
CONTENTS

Preface	ix
1 A GENERAL VIEW	1
1.1 Introduction	1
1.2 What does real time mean?	4
1.3 Achieving predictability	13
2 BASIC CONCEPTS	23
2.1 Introduction	23
2.2 Types of task constraints	25
2.3 Definition of scheduling problems	34
2.4 Scheduling anomalies	42
3 APERIODIC TASK SCHEDULING	53
3.1 Introduction	53
3.2 Jackson's algorithm	54
3.3 Horn's algorithm	58
3.4 Non-preemptive scheduling	63
3.5 Scheduling with precedence constraints	70
3.6 Summary	76
4 PERIODIC TASK SCHEDULING	79
4.1 Introduction	79
4.2 Timeline scheduling	84
4.3 Rate Monotonic scheduling	86
4.4 Earliest Deadline First	100
4.5 Deadline Monotonic	103
4.6 EDF with constrained deadlines	110
4.7 Comparison between RM and EDF	116

5	FIXED-PRIORITY SERVERS	119
5.1	Introduction	119
5.2	Background scheduling	120
5.3	Polling Server	121
5.4	Deferrable Server	130
5.5	Priority Exchange	139
5.6	Sporadic Server	143
5.7	Slack stealing	149
5.8	Non-existence of optimal servers	153
5.9	Performance evaluation	155
5.10	Summary	157
6	DYNAMIC PRIORITY SERVERS	161
6.1	Introduction	161
6.2	Dynamic Priority Exchange Server	162
6.3	Dynamic Sporadic Server	167
6.4	Total Bandwidth Server	171
6.5	Earliest Deadline Late Server	174
6.6	Improved Priority Exchange Server	178
6.7	Improving TBS	181
6.8	Performance evaluation	185
6.9	The Constant Bandwidth Server	189
6.10	Summary	201
7	RESOURCE ACCESS PROTOCOLS	205
7.1	Introduction	205
7.2	The priority inversion phenomenon	206
7.3	Terminology and assumptions	209
7.4	Non-Preemptive Protocol	210
7.5	Highest Locker Priority Protocol	212
7.6	Priority Inheritance Protocol	214
7.7	Priority Ceiling Protocol	226
7.8	Stack Resource Policy	234
7.9	Schedulability analysis	246
7.10	Summary	247

8	LIMITED PREEMPTIVE SCHEDULING	251
8.1	Introduction	251
8.2	Non-preemptive scheduling	257
8.3	Preemption thresholds	261
8.4	Deferred Preemptions	266
8.5	Task splitting	270
8.6	Selecting preemption points	274
8.7	Assessment of the approaches	279
9	HANDLING OVERLOAD CONDITIONS	287
9.1	Introduction	287
9.2	Handling aperiodic overloads	293
9.3	Handling overruns	316
9.4	Handling permanent overloads	326
10	KERNEL DESIGN ISSUES	349
10.1	Structure of a real-time kernel	349
10.2	Process states	351
10.3	Data structures	356
10.4	Miscellaneous	361
10.5	Kernel primitives	366
10.6	Intertask communication mechanisms	385
10.7	System overhead	392
11	APPLICATION DESIGN ISSUES	397
11.1	Introduction	398
11.2	Time constraints definition	401
11.3	Hierarchical design	408
11.4	A robot control example	413
12	REAL-TIME OPERATING SYSTEMS AND STANDARDS	419
12.1	Standards for real-time operating systems	419
12.2	Commercial real-time systems	428
12.3	Linux related real-time kernels	432
12.4	Open-source real-time research kernels	437
12.5	Development Tools	452

13 SOLUTIONS TO THE EXERCISES	457
GLOSSARY	487
REFERENCES	497
INDEX	515
