<b>Preface</b>	xv
<b>1 Introduction</b>	
1 Elliptic problems in applications	1
1.1 Heat and mass transfer	1
1.2 Electrostatic and gravitational fields	4
1.3 Hydrodynamics	5
1.4 Biological applications	7
2 Classical theory of linear elliptic problems	10
2.1 Function spaces	10
2.2 Elliptic problems	13
2.3 A priori estimates	20
2.4 Fredholm operators	25
3 Elliptic problems in unbounded domains	30
3.1 Function spaces	31
3.2 Limiting problems	32
3.3 Fredholm property and solvability conditions	36
3.4 Index	39
3.5 A priori estimates	42
3.6 Non-Fredholm operators	42
4 Nonlinear Fredholm operators	43
4.1 Topological degree	43
4.2 Existence and bifurcations of solutions	45
<b>2 Function Spaces and Operators</b>	
1 The space $E$	48
2 Systems of functions	49
3 The space $E_p$	50
4 The space $E_\infty$	55
5 Completeness of the space $E_\infty$	57
6 Other definitions of the space $E_\infty$	59

7	Bounded sequences in $E_\infty$ . . . . .	62
8	The space $E_p(\Gamma)$ . . . . .	65
9	Spaces in unbounded domains . . . . .	73
10	Dual spaces . . . . .	78
11	Dual spaces in domains . . . . .	89
12	Spaces $W_q^{s,p}(\mathbb{R}^n)$ . . . . .	93
13	Local operators . . . . .	100
<b>3</b>	<b>A Priori Estimates</b>	
1	Model problems in a half-space . . . . .	106
1.1	Formulation of the main result . . . . .	106
1.2	Auxiliary results . . . . .	107
1.3	Reduction to homogeneous systems . . . . .	112
1.4	Proof of Theorem 1.2 . . . . .	113
1.5	Proof of Theorem 1.1 . . . . .	116
2	A priori estimates in the spaces $W_\infty^{s,p}$ . . . . .	116
3	A priori estimates for adjoint operators. Model systems . . . . .	120
4	The general problem in a half-space . . . . .	123
5	The general problem in unbounded domains . . . . .	130
<b>4</b>	<b>Normal Solvability</b>	
1	Limiting domains . . . . .	137
1.1	General properties . . . . .	137
1.2	Examples . . . . .	142
2	Sobolev spaces . . . . .	146
2.1	A priori estimates in the spaces $W_\infty^{k,p}$ . . . . .	146
2.2	Limiting problems . . . . .	147
2.3	A priori estimates with condition NS . . . . .	154
2.4	Normal solvability . . . . .	163
3	Hölder spaces . . . . .	170
3.1	Operators and spaces . . . . .	170
3.2	Normal solvability . . . . .	171
3.3	Dual spaces. Invertibility of limiting operators . . . . .	176
3.4	Weighted spaces . . . . .	180
<b>5</b>	<b>Fredholm Property</b>	
1	Estimates with Condition NS* . . . . .	183
2	Abstract operators . . . . .	193
3	Elliptic problems in spaces $W_\infty^{s,p}(\Omega)$ . . . . .	198
4	Exponential decay . . . . .	203
5	The space $E_q$ . . . . .	205
6	The space $E_q$ . Continuation . . . . .	210

7	Weighted spaces . . . . .	215
8	Hölder spaces . . . . .	217
9	Examples . . . . .	220
9.1	Bounded domains . . . . .	220
9.2	Unbounded domains . . . . .	222
<b>6</b>	<b>Formally Adjoint Problems</b>	
1	Definitions . . . . .	227
2	Spaces $V^{2m}(\Omega)$ . . . . .	231
3	Fredholm theorems . . . . .	237
4	Spaces $E_q$ . . . . .	243
5	Smoothness of solutions . . . . .	246
6	Examples . . . . .	247
<b>7</b>	<b>Elliptic Problems with a Parameter</b>	
1	Parameter-elliptic boundary value problems . . . . .	252
2	Spaces . . . . .	254
3	Model problem in $\mathbb{R}^n$ . . . . .	256
4	Model problem in a half-space . . . . .	258
5	Problem in $\mathbb{R}^n$ . . . . .	272
6	Problem in $\mathbb{R}_+^n$ . . . . .	275
7	Problem in $\Omega$ . . . . .	276
8	Generation of analytic semigroups . . . . .	284
9	Elliptic problems with a parameter at infinity . . . . .	285
10	Examples . . . . .	286
10.1	Invertibility of second-order operators . . . . .	286
10.2	Operators with a parameter . . . . .	288
<b>8</b>	<b>Index of Elliptic Operators</b>	
1	Definitions . . . . .	292
1.1	Limiting domains . . . . .	293
1.2	Limiting operators and problems . . . . .	295
1.3	Conditions NS and estimates . . . . .	296
1.4	Results and examples . . . . .	298
2	Stabilization of the index . . . . .	302
3	Formally adjoint problems . . . . .	313
4	Convergence of solutions . . . . .	319
5	Cauchy-Riemann system . . . . .	324
6	Laplace operator with oblique derivative . . . . .	331
7	Cauchy-Riemann system and Laplace operator . . . . .	336
7.1	Reduction of the problems to each other . . . . .	336
7.2	Formula for index . . . . .	345

