

Contents

Preface	ix
1 INTERPOLATION and CURVE FITTING	1
1.1 Lagrange and Lagrange-Like Interpolation	2
1.2 Spline Interpolation	7
1.3 Interpolation by Pade Approximants	12
1.4 Operator Interpolation for Equally Spaced Data	13
1.5 Curve Fitting by the Method of Least Squares	18
Problems	26
2 ZEROS of a FUNCTION	31
2.1 Roots of a Cubic Polynomial	31
2.2 Roots of a Quartic/Biquadratic Polynomial	43
2.3 Regula Falsi and Newton–Raphson Methods	47
2.4 Zeros by Interpolation for Discrete Data	51
2.5 Roots of a Polynomial by Root Squaring Methods	56
Problems	71
3 SERIES	73
3.1 Definitions and Convergence	73
3.2 Summing a Series	78
3.3 Approximating the Sum of a Convergent Series	89
3.4 Fourier Series	96
Problems	102
4 INTEGRATION	105
4.1 Expanding the Integrand in a Series	105
4.2 Euler–MacLaurin Approximation	106
4.3 Newton–Cotes Quadratures	112
4.4 Gaussian Quadratures	123
4.5 Integral of a Function with Singularities	145

4.6	Monte Carlo Integration.....	154
4.7	Evaluating Integrals Using the Gamma and Beta Functions.....	157
4.8	Integration Using Heaviside Operators.....	162
	Problems	165
5	DETERMINANTS AND MATRICES	169
5.1	Evaluation of a Determinant.....	169
5.2	Matrices.....	182
	Problems	235
6	ORDINARY FIRST ORDER DIFFERENTIAL EQUATIONS	237
6.1	Taylor Series Approximation.....	238
6.2	Picard Method.....	243
6.3	Runge–Kutta Method	245
6.4	Finite Difference Methods	249
6.5	Predictor–Corrector Methods.....	254
	Problems	266
7	ORDINARY SECOND ORDER DIFFERENTIAL EQUATIONS	269
7.1	Initial and Boundary Conditions.....	269
7.2	Taylor Series Approximations for Equations Subject to Initial Conditions.....	271
7.3	Runge–Kutta Approximations for Equations Subject to Initial Conditions.....	273
7.4	Finite Difference Approximate Solutions for Equations Subject to Initial Conditions.....	277
7.5	Finite Difference Approximations for Equations Subject to Boundary Conditions	283
7.6	Shooting Method for Equations Subject to Dirichlet Boundary Conditions.....	297
7.7	Frobenius Approximations	301
	Problems	312
8	PARTIAL DIFFERENTIAL EQUATIONS	315
8.1	Initial and Boundary Conditions.....	316
8.2	Taylor Series Approximations.....	318
8.3	Runge–Kutta Approximations	327
8.4	Finite Difference Methods	333
	Problems	377
9	LINEAR INTEGRAL EQUATIONS IN ONE VARIABLE.....	383
9.1	Fredholm Equations of the First Kind with Non-singular Kernel	383
9.2	Fredholm Equations of the Second Kind with Non-singular Kernel	392
9.3	Eigensolutions of Fredholm Equations of the Second Kind with Non-singular Kernel	407

9.4	Volterra Equations with Non-singular Kernel	414
9.5	Fredholm Equations with Weakly Singular Kernel	421
9.6	Fredholm Equations with Kernels Containing a Pole Singularity.....	434
	Problems	442
Appendix 1	447
Appendix 2	451
Appendix 3	455
Appendix 4	469
Appendix 5	475
References	479
Index	481

Numerical Approximation Methods

$\pi \approx 355/113$

Cohen, H.

2011, XIII, 485 p., Hardcover

ISBN: 978-1-4419-9836-1
