

# Contents

<b>Preface</b> .....	vii
<b>1 The Set of Real Numbers</b> .....	1
1.1 Sets and Mappings .....	1
1.2 The Set $\mathbf{R}$ .....	4
1.3 The Subset $\mathbf{N}$ and the Principle of Induction .....	9
1.4 The Completeness Property .....	16
1.5 Sequences and Limits .....	20
1.6 Nonnegative Series and Decimal Expansions .....	31
1.7 Signed Series and Cauchy Sequences .....	37
<b>2 Continuity</b> .....	47
2.1 Compactness .....	47
2.2 Continuous Limits .....	48
2.3 Continuous Functions .....	52
<b>3 Differentiation</b> .....	69
3.1 Derivatives .....	69
3.2 Mapping Properties .....	77
3.3 Graphing Techniques .....	83
3.4 Power Series .....	94
3.5 Trigonometry .....	107
3.6 Primitives .....	114
<b>4 Integration</b> .....	123
4.1 The Cantor Set .....	123
4.2 Area .....	127
4.3 The Integral .....	143
4.4 The Fundamental Theorem of Calculus .....	160
4.5 The Method of Exhaustion .....	173

<b>5</b>	<b>Applications</b>	185
5.1	Euler's Gamma Function	185
5.2	The Number $\pi$	191
5.3	Gauss' Arithmetic–Geometric Mean (AGM)	206
5.4	The Gaussian Integral	214
5.5	Stirling's Approximation of $n!$	224
5.6	Infinite Products	231
5.7	Jacobi's Theta Functions	241
5.8	Riemann's Zeta Function	248
5.9	The Euler–Maclaurin Formula	257
<b>A</b>	<b>Solutions</b>	267
A.1	Solutions to Chapter 1	267
A.2	Solutions to Chapter 2	283
A.3	Solutions to Chapter 3	290
A.4	Solutions to Chapter 4	310
A.5	Solutions to Chapter 5	330
	<b>References</b>	357
	<b>Index</b>	359

Introduction to Calculus and Classical Analysis

Hijab, O.

2011, XII, 364 p., Hardcover

ISBN: 978-1-4419-9487-5
