

Contents

1 Introduction	1
References	5
2 The Extracellular Matrix	7
References	10
3 Cytoskeleton	13
3.1 Actin Filaments	13
3.1.1 Actin-Binding Proteins	16
3.1.2 Actin Filament Dynamics	20
3.2 Microtubules	24
3.2.1 Motor Proteins	27
3.2.2 Nonmotor Proteins	28
3.3 Intermediate Filaments.....	29
References	31
4 Pseudopodia and Adhesion Structures	37
4.1 The Formation of Pseudopodia	37
4.2 Cell–Extracellular Matrix Adhesion Structures	44
4.2.1 Focal Contacts (Focal Adhesions)	45
4.2.2 Focal Complexes	50
4.2.3 Fibrillar Adhesions.....	51
4.2.4 Hemidesmosomes	51
4.2.5 Podosomes and Invadopodia.....	51
References	53
5 Adhesive Interactions of Tissue Cells with the Extracellular Matrix	57
5.1 Cell Spreading on the Extracellular Matrix Surface	57
5.1.1 Cells in a Suspended State	57
5.1.2 The Morphology of Cell Spreading Process in Normal Cells	64

5.1.3	Morphological Alterations in the Spreading of Transformed Cells.....	74
5.2	The Signaling Pathways in the Spread Cells	88
5.2.1	Cell Surface Receptors.....	88
5.2.2	Intracellular Signal Transduction.....	91
5.3	Signaling Pathways from Integrin and Growth Factor Receptors in Normal Cells	94
5.3.1	Integrin Receptor-Mediated Mitogenic Signaling Pathways	95
5.3.2	Growth Factor Receptor-Mediated Mitogenic Signaling Pathways	96
5.3.3	Integrin and Growth Factor Receptor-Mediated Antiapoptotic Signaling Pathways	97
5.3.4	The “Anchorage Dependence”	99
5.3.5	Integrin and Growth Factor Receptor-Mediated Morphogenic Signaling Pathways	100
5.3.6	Integrin-Mediated Mechanical Force-Induced Signaling	105
5.4	Alterations in Integrin-Mediated Adhesion and Signaling in Transformed Cells.....	108
5.4.1	Defective Adhesive Function	108
5.4.2	Alterations in the Mitogenic Signal Transduction	110
5.4.3	The “Anchorage Independence”	111
	References.....	113
6	Cell Migration	121
6.1	Factors Involved in Cell Migration	121
6.1.1	Formation of Pseudopodia	123
6.1.2	Polarization of Migrating Cells.....	126
6.1.3	Contact Inhibition of Cell Migration	127
6.1.4	Effect of Growth Factors.....	128
6.1.5	Role of Focal Adhesions in Cell Migration	130
6.2	Abnormalities of Cell Migration Machinery in Transformed Cells ..	132
6.2.1	Pseudopodial Activity with Actin-Myosin Structure Deficiencies	133
6.2.2	Cell-Matrix Adhesion Alterations.....	134
6.2.3	Hypersensitivity to Mitogens-Motogens.....	135
	References.....	137
7	Cell Responses to Chemical Heterogeneity of Substrata: Adhesive “Islets” or “Paths”	145
	References.....	152
8	Topographic Cell Responses.....	153
8.1	Cylindrical Substrata.....	154
8.1.1	Normal Cell Responses	154
8.1.2	Transformed Cell Responses.....	158

8.2	Grooved Substrata	161
8.2.1	Normal Cell Responses	161
8.2.2	Transformed Cell Responses	163
8.3	Discontinuous Substrata	167
8.3.1	Lattices	167
8.3.2	Multiple Vertival Rods	172
8.4	Effects of the Substratum Surface Topography on Cell Adhesion, Proliferation, and Synthetic Activities	174
8.5	Mechanisms of Topographic Cell Responses	177
8.5.1	Cylindrical Substrata	178
8.5.2	Grooved Substrata	179
8.5.3	Lattice Substrata	180
	References	181
9	Intercellular Adhesive Interactions	185
9.1	Cadherin-Mediated Intercellular Contacts: Adherens Junctions	187
9.1.1	Structure of Adherence Junctions	187
9.1.2	Dynamic Regulation of Adherens Junctions	189
9.1.3	Contact Inhibition of Cell Proliferation	197
9.2	Altered Regulation of Adherens Junctions Caused by Oncogenic Transformation	200
9.2.1	Alterations in Cadherin–Catenin Complex	201
9.2.2	Loss of Contact Inhibition of Cell Proliferation	204
	References	205
10	Conclusions	213
	References	215
	Index	217
