

Contents

1	Nanoscale Scratching with Single and Dual Sources Using Atomic Force Microscopes	1
	Ampere A. Tseng	
2	Local Oxidation Using Dynamic Force Mode: Toward Higher Reliability and Efficiency	65
	Hiromi Kuramochi and John A. Dagata	
3	Double Layer Local Anodic Oxidation Using Atomic Force Microscopy	91
	Urszula Gasser, Martin Sigrist, Simon Gustavsson, Klaus Ensslin, and Thomas Ihn	
4	Nanomanipulation of Biological Macromolecules by AFM	129
	Guoliang Yang	
5	Nanografting: A Method for Bottom-up Fabrication of Designed Nanostructures	167
	Tian Tian, Zorabel M. LeJeune, Wilson K. Serem, Jing-Jiang Yu, and Jayne C. Garno	
6	Nanopattern Formation Using Dip-Pen Nanolithography	207
	Bernhard Basnar	
7	Nanofabrication of Functional Nanostructures by Thermochemical Nanolithography	265
	Debin Wang, Vamsi K. Kodali, Jennifer E. Curtis, and Elisa Riedo	
8	Proton-fountain Electric-field-assisted Nanolithography (PEN)	299
	Andres La Rosa and Mingdi Yan	
9	Development of High-Throughput Control Techniques for Tip-Based Nanofabrication	325
	Haiming Wang and Qingze Zou	
10	Scanning Probe Based Nanolithography and Nanomanipulation on Graphene	357
	Pasqualantonio Pingue	

11 Diamondoid Mechanosynthesis for Tip-Based Nanofabrication . .	387
Robert A. Freitas Jr.	
12 Constraints and Challenges in Tip-Based Nanofabrication	401
Ampere A. Tseng	
Index	445
About the Editor	465

Tip-Based Nanofabrication
Fundamentals and Applications

Tseng, A.A. (Ed.)

2011, X, 466 p., Hardcover

ISBN: 978-1-4419-9898-9
