

Contents

1	Introduction	1
	References	4
2	Background on Traffic Sign Detection and Recognition	5
2.1	Color-Based Sign Detection	6
2.2	Shape-Based Sign Detection	9
2.3	Sign Recognition	10
	References	12
3	Traffic Sign Detection	15
3.1	Object Recognition	18
3.1.1	Object Detection	19
3.2	Features	20
3.2.1	Haar-Like Features	22
3.2.2	Dissociated Dipoles	22
3.3	Detection Methods	24
3.3.1	PAC Model of Learning	26
3.3.2	Boosting	28
3.3.3	AdaBoost	29
3.4	Evolutionary Approach	35
3.4.1	Introduction	36
3.4.2	From Object Detection to Function Optimization	40
3.4.3	Evolutionary Object Detection Approach	42
3.4.4	Object Detection Based on Genetic Algorithms	45
3.5	Attentional Cascade	48
	References	50
4	Traffic Sign Categorization	53
4.1	Review of Binary Classifiers	54
4.2	Multi-Class Classifiers	57

4.2.1	One Versus the Rest Committee	57
4.2.2	One Versus One Committee	57
4.2.3	Error-Correcting Output Codes	58
4.3	Error-Correcting Output Codes: Coding Designs	59
4.3.1	Binary Coding	60
4.3.2	Ternary Coding	60
4.4	Error-Correcting Output Codes: Decoding Designs	75
4.4.1	Binary Decoding	75
4.4.2	Ternary Decoding	76
	References	79
5	Traffic Sign Detection and Recognition System	81
5.1	System Architecture	81
5.1.1	Acquisition Module	82
5.1.2	Detection Module	82
5.1.3	Classification Module	84
5.1.4	System Outputs	85
5.2	Performance Evaluation of the System	85
5.2.1	General Experimental Settings	86
5.2.2	Traffic Sign Detection Results	87
5.2.3	Traffic Sign Recognition Results	90
	References	94
6	Conclusion	95

Traffic-Sign Recognition Systems

Escalera, S.; Baró, X.; Pujol, O.; Vitrià, J.; Radeva, P.

2011, VI, 96 p. 34 illus., Softcover

ISBN: 978-1-4471-2244-9
