

Contents

1	Introduction	1
2	Additive Cauchy Equation	19
2.1	Behavior of Additive Functions	19
2.2	Hyers–Ulam Stability	21
2.3	Hyers–Ulam–Rassias Stability	24
2.4	Stability on a Restricted Domain	57
2.5	Method of Invariant Means	71
2.6	Fixed Point Method	74
2.7	Composite Functional Congruences	76
2.8	Pexider Equation	81
2.9	Remarks	86
3	Generalized Additive Cauchy Equations	87
3.1	Functional Equation $f(ax + by) = af(x) + bf(y)$	87
3.2	Additive Cauchy Equations of General Form	91
3.3	Functional Equation $f(x + y)^2 = (f(x) + f(y))^2$	98
4	Hosszú’s Functional Equation	105
4.1	Stability in the Sense of Borelli	105
4.2	Hyers–Ulam Stability	109
4.3	Generalized Hosszú’s Functional Equation	112
4.4	Hosszú’s Equation is not Stable on the Unit Interval	117
4.5	Hosszú’s Functional Equation of Pexider Type	120
5	Homogeneous Functional Equation	123
5.1	Homogeneous Equation Between Banach Algebras	123
5.2	Superstability on a Restricted Domain	129
5.3	Homogeneous Equation Between Vector Spaces	131
5.4	Homogeneous Equation of Pexider Type	137

6	Linear Functional Equations	143
6.1	A System for Linear Functions	143
6.2	Functional Equation $f(x + cy) = f(x) + cf(y)$	146
6.3	Stability for Other Equations	148
7	Jensen's Functional Equation	155
7.1	Hyers–Ulam–Rassias Stability	155
7.2	Stability on a Restricted Domain	160
7.3	Fixed Point Method	166
7.4	Lobačevskiĭ's Functional Equation	168
8	Quadratic Functional Equations	175
8.1	Hyers–Ulam–Rassias Stability	175
8.2	Stability on a Restricted Domain	183
8.3	Fixed Point Method	190
8.4	Quadratic Functional Equation of Other Type	194
8.5	Quadratic Functional Equation of Pexider Type	198
9	Exponential Functional Equations	207
9.1	Superstability	207
9.2	Stability in the Sense of Ger	215
9.3	Stability on a Restricted Domain	217
9.4	Exponential Functional Equation of Other Type	221
10	Multiplicative Functional Equations	227
10.1	Superstability	227
10.2	δ -Multiplicative Functionals	229
10.3	Theory of AMNM Algebras	233
10.4	Functional Equation $f(x^y) = f(x)^y$	236
10.5	Functional Equation $f(x + y) = f(x)f(y)f(1/x + 1/y)$	240
11	Logarithmic Functional Equations	253
11.1	Functional Equation $f(x^y) = yf(x)$	253
11.2	Superstability of Equation $f(x^y) = yf(x)$	254
11.3	Functional Equation of Heuvers	261
12	Trigonometric Functional Equations	267
12.1	Cosine Functional Equation	267
12.2	Sine Functional Equation	271
12.3	Trigonometric Equations with Two Unknowns	274
12.4	Butler–Rassias Functional Equation	279
12.5	Remarks	284

13	Isometric Functional Equation	285
13.1	Hyers–Ulam Stability	285
13.2	Stability on a Restricted Domain	301
13.3	Fixed Point Method	309
13.4	Wigner Equation	314
14	Miscellaneous	325
14.1	Associativity Equation	325
14.2	Equation of Multiplicative Derivation	327
14.3	Gamma Functional Equation	329
14.4	Fibonacci Functional Equation	336
	Bibliography	345
	Index	359

Hyers-Ulam-Rassias Stability of Functional Equations in
Nonlinear Analysis

Jung, S.-M.

2011, XIV, 362 p., Hardcover

ISBN: 978-1-4419-9636-7
