Preface to the First Edition	ix
Preface to the Second Edition	xii
I Laplace Transforms and Well-Posedness of Cauchy Problems	1
1 The Laplace Integral	5
1.1 The Bochner Integral	6
1.2 The Radon-Nikodym Property	15
1.3 Convolutions	21
1.4 Existence of the Laplace Integral	27
1.5 Analytic Behaviour	32
1.6 Operational Properties	36
1.7 Uniqueness, Approximation and Inversion	40
1.8 The Fourier Transform and Plancherel's Theorem	44
1.9 The Riemann-Stieltjes Integral	48
1.10 Laplace-Stieltjes Integrals	55
1.11 Notes	59
2 The Laplace Transform	63
2.1 Riesz-Stieltjes Representation	65
2.2 A Real Representation Theorem	68
2.3 Real and Complex Inversion	73
2.4 Transforms of Exponentially Bounded Functions	77
2.5 Complex Conditions	80
2.6 Laplace Transforms of Holomorphic Functions	84
2.7 Completely Monotonic Functions	89
2.8 Notes	100

3	Cauchy Problems	107
3.1	C_0 -semigroups and Cauchy Problems	108
3.2	Integrated Semigroups and Cauchy Problems	121
3.3	Real Characterization	132
3.4	Dissipative Operators	137
3.5	Hille-Yosida Operators	141
3.6	Approximation of Semigroups	145
3.7	Holomorphic Semigroups	148
3.8	Fractional Powers	162
3.9	Boundary Values of Holomorphic Semigroups	171
3.10	Intermediate Spaces	184
3.11	Resolvent Positive Operators	188
3.12	Complex Inversion and UMD-spaces	197
3.13	Norm-continuous Semigroups and Hilbert Spaces	201
3.14	The Second Order Cauchy Problem	202
3.15	Sine Functions and Real Characterization	217
3.16	Square Root Reduction for Cosine Functions	222
3.17	Notes	230
II	Tauberian Theorems and Cauchy Problems	239
4	Asymptotics of Laplace Transforms	243
4.1	Abelian Theorems	244
4.2	Real Tauberian Theorems	247
4.3	Ergodic Semigroups	261
4.4	The Contour Method	272
4.5	Almost Periodic Functions	288
4.6	Countable Spectrum and Almost Periodicity	295
4.7	Asymptotically Almost Periodic Functions	306
4.8	Carleman Spectrum and Fourier Transform	318
4.9	Complex Tauberian Theorems: the Fourier Method	325
4.10	Notes	329
5	Asymptotics of Solutions of Cauchy Problems	337
5.1	Growth Bounds and Spectral Bounds	338
5.2	Semigroups on Hilbert Spaces	351
5.3	Positive Semigroups	352
5.4	Splitting Theorems	360
5.5	Countable Spectral Conditions	371
5.6	Solutions of Inhomogeneous Cauchy Problems	378
5.7	Notes	386

III Applications and Examples	397
6 The Heat Equation	401
6.1 The Laplacian with Dirichlet Boundary Conditions	401
6.2 Inhomogeneous Boundary Conditions	408
6.3 Asymptotic Behaviour	412
6.4 Notes	415
7 The Wave Equation	417
7.1 Perturbation of Selfadjoint Operators	417
7.2 The Wave Equation in $L^2(\Omega)$	423
7.3 Notes	427
8 Translation Invariant Operators on $L^p(\mathbb{R}^n)$	429
8.1 Translation Invariant Operators and C_0 -semigroups	430
8.2 Fourier Multipliers	435
8.3 L^p -spectra and Integrated Semigroups	441
8.4 Systems of Differential Operators on L^p -spaces	449
8.5 Notes	458
A Vector-valued Holomorphic Functions	461
B Closed Operators	467
C Ordered Banach Spaces	477
D Banach Spaces which Contain c_0	481
E Distributions and Fourier Multipliers	485
Indexes	493
Bibliography	493
Notation	525
Index	533

Vector-valued Laplace Transforms and Cauchy
Problems

Second Edition

Arendt, W.; Batty, C.J.K.; Hieber, M.; Neubrander, F.

2011, XII, 540 p., Hardcover

ISBN: 978-3-0348-0086-0

A product of Birkhäuser Basel
