

Contents

1	Introduction to Wetland Systems	1
1.1	Background	1
1.2	Definitions	3
1.3	Hydrology of Wetlands	3
1.4	Wetland Chemistry	5
1.5	Wetland System Mass Balance.....	8
1.6	Macrophytes in Wetlands	9
1.7	Physical and Biochemical Parameters	11
1.8	Constructed Treatment Wetlands	12
1.9	Constructed Wetlands Used for Storm Water Treatment	13
	References.....	16
2	Wetland Case Studies	19
2.1	Integrated Constructed Wetlands for Treating Domestic Wastewater.....	19
2.1.1	Introduction.....	19
2.1.2	Materials and Methods.....	21
2.1.3	Results and Discussion.....	26
2.1.4	Conclusions and Further Research Needs.....	36
2.2	Guidelines for Farmyard Runoff Treatment with Wetlands	36
2.2.1	Introduction.....	36
2.2.2	Farm Constructed Wetlands: Definition and Background.....	38
2.2.3	Farm Constructed Wetland Site Suitability.....	41
2.2.4	Design Guidelines for Farm Constructed Wetlands.....	45
2.2.5	Construction and Planting.....	48
2.2.6	Maintenance and Operation	51
2.2.7	Conclusions.....	53

2.3	Integrated Constructed Wetland for Treating Farmyard Runoff ...	54
2.3.1	Introduction.....	54
2.3.2	Material and Methods	55
2.3.3	Results and Discussion.....	61
2.3.4	Conclusions.....	72
2.4	Integrated Constructed Wetlands for Treating Swine Wastewater	73
2.4.1	Introduction and Agricultural Practice	73
2.4.2	International Design Guidelines: Global Scenario	74
2.4.3	Operations	80
2.4.4	Macrophytes and Rural Biodiversity	83
2.4.5	Nutrients.....	85
2.4.6	Pathogens, Odor, and Human Health	88
2.4.7	Conclusions and Further Research Needs	89
2.5	Wetlands to Control Runoff from Wood Storage Sites	89
2.5.1	Introduction and Objectives	89
2.5.2	Pollution Potential of Runoff from Wood Handling Sites.....	91
2.5.3	Treatment Methods	95
2.5.4	Discussion, Conclusions, and Further Research	102
2.6	Wetlands for Treating Hydrocarbons	105
2.6.1	Introduction.....	105
2.6.2	Materials and Methods.....	108
2.6.3	Results and Discussion.....	113
2.6.4	Conclusions.....	115
	References.....	115
3	Carbon Storage and Fluxes Within Wetland Systems.....	127
3.1	Introduction	127
3.1.1	Wetlands and Processes	127
3.1.2	Global Warming.....	128
3.1.3	Purpose and Review Methodology	129
3.2	Carbon Turnover and Removal Mechanisms	129
3.2.1	Carbon Turnover.....	129
3.2.2	Carbon Components.....	130
3.2.3	Carbon Removal Mechanisms	130
3.3	Are Wetlands Carbon Sources or Sinks?.....	132
3.3.1	Wetlands as Carbon Sources.....	132
3.3.2	Wetlands as Carbon Sinks.....	136
3.4	Impact of Global Warming on Wetlands.....	138
3.5	Conclusions and Further Research Needs	140
	References.....	140

4	Wetlands and Sustainable Drainage	149
4.1	Rapid Assessment Methodology for the Survey of Water Bodies	149
4.1.1	Introduction.....	149
4.1.2	How to Use This Guidance Manual	153
4.1.3	Assessment of Classification Variables	154
4.1.4	Bias and Purpose	172
4.1.5	Presentation of Findings Using Geostatistics.....	174
4.2	Classification of Sustainable Flood Retention Basin Types	177
4.2.1	Introduction and Objectives	177
4.2.2	Methodology	179
4.2.3	Findings and Discussion	186
4.2.4	Conclusions.....	189
4.3	Combined Wetland and Detention Systems	189
4.3.1	Introduction.....	189
4.3.2	Methodology	192
4.3.3	Results and Discussion.....	198
4.3.4	Conclusions.....	200
4.4	Integration of Trees into Drainage Planning.....	201
4.4.1	Introduction.....	201
4.4.2	Methodology	204
4.4.3	Results and Discussion.....	205
4.4.4	Conclusions.....	211
	References.....	212
5	Modeling Complex Wetland Systems.....	217
5.1	Introduction	217
5.2	Methodology and Software	219
5.2.1	Case Study Sites.....	219
5.2.2	Data and Variables	220
5.2.3	Statistical Analyses	220
5.2.4	Self-organizing Map	221
5.3	Results and Discussion	223
5.3.1	Overall Performance	223
5.3.2	Model Application to Assess Nutrient Removal.....	224
5.3.3	Nitrogen and Phosphorus Predictions	227
5.4	Conclusions	229
	References.....	230
	Index	233

Wetland Systems

Storm Water Management Control

Scholz, M.

2011, XVIII, 235 p., Hardcover

ISBN: 978-1-84996-458-6
