Part I Discrete or Continuous Shortest Paths

1	Euclidean Shortest Paths	3
1.1	Arithmetic Algorithms	3
1.2	Upper Time Bounds	5
1.3	Free Parameters in Algorithms	6
1.4	An Unsolvable Problem	7
1.5	Distance, Metric, and Length of a Path	9
1.6	A Walk in Ancient Alexandria	12
1.7	Shortest Paths in Weighted Graphs	15
1.8	Points, Polygons, and Polyhedra in Euclidean Spaces	19
1.9	Euclidean Shortest Paths	23
1.10	Problems	26
1.11	Notes	27
	References	29
2	Deltas and Epsilons	31
2.1	Exact and δ -Approximate Algorithms	31
2.2	Approximate Iterative ESP Algorithms	34
2.3	Convergence Criteria	36
2.4	Convex Functions	39
2.5	Topology in Euclidean Spaces	40
2.6	Continuous and Differentiable Functions; Length of a Curve	43
2.7	Calculating a Zero of a Continuous Function	45
2.8	Cauchy's Mean-Value Theorem	47
2.9	Problems	48
2.10	Notes	49
	References	50
3	Rubberband Algorithms	53
3.1	Pursuit Paths	53
3.2	Fixed or Floating ESP Problems; Sequence of Line Segments	56

- 3.3 Rubberband Algorithms 57
- 3.4 A Rubberband Algorithm for Line Segments in 3D Space 59
- 3.5 Asymptotic and Experimental Time Complexity 60
- 3.6 Proof of Correctness 63
- 3.7 Processing Non-disjoint Line Segments as Inputs 69
- 3.8 More Experimental Studies 72
- 3.9 An Interesting Input Example of Segments in 3D Space 74
- 3.10 A Generic Rubberband Algorithm 75
- 3.11 Problems 85
- 3.12 Notes 88
- References 88

Part II Paths in the Plane

- 4 Convex Hulls in the Plane 93**
 - 4.1 Convex Sets 93
 - 4.2 Convex Hull and Shortest Path; Area 96
 - 4.3 Convex Hull of a Set of Points in the Plane 100
 - 4.4 Convex Hull of a Simple Polygon or Polyline 105
 - 4.5 Relative Convex Hulls 111
 - 4.6 Minimum-Length Polygons in Digital Pictures 113
 - 4.7 Relative Convex Hulls—The General Case 114
 - 4.8 Problems 121
 - 4.9 Notes 123
 - References 124
- 5 Partitioning a Polygon or the Plane 127**
 - 5.1 Partitioning and Shape Complexity 127
 - 5.2 Partitioning of Simple Polygons and Dual Graphs 129
 - 5.3 Seidel’s Algorithm for Polygon Trapezoidation 132
 - 5.4 Inner, Up-, Down-, or Monotone Polygons 139
 - 5.5 Trapezoidation of a Polygon at Up- or Down-Stable Vertices 142
 - 5.6 Time Complexity of Algorithm 20 151
 - 5.7 Polygon Trapezoidation Method by Chazelle 154
 - 5.8 The Continuous Dijkstra Problem 156
 - 5.9 Wavelets and Shortest-Path Maps 157
 - 5.10 Mitchell’s Algorithm 160
 - 5.11 Problems 167
 - 5.12 Notes 168
 - References 169
- 6 ESPs in Simple Polygons 171**
 - 6.1 Properties of ESPs in Simple Polygons 171
 - 6.2 Decompositions and Approximate ESPs 174
 - 6.3 Chazelle Algorithm 177
 - 6.4 Two Approximate Algorithms 177
 - 6.5 Chazelle Algorithm Versus Both RBAs 180

- 6.6 Turning the Approximate RBA into an Exact Algorithm 183
- 6.7 Problems 183
- 6.8 Notes 186
- References 186

Part III Paths in 3-Dimensional Space

- 7 Paths on Surfaces 191**
 - 7.1 Obstacle Avoidance Paths in 3D Space 191
 - 7.2 Polygonal Cuts and Bands 193
 - 7.3 ESPs on Surfaces of Convex Polyhedrons 195
 - 7.4 ESPs on Surfaces of Polyhedrons 200
 - 7.5 The Non-existence of Exact Algorithms for Surface ESPs 206
 - 7.6 Problems 207
 - 7.7 Notes 208
 - References 210
- 8 Paths in Simple Polyhedrons 213**
 - 8.1 Types of Polyhedrons; Strips 213
 - 8.2 ESP Computation 218
 - 8.3 Time Complexity 222
 - 8.4 Examples: Three NP-Complete or NP-Hard Problems 224
 - 8.5 Conclusions for the General 3D ESP Problem 226
 - 8.6 Problems 226
 - 8.7 Notes 227
 - References 229
- 9 Paths in Cube-Curves 231**
 - 9.1 The Cuboidal World 231
 - 9.2 Original and Revised RBA for Cube-Curves 236
 - 9.3 An Algorithm with Guaranteed Error Limit 238
 - 9.4 MLPs of Decomposable Simple Cube-Curves 243
 - 9.5 Analysis of the Original RBA 257
 - 9.6 RBAs for MLP Calculation in Any Simple Cube-Curve 274
 - 9.7 Correctness Proof 284
 - 9.8 Time Complexities and Examples 287
 - 9.9 The Non-existence of Exact Solutions 290
 - 9.10 Problems 303
 - 9.11 Notes 304
 - References 307

Part IV Art Galleries

- 10 Touring Polygons 313**
 - 10.1 About TPP 313
 - 10.2 Contributions in This Chapter 315
 - 10.3 The Algorithms 317

10.4	Experimental Results	321
10.5	Concluding Remarks and Future Work	322
10.6	Problems	323
10.7	Notes	324
	References	325
11	Watchman Routes	327
11.1	Essential Cuts	327
11.2	Algorithms	333
11.3	Correctness and Time Complexity	336
11.4	Problems	342
11.5	Notes	343
	References	343
12	Safari and Zookeeper Problems	347
12.1	Fixed and Floating Problems; Dilations	347
12.2	Solving the Safari Route Problem	350
12.3	Solving the Zookeeper Route Problem	353
12.4	Some Generalisations	355
12.5	Problems	359
12.6	Notes	360
	References	361
Appendix	Mathematical Details	363
A.1	Derivatives for Example 9.6	363
A.2	GAP Inputs and Outputs	364
A.3	Matrices Q for Sect. 9.9	366
Index	371
