

Contents

1	Introduction to Poncelet Porisms	1
	Acknowledgement	9
2	Billiards – First Examples	
2.1	Introduction to billiards	11
2.2	Triangular billiards	12
2.3	Billiards within an ellipse	14
2.4	Periodic orbits of billiards and Birkhoff’s theorem	17
2.5	Bicentric polygons	17
2.6	Poncelet theorem	22
3	Hyperelliptic Curves and Their Jacobians	
3.1	Riemann surfaces	27
3.2	Algebraic curves	31
3.3	Normalization theorem	37
3.4	Further properties of Riemann surfaces	39
3.5	Complex tori and elliptic functions	44
3.6	Hyperelliptic curves	54
3.7	Abel’s theorem	57
3.8	Points of finite order on the Jacobian of a hyperelliptic curve	63
4	Projective Geometry	
4.1	Preliminaries	67
4.2	Conics and quadrics	69
4.3	Projective structure on a conic	71
4.4	Pencils of conics	73
4.5	Quadrics and polarity	76
4.6	Polarity and pencils of conics	78
4.7	Invariants of pairs of conics	82
4.8	Duality. Complete conics	85
4.9	Confocal conics	88

4.10	Quadrics, their pencils and linear subsets	91
4.11	Confocal quadrics	95
4.12	(2-2)-correspondences	99
5	Poncelet Theorem and Cayley's Condition	
5.1	Full Poncelet theorem	109
5.2	Cayley's condition	111
5.3	Another proof of Poncelet's theorem and Cayley's condition	119
5.4	One generalization of the Poncelet theorem	123
5.5	Poncelet theorem on Liouville surfaces	125
5.6	Poncelet theorem in projective space	129
5.7	Virtual billiard trajectories	130
5.8	Towards generalization of proof of Cayley's condition	133
6	Poncelet–Darboux Curves and Siebeck–Marden Theorem	
6.1	Preliminaries	137
6.2	Isofocal deformations	143
6.3	n -volutions, collisions and decomposition of Poncelet–Darboux curves	150
7	Ellipsoidal Billiards and Their Periodical Trajectories	
7.1	Periodical trajectories inside k confocal quadrics in Euclidean space	165
7.2	Ellipsoidal billiard as a discrete time system	173
7.3	Poncelet's theorem and Cayley's condition in the Lobachevsky space	179
7.4	Topological properties of an elliptical billiard	181
7.5	Integrable potential perturbations of an elliptical billiard	198
8	Billiard Law and Hyperelliptic Curves	
8.1	Generalized Cayley's curve	203
8.2	Billiard law and algebraic structure on variety \mathcal{A}_ℓ	204
8.3	s -weak Poncelet trajectories	216
8.4	On generalized Weyr's theorem and the Griffiths–Harris space Poncelet theorem in higher dimensions	218
8.5	Poncelet–Darboux grid and higher-dimensional generalizations	220
9	Poncelet Theorem and Continued Fractions	
9.1	Hyperelliptic Halphen-type continued fractions	229
9.2	Geometric realizations of the $2 \leftrightarrow g + 1$ dynamics	252

10 Quantum Yang–Baxter Equation and (2-2)-correspondences

10.1	A proof of the Euler theorem. Baxter’s R -matrix	259
10.2	Heisenberg quantum ferromagnetic model	261
10.3	Vacuum vectors and vacuum curves	263
10.4	Algebraic Bethe Ansatz and Vacuum Vectors	271
10.5	Rank 2 solutions in (4×4) case	274
10.6	Conclusion	276
