.....	221
Cardiac Stem and Progenitor Cells in Aging.....	222
Signaling the Endothelium in Aging.....	223
Telomeres and CV Aging.....	225
Cellular Damage/Cell Loss, Mitochondria, and CV Aging.....	228
Reactive Oxidative Species Generation and CV Aging.....	230
Inflammation Signaling Pathways and CV Aging	231
Neuroendocrine Signaling in CV Aging.....	232
Adrenergic and Muscarinic Receptors in the Aging Heart.....	232
Cardiac G Protein-Coupled Receptors.....	233
Thyroid Hormone/SERCA in the Aging Heart.....	234
Insulin, Growth Hormone and Other Interdependent Signaling Molecules	234
Pro-death and Prosurvival Signaling Pathways in Aging	236
Gene Induction in Cardiac Aging	236
Epigenetics and Environmental Factors in Cardiac Aging	237
Conclusions.....	237
Summary.....	237
References.....	238

Part VI Signaling in Cardiovascular Disease

12 Signaling in Endomyocarditis	247
Introduction.....	247
Viral Entry into the Cardiac Myocyte	247

Innate Immunity.....	248
Virus-Mediated Myocardial Injury	250
Virus-Mediated Pathways Involved in the Development of Adaptive Immunity	250
Other Viruses	252
Nonviral Infective Myocarditis	252
Endocarditis	253
Conclusions.....	253
Summary.....	254
References.....	254
13 Signaling in Hypertension	257
Introduction.....	257
Renin–Angiotensin–Aldosterone System.....	258
Angiotensin	258
Renin.....	259
Angiotensin-Converting Enzyme.....	260
Aldosterone	260
Sympathetic Overactivity.....	260
Natriuretic Peptides.....	261
RedOx Signaling.....	262
Mitochondrial Dysfunction.....	263
Signaling in Dysfunctioning Endothelium.....	264
Conclusions.....	265
Summary.....	266
References.....	267
14 Gene Expression and Signaling Pathways in Myocardial Ischemia	271
Introduction.....	271
Genetics of Myocardial Ischemia	271
Stress Signaling.....	273
Metabolic Signaling	273
Myocardial Ischemia and Mitochondria Signaling.....	274
Ischemia and Cell Death	275
Inflammatory Signaling Pathway.....	278
Other Participants' Molecules in the Inflammatory Signaling Pathways	279
Nuclear Transcription Factor Kappa B	279
Toll-Like Receptor Signaling Pathways in Myocardial Ischemia.....	280
Chemokines.....	280
Other Signaling Pathways in Myocardial Ischemia	281
Connexin and Transforming Growth Factors Signaling	281
NO Signaling	281
Conclusions.....	281
Summary.....	282
References.....	283
15 Signaling in Hypertrophy and Heart Failure	287
Introduction.....	287
Triggers of Cardiac Hypertrophy	288
Promoters of the Hypertrophic Response	288
Common Signaling Pathways in Physiological and Pathological Cardiomyocyte Growth.....	289
Second Messengers Signaling Pathways	289
Adrenergic Signaling	289
Muscarinic Receptors.....	291
Cyclic GMP	291

Endothelin	292
Angiotensin	292
Growth Factors	292
Protease-Activated Receptors	293
G Proteins	293
Cyclin Signaling	294
Adenylyl Cyclase	294
Phospholipase C	294
Nitric Oxide	295
Kinases and Phosphatases	295
Protein Kinase A	295
Protein Kinase B (PKB/Akt) and Phosphoinositide 3-Kinase	295
Protein Kinase C	299
Protein Kinase G	299
Ca ²⁺ -Mediated Kinase Signaling	299
Calcineurin/Calmodulin	299
G Protein Regulated Kinases	301
MAP Kinases	301
Integrating Responses: Transcription Factors and Translational Control	302
Role of Growth Factors	302
Receptor Tyrosine Kinases	302
NF- κ B	303
Peroxisome Proliferator-Activated Receptors α and γ and Co-Factors (RXR and PGC)	303
Toll-Like Receptors	305
Thyroid Hormone	305
Insulin	306
Translation Control	307
Other Signaling Pathways in Hypertrophy and Heart Failure	308
Apoptosis Signaling	308
Caveolae	309
Integrin Signaling	309
Hypertrophic Cardiac Remodeling	309
Myocardial Metabolism and Neurohormonal Signaling in Cardiac Remodeling	310
Insights from Transgenic Models	310
Neurohormonal Changes and Cytokines	311
Cardiac Hypertrophy and Hypertension, Gender Differences	311
Antihypertrophic Signaling Pathways	312
Calcineurin Inhibitors	312
Nitric Oxide/PKG I/Calcium	312
Diacylglycerol	313
miRNA and Hypertrophy	313
Conclusions	313
Summary	314
References	314
 16 Signaling in Diabetes and Metabolic Syndrome	 323
Introduction	323
Insulin	323
Advanced Glycation End-Products	326
Lipotoxicity	327
Adipocytokines	328
Cytokines	328
Adiponectin	329
Leptin	331

