PART I BIOCHEMICAL APPROACHES, IN VITRO AND IN VIVO

| | |
|---------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1 Approaches to Detect PARP-1 Activation In Vivo, In Situ, and In Vitro | 3 |
| <i>Girish M. Shah, Febitha Kandan-Kulangara, Alicia Montoni, Rashmi G. Shah, Julie Brind'Amour, Momchild D. Vodenicharov, and El Bachir Affar</i> | |
| 2 Quantification of Poly(ADP-Ribose) In Vitro: Determination of the ADP-Ribose Chain Length and Branching Pattern | 35 |
| <i>Rafael Alvarez-Gonzalez and Myron K. Jacobson</i> | |
| 3 Assay for Protein Modification by Poly-ADP-Ribose In Vitro | 47 |
| <i>Opeyemi A. Olabisi and Chi-Wing Chow</i> | |
| 4 Identification of Distinct Amino Acids as ADP-Ribose Acceptor Sites by Mass Spectrometry. | 57 |
| <i>Florian Rosenthal, Simon Messner, Bernd Roschitzki, Peter Gehrig, Paolo Nanni, and Michael O. Hottiger</i> | |
| 5 Noncovalent Protein Interaction with Poly(ADP-Ribose) | 67 |
| <i>Maria Malanga and Felix R. Althaus</i> | |
| 6 Noncovalent pADPr Interaction with Proteins and Competition with RNA for Binding to Proteins. | 83 |
| <i>Yingbiao Ji</i> | |
| 7 Affinity-Based Assays for the Identification and Quantitative Evaluation of Noncovalent Poly(ADP-Ribose)-Binding Proteins | 93 |
| <i>Jean-Philippe Gagné, Jean-François Haince, Émilie Pic, and Guy G. Poirier</i> | |
| 8 Detecting and Quantifying pADPr In Vivo | 117 |
| <i>Yi-Chen Lai, Rajesh K. Aneja, Margaret A. Satchell, and Robert S.B. Clark</i> | |
| 9 Purification of Recombinant Poly(ADP-Ribose) Polymerases | 135 |
| <i>Jean-Christophe Amé, Thomas Kalisch, Françoise Dantzer, and Valérie Schreiber</i> | |
| 10 Methods for Purification of Proteins Associated with Cellular Poly(ADP-Ribose) and PARP-Specific Poly(ADP-Ribose). | 153 |
| <i>Jennifer E. Rood, Anthony K.L. Leung, and Paul Chang</i> | |
| 11 Purification and Characterization of Poly(ADP-Ribosyl)ated DNA Replication/Repair Complexes | 165 |
| <i>Cynthia M. Simbulan-Rosenthal, Dean S. Rosenthal, and Mark E. Smulson</i> | |
| 12 PARP1 Genomics: Chromatin Immunoprecipitation Approach Using Anti-PARP1 Antibody (ChIP and ChIP-seq) | 191 |
| <i>Niraj Lodhi and Alexei V. Tulin</i> | |

| | | |
|----|-----------------------------------------------------------------------------------------------------------------------------------|-----|
| 13 | Purification of Human PARP-1 and PARP-1 Domains from <i>Escherichia coli</i> for Structural and Biochemical Analysis | 209 |
| | <i>Marie-France Langelier, Jamie L. Planck, Kristin M. Servent, and John M. Pascal</i> | |
| 14 | Regulation of Chromatin Structure by PARP-1 | 227 |
| | <i>Mi Young Kim</i> | |

PART II GENETIC MANIPULATION APPROACHES

| | | |
|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 15 | The Use of PARP Inhibitors in Cancer Therapy: <i>Use as Adjuvant with Chemotherapy or Radiotherapy; Use as a Single Agent in Susceptible Patients; Techniques Used to Identify Susceptible Patients</i> | 239 |
| | <i>Sydney Shall, Terry Gaymes, Farzin Farzaneh, Nicola Curtin, and Ghulam J. Mufti</i> | |
| 16 | Quantification of PARP Activity in Human Tissues: Ex Vivo Assays in Blood Cells and Immunohistochemistry in Human Biopsies | 267 |
| | <i>Eszter M. Horvath, Zsuzsanna K. Zsengellér, and Csaba Szabo</i> | |
| 17 | Assays for Hypermethylation of the <i>BRCA1</i> Gene Promoter in Tumor Cells to Predict Sensitivity to PARP-Inhibitor Therapy | 277 |
| | <i>Ilsiya Ibragimova and Paul Cairns</i> | |
| 18 | Generation of Poly(ADP-ribosyl)ation Deficient Mutants of the Transcription Factor, CTCF | 293 |
| | <i>Dawn Farrar, Igor Chernukhin, and Elena Klenova</i> | |
| 19 | Phenotypic Characterization of Parp-1 and Parp-2 Deficient Mice and Cells | 313 |
| | <i>Christian Boehler, Laurent Gauthier, Jose Yelamos, Aurélie Noll, Valérie Schreiber, and Françoise Dantzer</i> | |
| 20 | Poly(ADP-ribosyl)ation Pathways in Mammals: The Advantage of Murine PARG Null Mutation | 337 |
| | <i>Yiran Zhou and David W. Koh</i> | |
| 21 | Genetic Approaches to Targeting Multiple PARP Genes in a Mammalian Genome | 349 |
| | <i>Mirella L. Meyer-Ficca and Ralph G. Meyer</i> | |
| 22 | Approaches to Separate and Identify PolyADP-Ribosylated Proteins Using Poly(ADP-Ribose) Glycohydrolase-Knockout <i>Drosophila</i> | 377 |
| | <i>Hiroto Nodono, Akiko Hamada, Yasuhito Kuroda, Kazuo Kamemura, Makoto Hasegawa, Toru Komiya, Machiko Kondo, Fan-Sik Che, Shuji Hanai, and Masanao Miwa</i> | |
| 23 | Immunolocalization of Poly ADP-Ribose on <i>Drosophila</i> Polytene Chromosomes | 391 |
| | <i>Anna Sala and Davide F.V. Corona</i> | |
| 24 | The Immunodetection of pADPr in <i>Drosophila</i> Tissues: Immunostaining of Thick Sections; Immuno-EM | 401 |
| | <i>Michal Jarnik</i> | |
| 25 | Poly(ADP-Ribose) Metabolism Analysis in the Nematode <i>Caenorhabditis elegans</i> | 413 |
| | <i>Jean-François St-Laurent and Serge Desnoyers</i> | |

| | | |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------|-----|
| 26 | Genetic Dissection of PARylation in the Filamentous Fungus <i>Neurospora crassa</i> | 427 |
| | <i>Gregory O. Kothe</i> | |
| 27 | Purification of the Poly-ADP-Ribose Polymerase-Like Thermozyyme from the Archaeon <i>Sulfolobus solfataricus</i> | 443 |
| | <i>Anna De Maio, Elena Porzio, Ida Romano, Barbara Nicolaus, and Maria Rosaria Faraone Mennella</i> | |
| PART III DISCOVERY OF NEW PARP INHIBITORS | | |
| 28 | Strategies Employed for the Development of PARP Inhibitors | 463 |
| | <i>Stacie Canan, Karen Maegley, and Nicola Curtin</i> | |
| 29 | Small-Molecule Collection and High-Throughput Colorimetric Assay to Identify PARP1 Inhibitors | 491 |
| | <i>Elena Kotova, Aaron D. Pinnola, and Alexei V. Tulin</i> | |
| | Erratum. | E1 |
| | Index. | 517 |
