

Contents

1	Introduction	1
1.1	Introduction to Biofuels	1
1.2	Production of Biodiesel in the European Union.	3
1.3	Production of Biodiesel in the World.	4
1.4	Concluding Remarks	6
	References	6
2	Introduction to Biodiesel Production.	7
2.1	Introduction	7
2.1.1	Advantages of the Use of Biodiesel	7
2.1.2	Disadvantages of the Use of Biodiesel.	8
2.2	Raw Materials for Biodiesel Production	8
2.2.1	Typical Oil Crops Useful for Biodiesel Production	9
2.2.2	Characteristics of Oils and Fats Used in Biodiesel Production	14
2.2.3	Characteristics of Alcohols Used in Biodiesel Production	16
2.3	Biodiesel Production Process	17
2.3.1	Treatment of Raw Materials.	18
2.3.2	Alcohol-Catalyst Mixing	19
2.3.3	Chemical Reaction	20
2.3.4	Separation of the Reaction Products	21
2.3.5	Purification of the Reaction Products.	22
2.4	Glycerin	23
2.4.1	Uses	23
2.5	Concluding Remarks	24
	References	24

3	Standards for Fuel Characterization	29
3.1	Introduction	29
3.2	Biodiesel Characterization According to International Standards	29
3.3	Characterization Properties Required by Standards	33
3.4	Characterization Properties not Required by Standards	37
3.5	Quality Control of the Biodiesel Obtained in Different Production Scales	37
3.6	Low-Cost Alternatives for Quality Control of Biodiesel	38
3.7	Concluding Remarks	39
	References	39
4	Electric Properties of Liquids	43
4.1	Introduction	43
4.2	Electromagnetic Fields and Material Properties	43
4.2.1	Electromagnetic Fields in a Vacuum	43
4.2.2	Characteristic Scales and Approximations	44
4.2.3	Classical Treatment of the Electromagnetic Field in Materials	45
4.2.4	Electromagnetic Fields in Materials	46
4.3	Electromagnetic Energy Dissipation in Materials	47
4.4	Dielectric Relaxation	52
4.4.1	The Debye Model: Polarization Relaxation with a Single Characteristic Time	52
4.4.2	Dielectrics with Several Relaxation Times	53
4.4.3	Superposition of Multiple Relaxation Times: the Havriliak–Negami Dielectric Function	54
4.5	Dielectric Polarization in Liquids	54
4.5.1	Electronic Polarization	54
4.5.2	Orientation Polarization	55
4.5.3	Interfacial Polarization	55
4.6	Concluding Remarks	56
	References	56
5	Introduction to Dielectric Spectroscopy (DS)	59
5.1	Introduction	59
5.2	Measurement of Dielectric Properties at Low Frequencies	59
5.2.1	Admittance, Capacitance, and Permittivity	60
5.2.2	Determination of the Cell Constant	61
5.2.3	Dissipation Factor	62
5.3	Measurement of Dielectric Properties at Higher Frequencies	62
5.3.1	Propagation in Coaxial Transmission Lines	62
5.3.2	Transmission Lines Excited by Harmonic Signals	63

5.3.3	Reflection Coefficient, Impedance and Admittance	64
5.3.4	Transmission Lines under Pulsed Excitation.	65
5.4	Experimental Techniques	66
5.4.1	Temperature Control	66
5.4.2	Sample Cells	66
5.4.3	Sample Handling	67
5.4.4	Low-Frequency Measuring Instruments	68
5.4.5	High-Frequency Measuring Instruments	68
5.4.6	Optical Measurements: Refractive Index	69
5.5	Concluding Remarks	69
	References	70
6	Dielectric Techniques for the Characterization of Raw Materials and Effluents in Biodiesel Production	71
6.1	Introduction	71
6.2	Dielectric Properties of Vegetable Oils.	71
6.3	Dielectric Properties of Treated Vegetable Oils.	78
6.4	Dielectric Properties of Effluents from Biodiesel Production.	79
6.5	Refractive Index of Vegetable Oils	81
6.6	Concluding Remarks	82
	References	82
7	Application of Dielectric Spectroscopy to the Characterization of FAME in Biodiesel Production	83
7.1	Introduction	83
7.2	Dielectric Model of FAME and Biodiesel.	83
7.3	Dielectric Properties of FAME	84
7.3.1	Permittivity	84
7.3.2	Conductivity.	86
7.4	Dielectric Properties of Biodiesel	89
7.4.1	Permittivity	89
7.4.2	Conductivity.	90
7.5	Refractive Index	91
7.6	Concluding Remarks	91
	References	92
8	Relations Between the Properties Required by International Standards and Dielectric Properties of Biodiesel.	93
8.1	Introduction	93
8.2	Determination of Flash Point	93
8.3	Correlation Between Flash Point and Methanol Content in Biodiesel	95
8.4	Temperature Dependence of Electrical Properties of Biodiesel.	96

8.5	Permittivity and Conductivity in Biodiesel	
	Containing Methanol	96
8.6	Concluding Remarks	97
	References	98
Index		101

Dielectric Spectroscopy in Biodiesel Production and
Characterization

Romano, S.D.; Sorichetti, P.A.

2011, VIII, 103 p., Hardcover

ISBN: 978-1-84996-518-7
