

Contents

Part I Basic Biology of Adult Stem Cells

1 Molecular Mechanisms Regulating Adult Stem Cell Self-Renewal	3
David M. Panchision	
2 Maintenance of Adult Stem Cells: Role of the Stem Cell Niche	35
Yoshiko Matsumoto, Hiroko Iwasaki, and Toshio Suda	
3 The Emerging Role of microRNAs in Adult Stem Cells.....	57
Jessica M. Shookhoff and G. Ian Gallicano	
4 Expression and Function of Pluripotency Genes in Adult Stem Cells	95
Antonio Lo Nigro, Philip Roelandt, and Catherine M. Verfaillie	
5 Adult Stem Cell Plasticity Revisited.....	113
Eva Mezey	

Part II Characterization of Adult Stem Cells

6 Lineage Tracing of Tissue-Specific Stem Cells In Vivo	135
Kurtis T. Sobush, Keitaro Matsumoto, Huaiyong Chen, and Barry R. Stripp	
7 Surrogate Measures of Adult Stem Cell Self-Renewal: The Neural Stem Cell Paradigm.....	163
Loic P. Deleyrolle, Brent A. Reynolds, and Florian A. Siebzehnruhl	
8 ABC Transporters, Aldehyde Dehydrogenase, and Adult Stem Cells	181
Naomi J. Guppy, Linda J. Nicholson, and Malcolm R. Alison	

Part III Regulation of Life Span and Immortalization

9 Regulation of Life Span in Adult Stem Cells..... 203
Philip Davy and Rich Allsopp

10 The Cancer Stem Cell Paradigm 225
Christine E. Eyler, John M. Heddleston, Serendipity Rhinos,
Masahiro Hitomi, Olga Guryanova, Will Flavahan,
Anita Hjelmeland, and Jeremy Rich

Name Index..... 249

Subject Index..... 273
