1 The Peripheral Nervous System: Gross Anatomy	1
1.1 The Cranial Nerves	4
1.2 The Spinal Nerves	7
1.2.1 The Anterior Primary Rami	7
1.2.2 Thoracic Anterior Primary Rami	18
1.2.3 Lumbar and Sacral Anterior Primary Rami	18
1.2.4 The Posterior Primary Rami	32
1.3 The Autonomic Nervous System	33
1.3.1 The Sympathetic System	34
1.3.2 The Parasympathetic Nervous System	36
1.3.3 Afferent Autonomic Pathways	37
1.4 Nerves at Risk from Musculo Skeletal Injury	37
References	41
2 The Microscopic Structure of the Nervous System: Its Function	43
2.1 The Neurotrophins	44
2.1.1 Nerve Growth Factor	44
2.2 The Peripheral Nerve Fibres	46
2.2.1 Conduction	54
2.2.2 The Basis of the Action Potential: Ion Channels	56
2.2.3 Axonal Transport	57
2.2.4 The Blood Supply of Nerves	58
2.2.5 The Nervi Nervorum	59
2.2.6 Changes in Nerves with Ageing	59
2.3 The Somatic Motor System	61
2.4 The Somatic Sensory System	62
2.4.1 Cutaneous Sensibility	62
2.4.2 The Skin	64
2.4.3 Cutaneous Sensory Receptors	65
2.4.4 Deep Sensibility	66
2.4.5 The Muscle Spindles	66
2.4.6 The Golgi Tendon Organs	68
2.4.7 Central Connections	69
2.4.8 Visceral Afferents	70
2.5 Cortical Maps	71
2.6 Synaptic Activity	72

3 Reactions to Injury	77
3.1 Axonotmesis – Neurotmesis	81
3.2 The Cell Body and Proximal Stump	82
3.2.1 Wounds of the Perineurium	84
3.2.2 Contralateral Effects	85
3.3 The Distal Stump	85
3.4 Types of Lesion Produced by Different Physical Agents	87
3.4.1 Acute Ischaemia	87
3.4.2 Ischaemia from Tamponade	89
3.4.3 Ischaemia and Acute Compression Within Neurovascular Fascial Compartments	90
3.4.4 Ischaemia by Acute Compression from Swollen Muscle	92
3.4.5 Ischaemia Caused by Traction	95
3.4.6 Reperfusion Injury	96
3.4.7 Chronic Ischaemia	97
3.4.8 Crush	97
3.4.9 Compression – Acute	98
3.4.10 Chronic Nerve Compression	99
3.4.11 Traction or Stretch Injury	100
3.4.12 Thermal Injury	103
3.4.13 Electric Shock	104
3.4.14 Percussion Injury	106
3.4.15 Injection Injury	106
3.4.16 Vibration Injury	107
3.5 The Perineurium and Neoplasm or Infiltration	107
3.6 Radiation and Peripheral Nerves	108
3.7 Envenomation	108
3.8 The Peripheral Effects of Denervation	109
3.9 Changes at the Higher Levels: The Phantom Limb	110
References	111
4 Regeneration and Recovery	115
4.1 The Response of the Nerve and Axon to Transection	116
4.2 The Repair of Large Gaps	123
4.2.1 Other, Non Neural, Material for Grafts: Entubation	126
4.3 Nerve Transfer	128
4.3.1 Recovery of Cutaneous Sensation after Nerve Transfer	130
4.3.2 Recovery of the Deep Afferent Pathways after Nerve Transfer	130
4.3.3 Complications of Regeneration	132
4.4 Regeneration after Intradural Injury	135
4.5 Recovery of Function after Nerve Repair	137
4.5.1 Methods	138
4.6 Factors in Prognosis	139
4.7 Severity of Injury	140
4.8 Delay	140
References	140
5 Clinical Aspects of Nerve Injury	145
5.1 Associated Symptoms and Signs	148
5.2 Recognition of the Level and the Depth of Injury	151
5.3 Signs	154