Ghrelin	332
Metabolic Syndrome	332
Nuclear Receptors	333
Oxidative Stress	334
Mitochondrial Dysfunction	334
Genetic Basis for Diabetes and Metabolic Syndrome	336
Genes Associated with Diabetes	336
Genes Involved in Metabolic Syndrome and Insulin Resistance	338
Conclusions	340
Summary	341
References	342
17 Dysrhythmias/Channelopathies and Signaling Pathways	351
Introduction	351
Inherited Cardiac Dysrhythmias	351
Long QT Syndrome	352
Short QT Syndrome	355
Brugada Syndrome	355
Catecholaminergic Polymorphic Ventricular Tachycardia	357
Familial Atrial Fibrillation	358
Cardiac Conduction Defects	359
Sudden Death Infant Syndrome	360
Wolff–Parkinson–White Syndrome	360
Acquired Dysrhythmias	361
Dysrhythmias Associated with Defects in FAO and Mitochondrial Function	362
Conclusions and Future Directions	363
Summary	364
References	366
18 Signaling in Atherosclerosis	371
Introduction	371
The Role of Lipids	371
LDL Particles	372
HDL Particles	372
Activation of Immune Cells in Atherosclerosis	374
Endothelial Activation, Adhesion Molecules, and Chemokines	374
Heterogeneity of Monocytes	375
T-Cell Activation in Vascular Inflammation	375
Plaque Rapture	376
Macrophage Death in Atherosclerosis	376
Rho Kinases as Mediators of Atherosclerosis	377
ROCKs	377
Statins	378
ROCKs in Atherogenesis	378
Oxidative Stress	379
Nitric Oxide Is a Protector Against Atherosclerosis	380
NADPH Oxidase	381
Xantine Oxidase	382
Mitochondrial Oxidative Dysfunction	383
Antioxidant Enzymes	384
Phosphatidylinositol 3-Kinase (PI3K) Signaling	385
TNF in Atherogenesis	385
TNF and Lipid Metabolism	385
TNF Effects on Endothelial Dysfunction	386
TNF and ROS Generation	387

Antiinflammatory Factors	387
TGF- β Signaling Pathway	387
Peroxisome Proliferator-Activated Receptors.....	388
Liver X Receptor Signaling	389
Angiogenesis and Atherosclerosis	390
Conclusions and Future Directions.....	390
Summary.....	391
References.....	394

Part VII Targeting Signaling in Cardiovascular Medicine

19 Stem Cells Signaling Pathways in the Heart	407
Introduction.....	407
Stem Cell Types	408
Embryonic Stem Cells	408
Bone Marrow-Derived Cells	409
Skeletal Myoblasts.....	409
Resident Cardiac Progenitor Cells.....	409
Induced Pluripotent Stem Cells	410
Cell Delivery Techniques.....	410
Stem Cell Signaling Pathways	410
Wnt Signaling	411
Nuclear Factor- κ B Signaling	413
SDF-1/CXCR4 Signaling.....	415
Mitogen-Activated Protein Kinases	416
PI3K-Akt-mTOR Signaling.....	419
Conclusions and Future Directions.....	421
Summary.....	422
References.....	424
 20 Cardioprotection and Signaling Pathways	 431
Introduction.....	431
Reperfusion and Cardioprotection	431
Ischemic Preconditioning.....	432
Cellular and Molecular Events in IPC	433
Triggering Early IPC.....	433
Mediators of Early IPC	434
The Phosphatidylinositol 3-Kinase Pathway	434
Protein Kinase C	434
Tyrosine Kinases and MAP Kinases.....	436
IPC, ATP-Sensitive Potassium Channels and Potassium Channel Openers	436
Mitochondrial Events in IPC	437
Cardioprotection	438
ROS and CP	439
Early and Late IPC Pathways.....	439
Potential Applications of CP to Clinical Medicine.....	440
Mitochondrial End-Effectors of IPC Cardioprotection.....	441
Other Targets in IPC	443
Gene Expression in Early IPC	443
Second Window of Protection/Delayed Preconditioning	443
Postconditioning and Cardioprotection.....	445
Remote Conditioning.....	446
Application in Human.....	447
Clinical Trials.....	447
Conclusions and Future Perspective	448

Summary	449
References	449
21 Targeting Signaling Pathways.....	455
Introduction.....	455
Reactive Oxygen Species Generation, Effects: Antioxidant Response	456
Metabolic Signaling Targets	456
PPAR Isoform-Specific Agonists.....	457
Targeting Advanced Glycation End Products	459
Inflammation Control.....	459
Apoptotic and Prosurvival (Proliferative) Pathways.....	460
β -Adrenergic Pathways and Calcium Signaling	461
Conclusions.....	462
Summary.....	462
References.....	463
Part VIII Looking to the Future	
22 Signaling and the Frontiers Ahead.....	469
Introduction.....	469
Caveats in the Application of Targeting Specific Signaling	469
Emerging Concepts in an Integrative Approach to Cardiovascular Signaling.....	470
Current and Future Technology in Cardiovascular Signaling.....	470
Integrating “Omics” in Cardiomyocyte Signaling	471
Microarray and Genetic Biomarkers.....	472
Modeling Systems Approaches to Assess Signaling	472
Bioinformatics/Mathematics/Computational Biology in Signaling.....	473
Postgenomic Contributions to New and Future Therapeutic Options in Cardiovascular Medicine	474
Conclusions and Future Frontiers	475
Summary.....	475
References.....	476
Glossary	479
Index.....	499
