
Contents

<i>Preface</i>	V
<i>Contributors</i>	IX
1 Some Trends in Chem(o)informatics	1
<i>Wendy A. Warr</i>	
2 Molecular Similarity Measures	39
<i>Gerald M. Maggiora and Veerabahu Shanmugasundaram</i>	
3 The Ups and Downs of Structure–Activity Landscapes	101
<i>Rajarshi Guba</i>	
4 Computational Analysis of Activity and Selectivity Cliffs	119
<i>Lisa Peltason and Jürgen Bajorath</i>	
5 Similarity Searching Using 2D Structural Fingerprints	133
<i>Peter Willett</i>	
6 Predicting the Performance of Fingerprint Similarity Searching	159
<i>Martin Vogt and Jürgen Bajorath</i>	
7 Bayesian Methods in Virtual Screening and Chemical Biology	175
<i>Andreas Bender</i>	
8 Reduced Graphs and Their Applications in Chemoinformatics	197
<i>Kristian Birchall and Valerie J. Gillet</i>	
9 Fragment Descriptors in Structure–Property Modeling and Virtual Screening.....	213
<i>Alexandre Varnek</i>	
10 The Scaffold Tree: An Efficient Navigation in the Scaffold Universe	245
<i>Peter Ertl, Ansgar Schuffenhauer, and Steffen Renner</i>	
11 Pharmacophore-Based Virtual Screening	261
<i>Dragos Horvath</i>	
12 De Novo Drug Design	299
<i>Markus Hartenfeller and Gisbert Schneider</i>	
13 Classification of Chemical Reactions and Chemoinformatics Processing of Enzymatic Transformations	325
<i>Diogo A.R.S. Latino and João Aires-de-Sousa</i>	
14 Informatics Approach to the Rational Design of siRNA Libraries	341
<i>Jerry O. Ebalunode, Charles Jagun, and Weifan Zheng</i>	
15 Beyond Rhodopsin: G Protein-Coupled Receptor Structure and Modeling Incorporating the β 2-adrenergic and Adenosine A _{2A} Crystal Structures	359
<i>Andrew J. Tebben and Dora M. Schnur</i>	
16 Methods for Combinatorial and Parallel Library Design	387
<i>Dora M. Schnur, Brett R. Beno, Andrew J. Tebben, and Cullen Cavallaro</i>	
17 The Interweaving of Cheminformatics and HTS	435
<i>Anne Kümmel and Christian N. Parker</i>	
18 Computational Systems Chemical Biology	459
<i>Tudor I. Oprea, Elebeoba E. May, Andrei Leitão, and Alexander Tropsha</i>	

19	Ligand-Based Approaches to In Silico Pharmacology	489
	<i>David Vidal, Ricard Garcia-Serna, and Jordi Mestres</i>	
20	Molecular Test Systems for Computational Selectivity Studies and Systematic Analysis of Compound Selectivity Profiles	503
	<i>Dagmar Stumpfe, Eugen Lounkine, and Jürgen Bajorath</i>	
21	Application of Support Vector Machine-Based Ranking Strategies to Search for Target-Selective Compounds.	517
	<i>Anne Mai Wassermann, Hanna Geppert, and Jürgen Bajorath</i>	
22	What Do We Know?: Simple Statistical Techniques that Help	531
	<i>Anthony Nicholls</i>	
	Index	583

Chemoinformatics and Computational Chemical Biology

Bajorath, J. (Ed.)

2011, X, 588 p. 150 illus., 13 illus. in color., Hardcover

ISBN: 978-1-60761-838-6

A product of Humana Press
