

# Contents

<b>1</b>	<b>Experimental and Numerical Investigation of Forming Limit Diagram for AA3105</b>	<b>1</b>
	M. Safari, Islamic Azad University; S.J. Hoseinipour, Babol University of Technology; H.D. Azodi, Iran University of Science and Technology	
<b>2</b>	<b>Multi-field Microphone – When the Sound Field is Unknown</b>	<b>7</b>
	S. Gade, N.V. Bøgholm, Brüel & Kjær Sound & Vibration A/S	
<b>3</b>	<b>Separating Three Sources of Changes in Structural Health Monitoring</b>	<b>17</b>
	J. Kullaa, Aalto University School of Science and Technology	
<b>4</b>	<b>Structural Damage Identification With Various Uncertainties</b>	<b>27</b>
	J.-S. Lew, M. Williamson, Tennessee State University	
<b>5</b>	<b>Excitation Techniques for Testing Bike Vibration Transmission in the Laboratory</b>	<b>35</b>
	J. Lépine, Y. Champoux, J.-M. Drouet, Université de Sherbrooke	
<b>6</b>	<b>Damage Detection Using Blind Source Separation Techniques</b>	<b>45</b>
	V.H. Nguyen, J.-C. Golinval, University of Liège	
<b>7</b>	<b>Application of Image Sensing to Motion Study of High-voltage Switchgear</b>	<b>57</b>
	S. Marushima, Y. Ohda, M. Shimizu, H. Takagi, Toshiba Corporation	
<b>8</b>	<b>CAE Based Approach to Understand a Behavior of Vibro-acoustic System</b>	<b>65</b>
	K. Furuya, Chuo University; T. Yoshimura, Tokyo Metropolitan University; N. Okubo, T. Toi, Chuo University	
<b>9</b>	<b>Verification of Coverage of Inverse-numerical Acoustic Analysis</b>	<b>73</b>
	T. Koizumi, N. Tsujiuchi, A. Kobayashi, Doshisha University; H. Uehara, Yanmar Co., Ltd.	
<b>10</b>	<b>Prototype WSN Platform for Performing Dynamic Monitoring of Civil Engineering Structures</b>	<b>81</b>
	R. Aguilar, L.F. Ramos, P.B. Lourenço, University of Minho; R. Severino, R. Gomes, P. Gandra, M. Alves, E. Tovar, Polytechnic Institute of Porto	
<b>11</b>	<b>Damage Identification in CRFP Laminates using a Statistical Method</b>	<b>91</b>
	M.T.H. Sultan, K. Worden, W.J. Staszewski, The University of Sheffield	

<b>12</b>	<b>High Intensity Noise Generation for Extremely Large Reverberant Room Test Applications</b>	<b>103</b>
	A. Grewal, National Research Council of Canada; R. Ramakrishnan, Ryerson University/ Aiolos Engineering Corporation; W.O. Hughes, NASA Glenn Research Center; B. Woyski, TEAM Corporation; G. Elfstrom, Aiolos Engineering Corporation; C. Mech, Team Corporation; Y. Chen, National Research Council of Canada	
<b>13</b>	<b>Human Induced Dynamic Loads Estimation Based on Body Motion</b>	<b>119</b>
	P. Mazzoleni, E. Zappa, Politecnico di Milano	
<b>14</b>	<b>In the Field Validation of Human Induced Loads Measuring Technique</b>	<b>127</b>
	P. Mazzoleni, E. Zappa, Politecnico di Milano	
<b>15</b>	<b>Optimal Selection of Artificial Boundary Conditions for Model Update and Damage Detection</b>	<b>137</b>
	J.H. Gordis, Naval Postgraduate School; K. Papagiannakis, Hellenic Navy	
<b>16</b>	<b>Use of Damping Solution for Acceleration Measurements in High Vibration Environments</b>	<b>155</b>
	T. Connolly, Measurement Specialties, Inc.	
<b>17</b>	<b>Efficiency Comparison of CMS Vibroacoustic Formulations for Uncertain Damped Problems</b>	<b>161</b>
	M. Ouisse, E. Sadoulet-Reboul, University of Franche-Comté	
<b>18</b>	<b>Nonlinear Parameteric Health Monitoring for Vibrating Structures Under Non-stationary Excitation</b>	<b>177</b>
	T.A. Doughty, N.S. Higgins, University of Portland	
<b>19</b>	<b>Displacement Based Approach for a Robust Operational Modal Analysis</b>	<b>187</b>
	G. De Canio, ENEA; P. Andersen, Structural Vibration Solutions A/S; I. Roselli, M. Mongelli, ENEA; E. Esposito, Artemis srl.	
<b>20</b>	<b>Effect of Systematic FRF Errors on Matrix Inversion Based Vibro-acoustic Analysis Methods</b>	<b>197</b>
	P. Gajdatsy, P. Sas, W. Desmet, Katholieke Universiteit Leuven; K. Janssens, H. Van der Auweraer, LMS International	
<b>21</b>	<b>Peri-prosthetic Fracture Vibration Testing</b>	<b>207</b>
	J. Cruce, Oklahoma State University; J. Erwin, Middlebury College; K. Remick, University of Illinois Urbana-Champaign; P. Cornwell, Rose-Hulman Institute of Technology; R.M. Meneghini, Indiana University; J. Racanelli, Stryker Orthopaedics	
<b>22</b>	<b>Performance Comparison of Fiber Optic Tips in Interferometric Displacement Measurements</b>	<b>227</b>
	R. Grahm, University of New Mexico; H. Karimi, University of California, San Diego; K. Wilson, Rose-Hulman Institute of Technology; E. Moro, A. Puckett, Los Alamos National Laboratory	
<b>23</b>	<b>Development of Polymer ‘Chips’ Used in Medical Diagnostics</b>	<b>237</b>
	Z.G. Brush, Trinity University; L.M. Schultz, Georgia Institute of Technology; J.W. Vanness, Michigan Technological University; K.M. Farinholt, Los Alamos National Laboratory; S.A. Sarles, D.J. Leo, Virginia Polytechnic Institute and State University	

<b>24</b>	<b>Acoustic Fluid-Structure Interaction of Cars and Ships (Tutorial)</b>	<b>247</b>
	L. Gaul, University of Stuttgart	
<b>25</b>	<b>The Testing Behind the Test Facility: The Acoustic Design of the NASA Glenn Research Center's World-class Reverberant Acoustic Test Facility</b>	<b>255</b>
	W.O. Hughes, M.E. McNelis, A.D. Hozman, A.M. McNelis, NASA Glenn Research Center	
<b>26</b>	<b>Detection of Damage in Space Frame Structures With L-shaped Beams and Bolted Joints Using Changes in Natural Frequencies</b>	<b>263</b>
	K. He, W.D. Zhu, University of Maryland, Baltimore County	
<b>27</b>	<b>Steels for Caribbean Steel Drums</b>	<b>291</b>
	S.E. Maloney, Metal Industries Company Limited	

Sensors, Instrumentation and Special Topics, Volume 6  
Proceedings of the 29th IMAC, A Conference on  
Structural Dynamics, 2011  
Proulx, T. (Ed.)  
2011, X, 310 p., Hardcover  
ISBN: 978-1-4419-9506-3
