1	Introduction	1
1.1	Heat waves in a rigid conductor	1
1.1.1	Second sound	1
1.1.2	Notation, definitions	7
1.1.3	Overview	10
1.2	Maxwell-Cattaneo theory	11
1.3	Guyer-Krumhansl theory	14
1.4	High order relaxation dynamics	16
1.5	Phase lag models	17
1.6	Heat flux history models	19
1.6.1	Gurtin - Pipkin theory	20
1.6.2	Graffi - Fabrizio theory	22
1.7	Two temperature model	24
1.8	Green-Laws theory	25
1.9	Temperature dependent conductivity	28
1.10	Type II rigid body	29
1.11	Type III rigid body	31
1.12	Microtemperatures	33
1.13	Exercises	35
2	Interaction with elasticity	38
2.1	Cattaneo theories	38
2.1.1	Cattaneo-Lord-Shulman theory	38
2.1.2	Cattaneo-Fox theory	41
2.1.3	Hidden variables	43

2.2	Green-Lindsay theory	48
2.3	Green-Naghdi type II theory	52
2.4	Green-Naghdi type III theory	56
2.5	Thermoelasticity with Voids	57
2.5.1	Basic theory of elastic materials with voids	59
2.5.2	Thermodynamic restrictions	61
2.5.3	Voids and Green - Lindsay thermoelasticity	62
2.5.4	Voids and type II thermoelasticity	65
2.5.5	Voids and type III thermoelasticity	67
2.5.6	Linear voids type III thermoelasticity	69
2.6	Generalized thermoelasticity with microstructure	72
2.6.1	Hetnarski-Ignaczak theory	72
2.6.2	Micropolar, dipolar, affine microstructure	72
2.6.3	Piezoelectricity and thermoelasticity	75
2.6.4	Other theories	78
2.7	Exercises	80
3	Interaction with fluids	82
3.1	Cattaneo theories	82
3.1.1	Cattaneo-Fox theory	85
3.1.2	Cattaneo-Christov theory	86
3.1.3	Guyer-Krumhansl model	87
3.1.4	Alternative Guyer-Krumhansl model	87
3.1.5	Further Cattaneo type fluid models	87
3.2	Green-Laws theory	89
3.3	Type II fluid	91
3.4	Type III fluid	94
3.4.1	Type III viscous fluid	96
3.4.2	Type III inviscid fluid	96
3.5	Green-Naghdi extended theory	97
4	Acceleration waves	100
4.1	Maxwell-Cattaneo theory	100
4.1.1	Wave into equilibrium	103
4.1.2	Acceleration wave in three dimensions	104
4.1.3	More general Maxwell - Cattaneo theory	107
4.1.4	Dual phase lag theory	108
4.2	Type II rigid heat conductor	108
4.2.1	Acceleration waves in type II theory	110
4.2.2	Region with no \mathbf{x} variation	111
4.2.3	Amplitude solution	111
4.3	Acceleration waves with microtemperatures	113
4.4	Type II thermoelasticity	116
4.4.1	Wavespeeds	119
4.4.2	Amplitude behaviour	121

4.5	Type III thermoelasticity	123
4.5.1	Fundamental jump relations	124
4.6	Acceleration waves in a type II fluid	126
4.7	Acceleration waves in a type III fluid	130
4.8	Exercises	134
5	Shock waves and numerical solutions	137
5.1	Shock development	139
5.2	Type II and type III thermoelasticity	149
5.3	Temperature dependent thermal conductivity	152
5.4	Exercises	153
6	Qualitative estimates	159
6.1	Decay in time	159
6.1.1	Decay of temperature	160
6.1.2	Decay of heat flux	162
6.1.3	Decay with other effects	163
6.2	Uniqueness in type II thermoelasticity	165
6.3	Growth in type II thermoelasticity	168
6.4	Uniqueness in type III thermoelasticity	170
6.5	Uniqueness on an unbounded domain	173
6.5.1	The Graffi method	174
6.5.2	The weighted energy method	177
6.6	Non-standard problems in thermoelasticity	178
6.6.1	Energy bounds, $ \alpha , \beta > 1$	180
6.6.2	Energy bounds, $ \alpha , \beta < 1$	185
6.6.3	Non-homogeneous boundary conditions	186
6.7	Explosive instabilities in heat transfer	187
6.7.1	Third order theory	187
6.7.2	Nonexistence of a solution	189
6.8	Qualitative results for fluids	192
6.8.1	Decay for a solution to (6.160)?	193
6.9	Exercises	195
7	Spatial decay	202
7.1	Generalized Maxwell - Cattaneo theory	203
7.1.1	Temperature spatial decay	204
7.1.2	Spatial decay of heat flux	205
7.1.3	Spatial decay with heat flux prescribed	206
7.2	MC theory backward in time	206
7.3	Green-Lindsay thermoelasticity	208
7.3.1	Dirichlet boundary conditions	209
7.3.2	Neumann boundary conditions	210
7.4	Type III thermoelasticity	211

7.5	Strong ellipticity in thermoelasticity	213
7.5.1	Monoclinic materials	215
7.5.2	Triclinic materials	219
8	Thermal convection in nanofluids	222
8.1	Heat transfer enhancement in nanofluids	222
8.2	The Tzou model	224
8.2.1	Coefficient dependence on nanoparticles	227
8.3	Convection with Cattaneo theories	228
8.3.1	Cattaneo - Fox law	228
8.3.2	Cattaneo - Christov law	233
8.3.3	Cattaneo theories and porous materials	238
8.4	Green - Naghdi model	241
9	Other applications	246
9.1	Applications in continuum mechanics	246
9.1.1	Nanoscale heat transport	246
9.1.2	Heat transport in nanowires	247
9.1.3	Heat transport in thin films	248
9.1.4	Reactor fuel rods	251
9.1.5	Phase changes	252
9.2	Stellar, planetary heat propagation	255
9.2.1	Cryovolcanism on Enceladus	255
9.2.2	Thermohaline convection	256
9.3	Traffic flow	258
9.4	Applications in biology	260
9.4.1	Population dynamics	260
9.4.2	Migration of a school of fish	261
9.4.3	Spread of the Hantavirus	262
9.4.4	Chemotaxis	264
9.4.5	Radiofrequency heating	267
9.4.6	Skin burns	269
9.5	Exercises	271
	References	275
	Index	315

Heat Waves

straughan, b.

2011, XII, 318 p., Hardcover

ISBN: 978-1-4614-0492-7
