Preface	ix
1 Banach and Hilbert Spaces	1
1.1 Banach Spaces	1
1.1.1 Introduction	1
1.1.2 Normed Vector Spaces	1
1.1.3 Examples of Banach Spaces	4
1.1.4 Hölder and Lipschitz Spaces	10
1.2 Hilbert Spaces	12
1.2.1 Basic Definitions	12
1.2.2 Orthogonality	14
1.2.3 Projections	16
1.3 Bibliographical Notes	20
2 Bounded and Unbounded Linear Operators	21
2.1 Introduction	21
2.2 Linear Operators	21
2.2.1 Bounded Operators	21
2.2.2 Unbounded Linear Operators	31
2.2.3 Examples of Unbounded Operators	31
2.3 Sectorial Linear Operators	39
2.3.1 Basic Definitions	39
2.3.2 Examples of Sectorial Operators	40
2.4 Semigroups of Linear Operators	41
2.4.1 Basic Definitions	41
2.4.2 Basic Properties of Semigroups	43
2.4.3 Analytic Semigroups	44
2.5 Intermediate Spaces	46
2.5.1 Fractional Powers of Sectorial Operators	46
2.5.2 The Spaces $D_A(\alpha, p)$ and $D_A(\alpha)$	48
2.5.3 Hyperbolic Semigroups	51

2.6	Evolution Families and Their Properties	53
2.6.1	Evolution Families	53
2.6.2	Estimates for $U(t, s)$	55
2.7	Bibliographical Notes	59
3	An Introduction to Stochastic Differential Equations	61
3.1	Fundamentals of Probability	61
3.1.1	Probability and Random Variables	61
3.1.2	Sequence of Events	63
3.1.3	Convergence of Random Variables	66
3.1.4	Conditional Expectation	73
3.2	Stochastic Processes	76
3.2.1	Continuity	77
3.2.2	Separability and Measurability	79
3.2.3	Stopping Times	83
3.2.4	Gaussian Processes	84
3.2.5	Martingales	85
3.3	Stochastic Integrals in One Dimension	88
3.3.1	Motivation	88
3.3.2	Itô Integrals	90
3.3.3	Itô Integrals with Stopping Time	94
3.3.4	Itô Formula	95
3.3.5	Diffusion Process	97
3.4	Wiener Process and Stochastic Integrals in a Hilbert Space	98
3.4.1	Wiener Process in a Separable Hilbert Space	98
3.4.2	Stochastic Integrals in a Hilbert Space	99
3.4.3	Stochastic Convolution Integrals	101
3.5	Existence of Solutions of Stochastic Differential Equations in a Hilbert Space	105
3.5.1	Existence and Uniqueness	105
3.5.2	L^2 -Bounded Solutions	106
3.5.3	Stochastic Delay Differential Equation and Exponential Stability	111
3.6	Bibliographical Notes	114
4	p-th Mean Almost Periodic Random Functions	117
4.1	Almost Periodic Functions	118
4.1.1	Introduction	118
4.1.2	Basic Definitions	118
4.1.3	Properties of Almost Periodic Functions	119
4.2	p -th Mean Almost Periodic Processes	123
4.2.1	Composition of p -th Mean Almost Periodic Processes	125
4.3	Bibliographical Notes	126

5	Existence Results for Some Stochastic Differential Equations	129
5.1	The Autonomous Case	129
5.2	The Nonautonomous Case	134
5.2.1	Introduction	134
5.2.2	Existence of p -th Mean Almost Periodic Solutions	135
5.2.3	Example	141
5.3	Bibliographical Notes	142
6	Existence Results for Some Partial Stochastic Differential Equations	143
6.1	The Autonomous Case	143
6.1.1	Existence of p -th Mean Almost Periodic Solutions	144
6.1.2	Example	153
6.2	The Nonautonomous Case	154
6.2.1	Introduction	154
6.2.2	Existence of p -th Mean Almost Periodic Solutions	155
6.3	Existence Results Through the Schauder Fixed Point Theorem	165
6.3.1	Existence of p -th Mean Almost Periodic Mild Solutions	165
6.3.2	Existence of S^p Almost Periodic Mild Solutions	176
6.3.3	Example	194
6.4	Bibliographical Notes	195
7	Existence Results For Some Second-Order Stochastic Differential Equations	197
7.1	Square-Mean Almost Periodic Solutions to Autonomous Second-Order SDEs	197
7.1.1	Introduction	197
7.1.2	Preliminaries	199
7.1.3	The Abstract Setting	200
7.1.4	Existence of Square-Mean Almost Periodic Solutions	201
7.2	Square-Mean Almost Periodic Solutions to Nonautonomous Second-Order SDEs	205
7.2.1	Introduction	205
7.2.2	Square-Mean Almost Periodic Solutions	207
7.3	Bibliographical Notes	212
8	Mean Almost Periodic Solutions to Some Stochastic Difference Equations	213
8.1	Introduction	213
8.2	Basic Definitions	213
8.3	Preliminary Results	214
8.4	Mean Almost Periodic Solutions to Stochastic Beverton–Holt Equations	218
8.5	Bibliographical Notes	223
	References	225
	Index	233
	About the Authors	235

Almost Periodic Stochastic Processes

Bezandry, P.H.; Diagana, T.

2011, XV, 235 p., Hardcover

ISBN: 978-1-4419-9475-2
