

Contents

1	Introduction	1
1.1	Introduction to Requirements	1
1.2	Introduction to Systems Engineering	4
1.3	Defining Requirements Engineering	6
1.3.1	Definition of a Requirement	6
1.3.2	Definition of a Stakeholder	7
1.3.3	Definition of Requirements Engineering	7
1.4	Requirements and Quality	9
1.5	Requirements and the Lifecycle	10
1.6	Requirements Tracing	13
1.7	Requirements and Modelling	17
1.8	Requirements and Testing	19
1.9	Requirements in the Problem and Solution Domains	20
1.10	How to Read this Book	22
2	A Generic Process for Requirements Engineering	25
2.1	Introduction	25
2.2	Developing Systems	25
2.3	Generic Process Context	28
2.3.1	Input Requirements and Derived Requirements	29
2.3.2	Acceptance Criteria and Qualification Strategy	30
2.4	Generic Process Introduction	31
2.4.1	Ideal Development	31
2.4.2	Development in the Context of Change	31
2.5	Generic Process Information Model	33
2.5.1	Information Classes	34
2.5.2	Agreement State	36
2.5.3	Qualification State	37
2.5.4	Satisfaction State	37
2.5.5	Information Model Constraints	38

2.6	Generic Process Details	38
2.6.1	Agreement Process.....	38
2.6.2	Analyse and Model	40
2.6.3	Derive Requirements and Qualification Strategy Fig. 2.1.3 Portrays the Process for Deriving Requirements and Qualification Strategy.....	42
2.7	Summary	45
3	System Modelling for Requirements Engineering	47
3.1	Introduction.....	47
3.2	Representations for Requirements Engineering.....	48
3.2.1	Data Flow Diagrams	48
3.2.2	Entity-Relationship Diagrams.....	54
3.2.3	Statecharts	55
3.2.4	Object-Oriented Approaches.....	56
3.3	Methods.....	58
3.3.1	Viewpoint Methods	59
3.3.2	Object-Oriented Methods.....	67
3.3.3	The UML Notation.....	70
3.3.4	Formal Methods	75
3.4	Summary	76
4	Writing and Reviewing Requirements	77
4.1	Introduction.....	77
4.2	Requirements for Requirements	78
4.3	Structuring Requirements Documents	79
4.4	Key Requirements.....	80
4.5	Using Attributes	80
4.6	Ensuring Consistency Across Requirements	82
4.7	Value of a Requirement.....	83
4.8	The Language of Requirements.....	84
4.9	Requirement Boilerplates.....	85
4.10	Granularity of Requirements.....	88
4.11	Criteria for Writing Requirements Statements	89
4.12	Summary	90
5	Requirements Engineering in the Problem Domain	93
5.1	What is the Problem Domain?.....	93
5.2	Instantiating the Generic Process.....	94
5.3	Agree Requirements with Customer.....	95
5.4	Analyse & Model.....	96
5.4.1	Identify Stakeholders	96
5.4.2	Create Use Scenarios	98
5.4.3	Scoping the System.....	101
5.5	Derive Requirements.....	102
5.5.1	Define Structure.....	102
5.5.2	Capture Requirements	106

5.5.3	Define Acceptance Criteria.....	112
5.5.4	Define Qualification Strategy	113
5.6	Summary	114
6	Requirements Engineering in the Solution Domain	115
6.1	What is the Solution Domain	115
6.2	Engineering Requirements from Stakeholder Requirements to System Requirements	116
6.2.1	Producing the System Model.....	117
6.2.2	Creating System Models to Derive System Requirements	118
6.2.3	Banking Example.....	123
6.2.4	Car Example	126
6.2.5	Deriving Requirements from a System Model	131
6.2.6	Agreeing the System Requirements with the Design Team	132
6.3	Engineering Requirements from System Requirements to Subsystems	133
6.3.1	Creating a System Architecture Model.....	134
6.3.2	Deriving Requirements from an Architectural Design Model.....	134
6.4	Other Transformations Using a Design Architecture	135
6.5	Summary	136
7	Advanced Traceability	137
7.1	Introduction.....	137
7.2	Elementary Traceability.....	137
7.3	Satisfaction Arguments	139
7.4	Requirements Allocation	143
7.5	Reviewing Traceability	144
7.6	The Language of Satisfaction Arguments.....	144
7.7	Rich Traceability Analysis.....	145
7.8	Rich Traceability for Qualification	146
7.9	Implementing Rich Traceability	146
7.9.1	Single-Layer Rich Traceability.....	146
7.9.2	Multi-Layer Rich Traceability	147
7.10	Design Documents	147
7.11	Metrics for Traceability	152
7.11.1	Breadth.....	153
7.11.2	Depth.....	153
7.11.3	Growth	153
7.11.4	Balance.....	154
7.11.5	Latent Change	155
7.12	Summary	158

8 Management Aspects of Requirements Engineering.....	159
8.1 Introduction to Management.....	159
8.2 Requirements Management Problems	160
8.2.1 Summary of Requirement Management Problems.....	162
8.3 Managing Requirements in an Acquisition Organisation.....	162
8.3.1 Planning.....	162
8.3.2 Monitoring.....	165
8.3.3 Changes.....	165
8.4 Supplier Organisations.....	167
8.4.1 Bid Management.....	167
8.4.2 Development.....	171
8.5 Product Organisations.....	173
8.5.1 Planning.....	173
8.5.2 Monitoring.....	177
8.5.3 Changes.....	178
8.6 Summary.....	179
8.6.1 Planning.....	179
8.6.2 Monitoring.....	179
8.6.3 Changes.....	180
 9 DOORS: A Tool to Manage Requirements.....	 181
9.1 Introduction.....	181
9.2 The Case for Requirements Management.....	182
9.3 DOORS Architecture	182
9.4 Projects, Modules and Objects.....	183
9.4.1 DOORS Database Window.....	183
9.4.2 Formal Modules.....	183
9.4.3 Objects.....	186
9.4.4 Graphical Objects	189
9.4.5 Tables.....	189
9.5 History and Version Control	190
9.5.1 History.....	190
9.5.2 Baselineing.....	190
9.6 Attributes and Views.....	191
9.6.1 Attributes	191
9.6.2 Views	192
9.7 Traceability	192
9.7.1 Links	192
9.7.2 Traceability Reports.....	193
9.8 Import and Export.....	195
9.9 UML Modelling with DOORS/Analyst.....	197
9.10 Summary.....	198
 Bibliography	 199
 Index.....	 203