8	General first-order systems on the plane . . . . .	346
8.1	Reduction to canonical systems . . . . .	346
8.2	Index in bounded domains . . . . .	350
8.3	Index in unbounded domains . . . . .	352
9	Examples . . . . .	355
<b>9</b>	<b>Problems in Cylinders</b>	
1	Ordinary differential operators on the real line . . . . .	360
1.1	Representation of solutions . . . . .	360
1.2	Calculation of the index . . . . .	362
2	Second-order equations . . . . .	365
2.1	Reduction to first-order equations . . . . .	365
2.2	Solvability conditions . . . . .	368
3	Second-order problems in cylinders . . . . .	375
3.1	Normal solvability . . . . .	375
3.2	Calculation of the index . . . . .	380
4	Lower estimates of elliptic operators . . . . .	388
4.1	Operators with constant coefficients . . . . .	389
4.2	Variable coefficients . . . . .	393
4.3	Weighted spaces . . . . .	397
4.4	Fredholm property and applications . . . . .	399
<b>10</b>	<b>Non-Fredholm Operators</b>	
1	Weakly non-Fredholm operators . . . . .	402
1.1	Some properties of operators . . . . .	402
1.2	Solvability conditions . . . . .	408
1.3	Examples of weakly non-Fredholm operators . . . . .	418
2	Non-Fredholm solvability conditions . . . . .	426
2.1	Example of first-order ODE . . . . .	426
2.2	Ordinary differential systems on the real line . . . . .	428
2.3	Second-order equations . . . . .	432
3	Space decomposition of operators . . . . .	434
3.1	Normal solvability on a subspace . . . . .	436
3.2	Scalar equation . . . . .	440
4	Strongly non-Fredholm operators . . . . .	442
<b>11</b>	<b>Nonlinear Fredholm Operators</b>	
1	Nonlinear elliptic problems . . . . .	446
2	Properness . . . . .	448
2.1	Lemma on properness of operators in Banach spaces . . . . .	448
2.2	Properness of elliptic operators in Hölder spaces . . . . .	449
2.3	Operators depending on a parameter . . . . .	453

2.4	Example of non-proper operators . . . . .	454
2.5	Properness in Sobolev spaces . . . . .	455
3	Topological degree . . . . .	468
3.1	Definition and main properties of the degree . . . . .	468
3.2	Orientation of operators . . . . .	470
3.3	Degree for Fredholm and proper operators . . . . .	474
3.4	Uniqueness of the degree . . . . .	480
3.5	Degree for elliptic operators . . . . .	484
3.6	Non-existence of the degree . . . . .	487
4	Existence and bifurcations of solutions . . . . .	489
4.1	Methods of nonlinear analysis . . . . .	489
4.2	Existence of solutions . . . . .	493
4.3	Elliptic problems in unbounded domains . . . . .	501
4.4	Bifurcations . . . . .	518
<b>Supplement. Discrete operators . . . . .</b>		<b>527</b>
1	One-parameter equations . . . . .	527
1.1	Limiting operators and normal solvability . . . . .	527
1.2	Solvability conditions . . . . .	533
1.3	Spectrum of difference and differential operators . . . . .	534
2	First-order systems . . . . .	535
2.1	Solvability conditions . . . . .	536
2.2	Higher-order equations . . . . .	540
3	Principal eigenvalue . . . . .	541
3.1	Auxiliary results . . . . .	543
3.2	Location of the spectrum . . . . .	545
4	Stability of finite difference schemes . . . . .	549
<b>Historical and Bibliographical Comments . . . . .</b>		<b>553</b>
1	Historical Notes . . . . .	554
1.1	Beginning of the theory . . . . .	554
1.2	Existence of solutions of boundary value problems . . . . .	556
1.3	Other elliptic equations . . . . .	559
1.4	Analyticity . . . . .	561
1.5	Eigenvalues . . . . .	563
1.6	Fredholm theory . . . . .	564
2	Linear equations . . . . .	568
2.1	A priori estimates . . . . .	568
2.2	Normal solvability and Fredholm property . . . . .	570
2.3	Index . . . . .	576
2.4	Elliptic problems with a parameter . . . . .	581

3 Decay and growth of solutions . . . . . 583

4 Topological degree . . . . . 586

5 Existence and bifurcation of solutions . . . . . 591

6 Concluding remarks . . . . . 593

**Acknowledgement . . . . . 595**

**Bibliography . . . . . 597**

**Notation of Function Spaces . . . . . 635**

**Index . . . . . 637**

Elliptic Partial Differential Equations  
Volume 1: Fredholm Theory of Elliptic Problems in  
Unbounded Domains

Volpert, V.

2011, XVIII, 642 p., Hardcover

ISBN: 978-3-0346-0536-6

A product of Birkhäuser Basel
